ORDER

Velsicol Chemical Corporation requests that we modify our Order of April 5, 1973 by deleting the requirement that the Company post a performance bond. The request for reconsideration is timely and we consider it on its merits. The Order requires Velsicol to cease and desist from its violations by installing and operating a surface facility for deep well injection of its plant effluent. The posting of a performance bond in the amount of \$150,000 for a period of one year is to guarantee performance of the cease and desist order.

Velsicol would like to be relieved of the bond requirement since it has completed construction of the surface facility. The Order, however, requires more than installation of the facility. It requires that the facility operate in an acceptable manner in order to meet the requirements of the law. We feel that the posting of the bond for a period of one year is a valid means of securing the installation of equipment which will actually perform as represented and will achieve the desired results, i.e. compliance with the Regulation.

The Request for Modification is therefore denied.

I, Christan L. Moffett, Clerk of the Illinois Pollution Control Board, hereby certify the above Order was adopted this 7th day of June, 1973 by a vote of 4 to 0 .
