## ILLINOIS POLLUTION CONTROL BOARD July 18, 1972

)

COMMONWEALTH EDISON CO.

v.

# 72-295

ENVIRONMENTAL PROTECTION AGENCY

Preliminary Opinion & Order of the Board (by Mr. Currie):

Edison asks reaffirmation, after the passage of a year, of its program for particulate emission control at its Will County and Powerton generating stations. The statute requires an annual reexamination of extended programs to assure adequate progress. To the extent this is all that is at stake, we see no present necessity (barring an adverse Agency recommendation) for formal proof. However, the petition also appears to request in certain respects additional time beyond that contemplated by the earlier order (compare paragraph 1 of the petition with paragraphs 5 and 11). A hearing is hereby authorized in which Edison should present whatever evidence it deems necessary to justify any such request.

I, Christan Moffett, Clerk of the Pollution Control Board, certify that the Board adopted the above Preliminary Opinion & Order this 1819 day of July, 1972 by a vote of 5-0.
