

ILLINOIS POLLUTION CONTROL BOARD
November 28, 1972

INCINERATOR, INC.)
)
)
 v.) # 72-416
)
)
 ENVIRONMENTAL PROTECTION AGENCY)

Opinion of the Board (by Mr. Currie):

Incinerator seeks a brief extension of the eleven months allowed by our order of November 23, 1971, #71-324, 3 PCB 167, for operation of scrubbing equipment to bring about compliance with particulate emission standards. As a result of damage to a component of the control equipment during delivery and of unexpected delays in securing an electrical supply to power the equipment, installation of the first scrubber was expected, the new petition alleged, to be completely installed by November 1, 1972, testing to commence December 11, 1972, and debugging to be completed by January 31, 1972. By the end of this period both scrubbers will be in full operation.

The Agency confirms that Incinerator has acted with diligence to complete its control program and that the relatively minor delays experienced were beyond the company's control. We agree the extension should be granted. The Agency suggests several conditions which we deem reasonable.

ORDER

The variance granted to Incinerator, Inc. in #71-324 November 23, 1971 is hereby extended to January 31, 1973, on the following conditions:

- 1) All applicable conditions of the prior order shall be met;
- 2) A detailed progress report specifying every operation which has not been completed and the estimated time of completion for each operation shall be submitted to the Agency by December 14, 1972;
- 3) A stack test shall be performed on or before December 15, 1972, or as soon thereafter as weather conditions permit. The Agency shall be notified five days in advance of the scheduled date of the stack test so that Agency personnel may, if desired, monitor the testing procedures. Stack test results shall be submitted to the Agency by Jan. 31, 1973;

- 4) Petitioner shall, within 5 days after receipt of this order, inspect the mesh screen and, if necessary, replace it immediately.

I, Christan Moffett, Clerk of the Pollution Control Board, certify that the Board adopted the above Opinion this 28th day of November, 1972, by a vote of 5-0.

Christan Moffett
