

ILLINOIS POLLUTION CONTROL BOARD  
June 5, 2003

IN THE MATTER OF: )  
 ) R03-18  
RCRA SUBTITLE C UPDATE, USEPA ) (Identical-in-Substance  
AMENDMENTS (July 1, 2002 through ) Rulemaking - Land  
December 31, 2002) )

Adopted Rule. Final Order.

OPINION OF THE BOARD (by M.E. Tristano):

**SUMMARY OF TODAY'S ACTION**

This identical-in-substance rulemaking updates the Illinois hazardous waste regulations to incorporate revisions to the federal regulations. The United States Environmental Protection Agency (USEPA) made the federal amendments that prompted this action during the period of July 1, 2002 through December 31, 2002. This proceeding adopts amendments to 35 Ill. Adm. Code 703, 720, 721, 726, and 728. This adoption also makes a series of non-substantive corrections and stylistic revisions to segments of the text of 35 Ill. Adm. Code 720, 721, 726, and 728 that are not otherwise affected by the covered federal amendments.

Sections 7.2 and 22.4(a) of the Environmental Protection Act (Act) (415 ILCS 5/7.2 and 22.4(a) (2002)) require the Board to adopt regulations that are "identical in substance" to hazardous waste regulations adopted by the USEPA. These USEPA rules implement Subtitle C of the federal Resource Conservation and Recovery Act of 1976 (RCRA Subtitle C) (42 U.S.C. §§ 6921 *et seq.* (2000)).

Sections 7.2 and 22.4(a) provide for quick adoption of regulations that are identical in substance to federal regulations that USEPA adopts to implement Sections 3001 through 3005 of RCRA (42 U.S.C. §§ 6921-6925 (2000)). Section 22.4(a) also provides that Title VII of the Act and Section 5 of the Administrative Procedure Act (APA) (5 ILCS 100/5-35 and 5-40 (2002)) do not apply to the Board's adoption of identical-in-substance regulations. The federal RCRA Subtitle C regulations are found at 40 C.F.R. 260 through 266, 268, 270, 271, 273, and 279.

This opinion supports an order that the Board also adopts today. The Board will file the adopted amendments with the Office of the Secretary of State no sooner than 30 days after the date of this opinion and accompanying order. This is to allow USEPA additional time to review the amendments before they are filed.

**FEDERAL ACTIONS CONSIDERED IN THIS RULEMAKING**

The following listing briefly summarizes the federal actions considered in this RCRA Subtitle C update rulemaking:

**Docket R03-18: July 1, 2002 through December 31, 2002,**  
**RCRA Subtitle C Amendments**

USEPA amended the federal RCRA Subtitle regulations on three occasions during the period July 1, 2002 through December 31, 2002. Each is summarized below:

**67 Fed. Reg. 48393 (July 24, 2002)**

USEPA adopted an exclusion from the definition of solid waste of certain secondary materials used to make zinc fertilizers.

**67 Fed. Reg. 62618 (October 7, 2002)**

USEPA adopted a direct final rule that grants a national treatability variance from the land disposal restrictions for radioactively contaminated cadmium-, mercury-, and silver-containing batteries.

**67 Fed. Reg. 77687 (December 19, 2002)**

USEPA adopted minor corrections to the September 30, 1999 hazardous waste combustion rule and July 3, 2001, February 13, 2002, and February 14, 2002 amendments to that rule.

**67 Fed. Reg. 78718 (December 26, 2002)**

USEPA adopted a direct final rule that conditionally exempts used cathode ray tubes (CRTs) and glass from CRTs from the definition of solid waste. This action was limited to CRTs in USEPA Region III, so that USEPA could study extending this action nationally.

**No Later RCRA Subtitle C (Hazardous Waste) or UIC**  
**Amendments of Interest to Date**

The Board engages in ongoing monitoring of federal actions. As of the date of this opinion and accompanying order, the Board has identified a no other USEPA actions since December 31, 2002 that further amend the RCRA Subtitle C hazardous waste rules in a way that would require immediate Board attention.

When the Board observes an action outside the nominal timeframe of a docket that would require expedited consideration in the pending docket, the Board will expedite consideration of those amendments. Federal actions that could warrant expedited consideration include those that directly affect the amendments involved in this docket, those for which compelling reasons would warrant consideration as soon as possible, and those for which the Board has received a request for expedited consideration.

**Other Federal Actions Having a Direct Impact on the**  
**Illinois RCRA Subtitle C Regulations**

In addition to the amendments to the federal RCRA Subtitle C regulations, amendments to certain other federal regulations occasionally have an effect on the Illinois hazardous waste

rules. Most notably, 35 Ill. Adm. Code 720.111 includes several incorporations of federal regulations by reference. The incorporated regulations include segments of various USEPA environmental regulations and United States Department of Transportation hazardous materials transportation regulations that USEPA has incorporated into the federal hazardous waste rules.

As of the date of this proposal for public comment, the Board has found three sets of amendments to the incorporated materials. Those are the following actions:

**67 Fed. Reg. 65220 (October 23, 2002)**

USEPA updated the various methods used for analysis of contaminants in wastewater and drinking water. This included amendments to the methods of 40 C.F.R. 136.

**67 Fed. Reg. 65876 (October 29, 2002)**

USEPA updated the Method 1631 for analysis of mercury in water. This included amendments to the method in 40 C.F.R. 136.

**67 Fed. Reg. 69952 (November 19, 2002)**

USEPA amended its guidelines for whole effluent toxicity (WET) testing by approving new methods, amending existing methods, and deleting prior methods. This included amendments to the methods in 40 C.F.R. 136.

The October 23, 2002 update to the methods for analysis of water and wastewater and the October 29, 2002 update of the method for analysis of mercury in water will require the Board to update the version of 40 C.F.R. 136 incorporated by reference in Section 720.111 to include these two sets of amendments. The federal amendments of November 19, 2002, will not require the Board to update the incorporation by reference, since whole effluent toxicity testing is not used in the implementation of the RCRA Subtitle C regulations.

**RCRA Subtitle C (Hazardous Waste) Amendments  
on Which No Board Action Is Necessary**

Among the listed federal RCRA Subtitle C amendments examined by the Board is one on which no Board action is necessary in this docket R03-18. That action was that of December 26, 2002.

The amendments of December 26, 2002 (67 Fed. Reg. 78718), were substantive amendments adopted by USEPA as a direct final rule. USEPA later withdrew the rule in a *Federal Register* notice dated February 24, 2003 (68 Fed. Reg. 8553), stating it did so in response to adverse public comments. The December 26, 2002 amendments would have conditionally exempted CRTs from the definition of solid waste when they are recycled. This action would have applied only in USEPA Region III (Delaware, Maryland, Virginia, West Virginia, and the District of Columbia). The action was part of USEPA regulatory innovations efforts intended to encourage increased recycling and improved management of used materials. Thus, because USEPA later withdrew the rule and because the rule would have applied only in USEPA Region III, no Board action will be required on the December 26, 2002 federal amendments relating to recycling of used CRTs.

**Summary Listing of the Federal Actions Forming the Basis  
of the Board's Actions in These Consolidated Dockets**

Based on the foregoing, the federal actions that form the basis for Board action in this update docket are the following, listed in chronological order:

July 24, 2002 (67 Fed. Reg. 48393)	Exclusion of certain secondary materials used to make zinc fertilizers from the definition of solid waste.
October 7, 2002 (67 Fed. Reg. 62618)	National treatability variance for radioactively contaminated cadmium-, mercury-, and silver-containing batteries.
October 23, 2002 (67 Fed. Reg. 65220)	Updated methods used for analysis of contaminants in wastewater and drinking water, including the methods of 40 C.F.R. 136.
October 29, 2002 (67 Fed. Reg. 65876)	Updated Method 1631 for analysis of mercury in water in 40 C.F.R. 136.
December 19, 2002 (67 Fed. Reg. 77687)	Minor corrections to the hazardous waste combustion rule and the amendments to that rule.

**PUBLIC COMMENTS**

The March 20, 2003 proposal for public comment appeared in the April 18, 2003 issue of the *Illinois Register*, at 27 Ill. Reg. 6580 (Part 703), 6612 (Part 720), 6661 (Part 721), 6825 (Part 726), and 6959 (Part 728). The Board received public comments on the proposal for a period of 45 days, until June 2, 2003. The Board will delay filing the adopted rules with the Secretary of State for 30 days after adoption, until after July 5, 2003, particularly to allow additional time for USEPA to review the adopted amendments before they are filed and become effective.

During the public comment period, the Board received the following comment:

PC 1 Illinois Environmental Protection Agency (Agency), by Mark Wight, Assistant Counsel (May 23, 2003, received May 27, 2003)

In PC 1, the Agency suggested a small number of minor corrections to the text of the amendments. The Agency also responded to Board requests for comments on substantive aspects of the amendments. The substantive aspects of the Agency comments are considered in the substantive discussions below.

In addition to the public comment received, the Board received a copy of the text of the proposed amendments with suggested corrections marked by the Joint Committee on Administrative Rules (JCAR). The Board does not discuss the minor corrections made in response to the JCAR and Agency suggestions. The corrections made in response are listed in Table 3, which appears below beginning at page 135 of this opinion. Table 4, beginning at page 143, outlines the suggestions not followed.

## **DISCUSSION**

The following discussion begins with a description of the types of deviations the Board makes from the literal text of federal regulations in adopting identical-in-substance rules. It is followed by a discussion of the amendments and actions undertaken in direct response to the federal actions involved in this proceeding. This first series of discussions is organized by federal subject matter, generally appearing in chronological order of the relevant *Federal Register* notices involved. Finally, this discussion closes with a description of the amendments and actions that are not directly derived from the federal actions.

### **General Revisions and Deviations from the Federal Text**

In incorporating the federal rules into the Illinois system, some deviation from the federal text is unavoidable. This deviation arises primarily through differences between the federal and state regulatory structure and systems. Some deviation also arises through errors in and problems with the federal text itself. The Board conforms the federal text to the Illinois rules and regulatory scheme and corrects errors that we see in the text as we engage in these routine update rulemakings.

In addition to the amendments derived from federal amendments, the Board often finds it necessary to alter the text of various passages of the existing rules as provisions are opened for update in response to USEPA actions. This involves correcting deficiencies, clarifying provisions, and making other changes that are necessary to establish a clear set of rules that closely parallel the corresponding federal requirements within the codification scheme of the *Illinois Administrative Code*.

The Board updates the citations to the *Code of Federal Regulations* to the most recent version available. As of the date of this opinion, the most recent version of the *Code of Federal Regulations* available to the Board is the July 1, 2002 version. Thus, we have updated all citations to the 2002 version, adding references to later amendments using their appropriate *Federal Register* citation, where necessary.

The Board substituted “or” for “/” in most instances where this appeared in the federal base text, using “and” where more appropriate. The Board further used this opportunity to make a number of corrections to punctuation, grammar, spelling, and cross-reference format throughout the opened text. We changed “who” to “that” and “he” or “she” to “it,” where the person to which the regulation referred was not necessarily a natural person, or to “he or she,” where a natural person was evident; changed “which” to “that” for restrictive relative clauses; substituted “must” for “shall”; capitalized the section headings and corrected their format where necessary; and corrected punctuation within sentences.

In addition, the federal rules have been edited to establish a uniform usage throughout the Board’s regulations. For example, with respect to “shall,” “will,” and “may,” “must” is used when an action is required by the rule, without regard to whether the action is required of the subject of the sentence or not. “Shall” is no longer used, since it is not used in everyday

language. Thus, where a federal rule uses “shall,” the Board substitutes “must.” This is a break from our former practice where “shall” was used when the subject of a sentence has a duty to do something. “Will” is used when the Board obliges itself to do something. “May” is used when choice of a provision is optional. “Or” is used rather than “and/or,” and denotes “one or both.” “Either . . . or” denotes “one but not both.” “And” denotes “both.”

The Joint Committee on Administrative Rules (JCAR) has requested that the Board refer to the United States Environmental Protection Agency in the same manner throughout all of our bodies of regulations—*i.e.*, air, water, drinking water, RCRA Subtitle D (municipal solid waste landfill), RCRA Subtitle C (hazardous waste), underground injection control (UIC), etc. The Board has decided to refer to the United States Environmental Protection Agency as “USEPA.” We will continue this conversion in future rulemakings as additional sections become open to amendment. We will further convert “EPA” used in federal text to “USEPA,” where USEPA is clearly intended.

The Board has assembled tables to aid in the location of these alterations and to briefly outline their intended purpose. The tables set forth the miscellaneous deviations from the federal text and corrections to the pre-amended base text of the rules in detail. The tables are set forth and explained beginning at page 13 of this opinion. There is no further discussion of most of the deviations and revisions elsewhere in this opinion.

### **Discussion of the Particular Federal Actions Involved in This Docket**

#### **Exclusion of Certain Secondary Materials from the Definition of Solid Waste--Sections 721.104, 726.120, and 728.140**

The USEPA action of July 24, 2002 (67 Fed. Reg. 48393), related to recycling hazardous secondary materials. The covered materials are those used to make zinc fertilizer products. The amendments excluded the secondary materials from the definition of solid waste. The amendments also exclude the fertilizers made from these secondary materials from the definition of solid waste, so long as certain contaminants in the fertilizer remain within specified limits. Exclusion from the definition of solid waste excludes the secondary materials from hazardous waste regulation. USEPA intended the rule to allow the use of zinc-rich dusts from brass foundries and fabricators as substitutes for other feedstocks.

The federal amendments further removed the former exemption from 40 C.F.R. 268.40(i) of the federal land disposal restrictions. USEPA had adopted this as a temporary measure on August 31, 1998 (63 Fed. Reg. 46331), to stay the Phase IV land disposal restrictions (LDRs) as they apply to zinc-containing fertilizers until USEPA developed the more comprehensive set of regulations for the use of hazardous waste in making fertilizers. Persons interested in the details of the federal amendments should consult the July 24, 2002 *Federal Register* notice.

The Board incorporated the July 24, 2002 federal amendments without substantive deviation from the corresponding federal text. The deviations from the text of the federal amendments are restricted to those structural and stylistic changes needed to make the text comport with the *Illinois Register* format and the Board’s preferred style. For example, 40

C.F.R. 261.4(a)(20)(ii)(B)(1) through (a)(20)(ii)(B)(3) were moved to Section 721.104(a)(20)(F)(i) through (a)(20)(F)(iii) and 40 C.F.R. 261.4(a)(20)(ii)(D)(1) through (a)(20)(ii)(D)(3) were moved to Section 721.104(a)(20)(G)(i) through (a)(20)(G)(iii). The *Illinois Administrative Code* codification requirements allow only four indent levels in rules, and these segments of the federal text ran to five indent levels. Another example is that the Board has opted to use only the singular (*e.g.*, “generators and intermediate handlers” in 40 C.F.R. 261.4(a)(20)(ii) is changed to “a generator or intermediate handler” in corresponding Section 721.104(a)(20)(B)). The table that begins on page 13 of this opinion itemizes the various revisions made in the federal text in adapting it into the State regulations.

The Board requested public comment on the incorporation of the July 24, 2002 federal amendments excluding from hazardous waste regulation those secondary materials that are used to make zinc fertilizers and the fertilizers made from those secondary materials. The Agency responded with comments. The Agency agreed that the proposed amendments are consistent with the corresponding federal amendments on which they are based. The Agency expressly withheld comment on the appropriateness of the limits derived by USEPA.

#### **National Treatability Variance for Radioactively Contaminated Batteries--Table T to Part 728**

The USEPA action of October 7, 2002 (67 Fed. Reg. 62618), related to land disposal of radioactively contaminated batteries. On a petition from the federal Department of Energy, USEPA granted a national treatability variance for the contaminated cadmium-, mercury-, and silver-containing batteries by designating new treatments for the batteries. USEPA concluded that the thermal treatment standard specified under the current regulations for cadmium-containing batteries and the roasting and retorting standard for mercury-containing batteries were inappropriate due to resulting radioactive contamination of the recovered metals. USEPA also concluded that the numerical standard for silver-containing batteries was inappropriate due to potential radiation hazards to workers who manually segregate the batteries for treatment. USEPA designated macroencapsulation in accordance with the rules applicable to hazardous debris as treatment prior to land disposal of the three types of radioactively contaminated batteries. Persons interested in the details of the federal amendments should consult the October 7, 2002 *Federal Register* notice.

The Board incorporated the October 7, 2002 federal national treatability variance without substantive deviation from the corresponding federal text. The deviations from the literal text of the federal amendments are restricted to minimal stylistic changes to the treatment standard listings for each of D006, D009, and D011 radioactively contaminated batteries. Those revisions are all listed in the table that begins on page 12 of this opinion.

The Board requested public comment on the incorporation of the October 7, 2002 federal national treatability variance amendments relating to radioactively contaminated cadmium-, silver-, and mercury-containing batteries. The Agency responded with comments. The Agency stated that it supports incorporation of the national treatability variance into the Illinois regulations.

**Minor Corrections to the Hazardous Waste Combustor Rule--Sections 703.205, 703.208, 703.221, and 703.232**

The USEPA action of December 19, 2002 (67 Fed. Reg. 77687), related to the hazardous waste combustor rule. USEPA adopted its original hazardous waste combustor rule on September 30, 1999. The Board incorporated the September 30, 1999 rule into RCRA Subtitle C update docket R00-13. USEPA subsequently amended the hazardous waste combustor rule on July 3, 2001, February 13, 2002, and February 14, 2002. The July 3, 2001 amendments were part of consolidated RCRA Subtitle C and UIC update docket R02-1/R02-12/R02-17. The federal amendments of February 13, 2002 and February 14, 2002 were part of RCRA Subtitle C update docket R03-7. The recent federal action of December 19, 2002, made a limited number of technical corrections to the September 30, 1999 rule and the July 3, 2001, February 13, 2002, and February 14, 2002 amendments.

Most of the December 19, 2002 corrections were to the national emission standards for hazardous air pollutants (NESHAPs) provisions of 40 C.F.R. 63, Subpart EEE. Four other corrections related to cross-references to the NESHAPs contained in the RCRA permit rules of 40 C.F.R. 270. Persons interested in the details of the federal amendments should consult the December 19, 2002 *Federal Register* notice.

The Board incorporated the federal corrections to the hazardous waste combustor rule into the Illinois regulations without substantive deviation. The Board has incorporated the federal NESHAPs of 40 C.F.R. 63, Subpart EEE by reference in the Illinois rules at 35 Ill. Adm. Code 720.111. Thus, the federal amendments to 40 C.F.R. 63, subpart EEE required the Board to merely update the incorporation to include the amendments. The corrections to 40 C.F.R. 270 required amendment of corresponding segments of 35 Ill. Adm. Code 703. Those amendments were limited to adding cross-references to the Notification of Compliance provisions of the NESHAP. The table that begins on page 13 of this opinion itemizes the various revisions made in the federal text in adapting it into the State regulations.

The Board requested public comment on the incorporation of the December 19, 2002 federal corrections to the hazardous waste combustor rule. The Agency responded with comments. The Agency stated that the proposed amendments were consistent with the corresponding federal amendments on which they were based.

**Updated Analytical Methods in 40 C.F.R. 136--Section 720.111**

The USEPA actions of October 23, 2002 (67 Fed. Reg. 65220) and October 29, 2002 (67 Fed. Reg. 65876), related to the Clean Water Act methods for analysis of contaminants in water and waste. The action of October 23, 2002, also related to methods for analysis of contaminants in drinking water under the Safe Drinking Water Act. The October 23, 2002 action was a general update of the various methods for analysis of chemical, microbiological, and radiological contaminants in water. The action of October 29, 2002, updated a single analytical method, USEPA Method 1631E for analysis of mercury in aqueous samples by cold vapor atomic fluorescence spectrometry. Persons interested in the details of the federal amendments should consult the October 23, 2002 and October 29, 2002 *Federal Register* notices.

The Board has amended of the Illinois hazardous waste regulations to incorporate the two sets of federal analytical methods revisions. Both the October 23, 2002 and the October 29, 2002 amendments revised the Clean Water Act methods in 40 C.F.R. 136. Those methods are incorporated into the Illinois hazardous waste regulations by reference in 35 Ill. Adm. Code 720.111. The Board has updated the incorporation by reference to include the October 23, 2002 and October 29, 2002 amendments.

The Board requested public comment on the incorporation of the October 23, 2002 and October 29, 2002 federal amendments. The Agency responded with comments. The Agency stated that the proposed updated incorporation by reference is consistent with the corresponding federal amendments on which it was based.

### **Updated Federal Hazardous Waste Delisting Guidelines--Section 720.111**

A recent public inquiry has raised the issue whether the Board should update the incorporation of a certain federal guidance document by reference into the Illinois hazardous waste regulations. The federal guidance involved relates to delisting hazardous waste, and USEPA has issued an updated version of the guidance since the Board incorporated it into the Illinois rules.

The Illinois regulations at 702.122(a)(2), (c)(2), (e)(2), and the Board note to subsection (l) require the use of the 1993 USEPA guidance document "Petitions to Delist Hazardous Wastes — A Guidance Manual, Second Edition." As a result of follow up to a public inquiry as to what guidance the Board requires, the Board has learned that USEPA headquarters has delegated hazardous waste delisting authority and oversight of state hazardous waste delisting activities to the various USEPA regions. Investigation disclosed that USEPA Region 5, which monitors State administration of the Illinois hazardous waste program, is using different guidance than that required by the Board. It appears that all USEPA regions, including Region 5, are using guidance developed and released in March 2000 by USEPA Region 6. This newer guidance document is entitled "EPA RCRA Delisting Program--Guidance Manual for the Petitioner." Investigation further disclosed that the Region 6 guidance is currently under revision, and USEPA anticipates the release of updated guidance in about a year. The updated guidance may be issued by USEPA headquarters or jointly by the several USEPA regions.

The treatment of federal guidance in the identical in substance rulemaking process poses two major problems for the Board. First, as guidance does not appear in the Code of Federal Regulations, the Board was unaware of issuance of the March 2000 guidance, as it was not brought to the Board's attention by the Agency, the USEPA, or the regulated community. Second, the Board must determine whether the "guidance" has the force of regulation as a matter of practice, or whether it is in fact a reference tool, the use of which is optional. If the use of the guidance is mandatory, the Board must include it in these rules to keep them identical in substance to the federal rules in a way compatible with the Illinois Administrative Procedure Act, 5 ILCS 100/1 *et seq.* (2002). If use of the guidance is truly optional, the Board need not include it in the rules.

For the purposes of this proposal for public comment, the Board has continued to treat the guidance as a mandatory part of the delisting process. The Board proposes to update the federal guidance reference from the 1993 document to the 2000 document in the incorporation by reference in Section 720.111(a) and the references to the guidance in Sections 720.122(a)(2), (c)(2), (e)(2), and the Board note to subsection (l).

If, on the other hand, public comments indicate that USEPA considers the use of the guidance to be optional, the Board would delete the incorporation from Section 720.111 and the four references to the guidance in Section 720.122. The Board would append a note to Section 720.122 directing attention to the latest federal guidance for use in hazardous waste delisting.

The Board requested public comment on the update to the federal guidance for hazardous waste delisting incorporated by reference in 35 Ill. Adm. Code 720.111 and referenced in 35 Ill. Adm. Code 720.122. The Board specifically requested comment as to whether USEPA mandates the use the guidance in delisting hazardous waste or the guidance is merely an optional tool for the State and regulated community to use in delisting. The Agency responded with comments. The Agency stated that it preferred an update to the version of the delisting guidance incorporated by reference. The Agency views the use of the federal guidance as mandatory, so it suggests the incorporation of the appropriate guidance document by reference is mandatory.

After consideration of the comments received, the Board agrees with the Agency. The Board will update the incorporation by reference to include the latest version of the federal delisting guidance, since use of the guidance is not advisory. Of course, this means that the Board will need to update the incorporation once again when USEPA has completed its planned update to the guidance. The Board requests that the Agency, USEPA, or the regulated community bring the release of updated guidance to the attention of the Board as soon as USEPA releases it.

### **Discussion of Corrective Amendments**

The Board has traditionally used the occasion of these identical-in-substance updates to correct segments of the base text of the Illinois regulations. These corrections are almost always non-substantive in effect. The Board is including a significant number of non-substantive corrections in this docket.

When a necessary minor correction comes to the attention of the Board, Board staff makes a note of the correction, and it is set aside until the next opportunity to make the correction. The next opportunity generally presents itself when the section involved is next opened for amendment as a result of amendments to the corresponding federal text. Over the last few years, the Board has cataloged very many changes, but the pace of completing the corrections has been slow, since only a limited number of all the sections involved in the hazardous waste regulations have been the subject of federal amendments. At the rate at which the Board has been able to make the corrections while restricting attention to opened Sections of the regulations, the Board might never be able to complete the corrections.

In the preceding RCRA Subtitle C update docket, RCRA Subtitle C Update, USEPA Regulations (January 1, 2002 through June 30, 2002), R03-7 (Jan. 9, 2003), the Board began including the corrections necessary to some sections that are not already involved in this docket at a result of federal amendments. The Board reviewed the entire text of Parts 703, 705, and 724 and the Board included all the necessary corrections to of which the Board was aware at that time. The Board believes that prompt completion of the corrections benefits the Agency's implementation of the rules and the regulated community.

The Board is continuing this approach in this current docket. The Board has made corrections to four more parts of the regulations: Parts 720, 721, 726, and 728. Thus, after completion of this rulemaking, the Board will have reviewed the entire text of Parts 703, 705, 720, 721, 724, 726, and 728 of the hazardous waste regulations and made whatever corrections the Board has found necessary. The Board will continue this process of making corrections to the text of open parts at a reasonable rate in future RCRA Subtitle C update dockets until all of the corrections are complete to all of Parts 702 through 705, 720 through 726, 728, 733, and 739.<sup>1</sup>

The Board will not discuss particular corrective amendments in this segment of this discussion. The corrections are each itemized in the table that begins on page 16 of this opinion. The Board requests that the Agency, JCAR, and the regulated community review the table and the text of the corrections. The Board requests comment on the corrections. The Board also asks for the assistance of the Agency, JCAR, and the regulated community in this process; the Board requests that they submit suggestions for correction of any errors of which they are aware. The Board will catalog any suggestions relating to parts and sections not already involved in this proceeding for future use.

### **Agency or Board Action**

Section 7.2(a)(5) of the Act requires the Board to specify those portions of the program over which USEPA will retain decision-making authority. Based on the general division of functions within the Act and other Illinois statutes, the Board is also to specify which State agency is to make decisions.

In situations in which the Board has determined that USEPA will retain decision-making authority, the Board has replaced "Regional Administrator" with USEPA, so as to avoid specifying which office within USEPA is to make a decision.

In some identical-in-substance rules, certain decisions pertaining to a permit application are not appropriate for the Agency to consider. In determining the general division of authority between the Agency and the Board, the following factors should be considered:

1. Whether the entity making the decision is applying a Board regulation, or taking action contrary to ("waiving") a Board regulation. It generally takes some form of Board action to "waive" a Board regulation.

---

<sup>1</sup> At this time, the Board has not yet opened Parts 702, 722, 723, 725, 733, or 739 for review.

2. Whether there is a clear standard for action such that the Board can give meaningful review to an Agency decision.
3. Whether the action would result in exemption from the permit requirement itself. If so, Board action is generally required.
4. Whether the decision amounts to “determining, defining or implementing environmental control standards” within the meaning of Section 5(b) of the Act. If so, it must be made by the Board.

There are four common classes of Board decisions: variance, adjusted standard, site-specific rulemaking, and enforcement. The first three are methods by which a regulation can be temporarily postponed (variance) or adjusted to meet specific situations (adjusted standard or site-specific rulemaking). There often are differences in the nomenclature for these decisions between the USEPA and Board regulations.

**Tabulations of Deviations from the Federal text and Corrections to and Clarifications of the Base Text**

Table 1 below list numerous corrections and amendments that are not based on current federal amendments. Table 1 (beginning immediately below) includes deviations made in this final order from the verbatim text of the federal amendments. Table 2 (beginning after table 1 immediately below) contains corrections and clarifications that the Board made in the base text involved in this proposal. The amendments listed in Table 2 are housekeeping amendments not directly derived from the current federal amendments. Table 3 (beginning on page 135 below) is a listing of revisions made to the text of the amendments from that proposed and set forth in the Board’s opinion and order of March 20, 2003. Table 3 indicates the changes made, as well as the source that suggested each of the changes. Table 4 (beginning on page 143 below) indicates suggested revisions that the Board has not made in adopting these amendments. Each entry gives a brief explanation why the Board did not incorporate the suggested change. Some of the entries in these tables are discussed further in appropriate segments of the general discussion beginning at page 6 of this opinion.

Requested Revisions to the Text of the Proposed Amendments Not Made in Final  
Adoption

Section Affected	Source(s) of Request: Requested Revision(s)	Explanation
720.110 “military munitions”	JCAR: Move the comma to change “demolition charges, and devices and components . . .” to “demolition charges and devices, and components . . .”	The placement of the comma exactly follows the federal language, and moving the comma could change the meaning of the text
721.104(a)(20)(F)	JCAR: Change “used to excluded secondary materials” to “used to exclude secondary materials”	This has been corrected at the suggestion of the Agency to the appropriate language: “used to store excluded secondary materials”
726.200(b)(2) Board note	JCAR: Change bracket to parentheses on “the approach . . . as a”	The text in which this appears is a direct quotation, and the bracketed text is a deviation from the literal language quoted
726.203(c)(1)(B)(iii)	JCAR: Removed the hyphen from “726.206-(b) or (e)”	The character perceived as a hyphen is actually an overstruck space correcting “726.206 (b) or (e)” to “726.206(b) or (e)”
726.211(b)(1)	JCAR: Change “the following terms have the meanings given below” to “the following terms have the meanings given in this subsection (b)(1)”	The alternative change selected was “terms have the following meanings”
728.102 “hazardous constituent or constituents”	JCAR: Change the quotation marks on “‘hazardous constituent or constituents’” to “‘hazardous constituent’ or ‘constituents’”	The placement of the quotation marks exactly corresponds with the use of italics for the defined term in corresponding 40 C.F.R. 141.2
728.106(e)(2)	JCAR: Change “the Agency must determine” to “the Agency will determine”	The statement imposes a requirement on the Agency, it does not state present intent
728.109(c)	JCAR: Do not change “shall be land disposed” to “must be land disposed”	The Board has opted to use “must” in place of “shall” in all occurrences

**HISTORY OF RCRA SUBTITLE C AND UIC ADOPTION**  
**ILLINOIS ENVIRONMENTAL PROTECTION AGENCY OR BOARD ACTION**  
**EDITORIAL CONVENTIONS**

It has previously been the practice of the Board to include an historical discussion in its RCRA Subtitle C and UIC identical-in-substance rulemaking proposals. However, in the last RCRA Subtitle C update docket, RCRA Subtitle C Update, USEPA Amendments (July 1, 1999 through Dec. 31, 1999), R00-13 (May 18, 2000), the Board indicated that it would cease this practice. Therefore, for a complete historical summary of the Board's RCRA Subtitle C and UIC rulemakings and programs, interested persons should refer back to the May 18, 2000 opinion and order in R00-13.

The historical summary contains all Board actions taken to adopt and maintain these programs since their inception and until May 18, 2000. It includes a listing of all site-specific rulemaking and adjusted standards proceedings filed that relate to these programs. It also lists all USEPA program authorizations issued during that time frame. As necessary the Board will continue to update the historical summary as a segment of the opinion in each RCRA Subtitle C and UIC update docket, but those opinions will not repeat the information contained in the opinion of May 18, 2000 in docket R00-13.

The following summarizes the history of the Illinois RCRA Subtitle C hazardous waste and UIC programs since May 18, 2000:
