RECOMMENDATION

NOW COMES the ILLINOIS ENVIRONMENTAL PROTECTION AGENCY ("Illinois EPA"), through its attorneys, and pursuant to 35 Ill. Adm. Code 125.204 of the ILLINOIS POLUTION CONTROL BOARD'S ("Board") regulations, files the Illinois EPA's Recommendation in the above-referenced tax certification request of air pollution control facilities. In support thereof, the Illinois EPA states as follows:

- 1. On or after October 20, 2003, the Illinois EPA received a request and supporting information from BLACK BEAUTY COAL COMPANY ("Black Beauty") concerning the proposed tax certification of air pollution control facilities for certain sources and/or equipment located at its Vermilion Grove Portal facility. A copy of the relevant portions of the application is attached hereto. [Exhibit A].
- 2. Additional information concerning the request was sent by mail to the Illinois EPA on November 5, 2003 and by facsimile on November 13, 2003. [Exhibits B and C respectively].
 - 3. The applicant's address is as follows:

Black Beauty Coal Company Attention: Mr. Donald Coovert 5949 Beau Jardine Drive Indianapolis, Indiana 46237

- 4. The air pollution control facilities involved in this request are located at State

 Highway 1, approximately ½ mile northwest of Vermilion Grove, Vermilion County, Illinois and consist of the following:
 - Coal Preparation Facility whose primary purpose is to remove, through a coal washing process, the sulfur and ash from the coal. The coal washing process reduces sulfur dioxide and particulate matter emissions, which are regulated air pollutants.
- 5. Section 11-10 of the Property Tax Code, 35 ILCS 200/11-10 (2002), defines "pollution control facilities" as:
 - "any system, method, construction, device or appliance appurtenant thereto, or any portion of any building or equipment, that is designed, constructed, installed or operated for the primary purpose of: (a) eliminating, preventing, or reducing air or water pollution... or (b) treating, pretreating, modifying or disposing of any potential solid, liquid, gaseous pollutant which if released without treatment, pretreatment, modification or disposal might be harmful, detrimental or offensive to human, plant or animal life, or to property."
- 6. Pollution control facilities are entitled to preferential tax treatment, as provided by 35 ILCS 200/11-5 (2002).
- 7. Based on information in the application and the underlying purpose of the facilities to prevent, eliminate or reduce air pollution, it is the Illinois EPA engineering judgment that the described facilities may be considered as "pollution control facilities" in accordance with the statutory definition and consistent with the Board's regulations at 35 Ill. Adm. Code 125.200.
- 8. Because the described facilities satisfy the aforementioned criterion, the Illinois EPA recommends that the Board issue the applicant's requested tax certification.

Respectfully submitted, ILLINOIS ENVIRONMENTAL PROTECTION AGENCY

RE: Black Beauty Coal Company

Vermilion Grove Portal Preparation Plant

Application for Certification of Pollution Control Facility

(Air) (Property Tax Treatment)

Dear Mr. Sutton:

Enclosed please find an original and one copy of Black Beauty Coal Company's application for certification of its Vermilion Grove Portal Preparation Plant as an air pollution control facility.

Black Beauty has designated Donald Coovert as its representative for purposes of contact and receipt of the certification. Mr. Coovert's address and telephone number appear in the application. Please contact him if you require any further information.

Very truly yours,

David R. doest

Attorney for Black Beauty Coal Company

	General: Separate applications must be completed for each control facility claimed. Do not mix types (water and air). Where both air and water operations are related, file two applications. If attachments are needed, record them consecutively on an index sheet.						
	Sec. A Information refers to applicant as listed in the tax records and the person to be contacted for further details or for inspection of facilities. Define facility location by street address or legal description. A plat map location is required for facilities located outside of municipal boundaries. The property identification number is required.						
	Sec. B	Self-explanatory, Submit copies of all permits issued by local pollution control agencies. (e.g. MSD Construction Permit)					
i	Sec. C	ec. C Refers to manufacturing processes or materials on which pollution control facility is used.					
INSTRUCTIONS	Sec. D Narrative description of the pollution control facility, indicating that its primary purpose is to eliminate, prevent or reduce pollution. State the type of control facility. State permit number, date, and agency Issuling permit. A narrative description and a process flow diagram describing the pollution control facility. Include a listing of each major piece of equipment included in the daimed fair cash value for real property. Include an average analysis of the influent and effluent of the control facility stating the collection efficiency.						
	Sec. E	List air contaminants, or water pollution substances released as effluents to the manufacturing processes. List also the final disposal of any contaminants removed from the manufacturing processes, Item (1) – Refers to pollutants and contaminants removed from the process by the pollution control facility. Item (2) – Refers to water pollution but can apply to water-camed wastes from air pollution-control facilities. Submit drawings, which clearly show (a) Point(s) of discharge to receiving stream, and (b) Sewers and process piping to and from the control facility. Item (3) – If the collected contaminants are disposed of other than as wastes, state the disposition of the materials, and the value in dollars reclaimed by sale or reuse of the collected substances. State the cost of reclamation and related expense. Item (4) – State the date which the pollution control facility was first placed in service and operated. If not, explain, Item (5) – This information is essential to the certification and assessment actions. This accounting data must be completed to activate project review prior to certification by this Agency.

Riola Mine Complex Vermilion Grove Portal Preparation Plant

Black Beauty Coal Company's Riola Mine Complex-Vermilion Grove Portal Preparation Plant started processing coal in the fall of 2001. The preparation facilities include raw storage facilities, a 600-ton per hour preparation plant, processed coal storage facilities, coarse and fine refuse storage areas, and truck and train loadout facilities.

The feed for the preparation plant is produced from the Riola Mine Complex-Vermilion Grove Portal underground mine and stored in a 100,000-ton raw stockpile area. Eight reciprocating feeders reclaim coal from the stockpile for conveyance to a 8'x16' scalping screen for size separation. The raw coal is separated at 2 ½ inches. The oversize material is sent to a crusher to reduce the largest size to 2 ½ inches. The crushed material is then remixed with the undersize material from the scalping screen and conveyed to the preparation plant.

The preparation plant raw coal feed is screened with (2) 6'x20' double deck screens to separate the material at 1mm. The oversize (coarse) material is pumped to (2) 33" heavy media cyclones for gravity separation with the use of magnetite. The clean coal product from the heavy media cyclones is dewatered with (2) 8'x20'double deck vibrating screens and (2) VC-50 centrifugal dryers. The refuse (non-coal material) from the heavy media cyclones is dewatered with a 8'x16' double deck screen and 7'x60°x60°R sieve bend. After dewatering, the material is conveyed to the coarse refuse bin.

The undersize (fine) material from the plant feed is pumped to (6) 15" classifying cyclones where the material is separated at 100m. The oversize material is sent to (8) triple start spirals for fine coal separation. The clean coal from the spirals is dewatered with (2) 6'x45°x80°R sieve bends and (1) 40"x72"screen bowl centrifuge. The refuse from the triple start spirals is sent to a 4'x12' dewatering screen and conveyed to the coarse refuse bin. The undersize material from the classifying cyclones is sent to a thickener where flocculants are added to separate the solids from the water. The solids are processed through a belt press to remove excess water and conveyed to the fine refuse bin. The clarified water is reused in the preparation process.

The processed coal is conveyed to a clean coal storage area prior to loading into trucks or rail cars. Front endloaders are used to load the highway trucks for delivery to the customer. Rail car loading is accomplished by conveying the stockpiled coal to a 4,000 ton per hour batch weigh system.

The reject material from the coarse and fine refuse bins is hauled by large off road trucks to a nearby disposal site.

RE: Black Beauty Coal Company
Vermilion Grove Portal Preparation Plant
Addendum to Application for Certification of Pollution Control Facility
(Air) (Property Tax Treatment)

Dear Mr. Sutton:

On October 20, 2003, Black Beauty Coal Company submitted an Application for Certification of Pollution Control Facility for its Vermilion Grove Portal Preparation Plant. After submission of this application to your office, it was determined that Section E(5) on Page 2 was Inadvertently omitted.

Our office spoke with Mr. Anatoly Belogorsky of the Illinois Environmental Protection Agency, Division of Air Pollution Control, on November 5, 2003 and he instructed us to submit an addendum to the application.

Enclosed is the original and one copy of the addendum correcting Section E(5) on Page 2 of the previous submitted application. If you have any questions, please do not hesitate to call.

Very truly yours,

David R. Joest

Floyd:

You should have three pollution control facility certification applications from Peabody Energy for prep. plants operated by two subsidiaries. The identifying information along with the property identification numbers you need the summarised below:

	#_	# 2	
Appl. Dre Subsidiary	10/14/03	(0/20/03	10/20/03
JUDS (dIALY	ALCIAL	BlackBeauty	BlackBeauty
Facility Name	Willowlike	Riola Pottal	Vermilion Grove
County	Saline	Vermilion	Vermilion
Ser, Twp, Rge	1,95,7€	33,18N,12W	13, (7 N, 12W
F C. VAlue	3,500,110	363,222	3,875,675
Prop I J #	09-01-300-001-0030	27-33-200-004-8068	32,13-100-014-0060

Please confirm receipt of this information and that you have all three applications by calling my toll fire cell phone @ 888/270-3973, Also, let me know if you need any further information.

Thanks for your help.
