## ILLINOIS POLLUTION CONTROL BOARD June 7, 1973

SHERWINWILLIAMS COMPANY	) ) )
ν.	) ) PCB 72-401
ENVIRONMENTAL PROTECTION AGENCY	) ) )

OPINION AND ORDER OF THE BOARD (by Mr. Dumelle)

On May 25, 1973 the Sherwin-Williams Company filed a petition to modify the variance granted November 21, 1972. Sherwin-Williams asks for a modification of interim dates which have to do with the paint department wastewaters. The final date for completion of the mercury control program of September 30, 1974 is not affected.

The Agency, in its response to the motion filed June 6, 1973 recommends a grant of the amended interim dates. We agree with the Agency and Sherwin-Williams and grant the change in dates as listed in this order. Sherwin-Williams has done an excellent job in reducing its mercury discharges and in the instant proceeding has discontinued certain operations such as laundry and drum cleaning that have further reduced the quantity of the wastewater flow.

## ORDER

The order of November 21, 1972 (6 PCB 286) is changed to read as follows:

3. Detail design drawings and plans for further mercury control on areas of the plant other than the paint department shall be submitted to the Agency by June 4, 1973. Preliminary engineering plans of proposed treatment for mercury control for the paint department shall be submitted to the Agency by July 30, 1973 and detail engineering drawings and plans for the same facility shall be submitted by September 28, 1973.

IT IS SO ORDERED.
