Narrative Inspection Report

I conducted an open dump complaint inspection of the above referenced facility on March 8, 2004. This inspection was conducted to determine the regulatory status and evaluate compliance with the Environmental Protection Act (Act) and Title 35 Illinois Administrative Code, Subtitle G: Land Pollution (Regulations). The weather was cloudy and dry, with temperatures in the 40s. Eleven photos were taken during the visit.

Champaign FOS received a complaint alleging Mr. Tim Walker was bringing waste to his property to dump and burn. I received a call on the morning of March 8, 2004 alleging dark, black smoke was seen over the weekend coming from the Walker property.

Background

The site is located at 3610 Christmas Tree Road east of Richland Community College and west of Lake Decatur. The site is actually two connected properties. The first is the home of Mr. Walker located down a gravel lane and across a small stream. The second consists of an unoccupied house and meadow.

I last inspected the site on August 13, 2003 at the request of the Macon County Solid Waste Department (MCSWD). The property is a salvage yard that at the time bordered on being an open dump (one area did have open dumped plaster). I spoke with Mr. Walker at length regarding how a legitimate salvage yard should operate, with emphasis on 1) making sure only recyclable materials were accepted, 2) material was sorted and treated as a valuable commodity and 3) material left the site to a scrap dealer on a regular basis. We also discussed proper disposal of landscape wastes at the time. Mr. Walker admitted his brother had a landscaping business, but denied any of the landscape waste on his property came from his business.

MCSWD looked up the property information at the Recorder's Office in their building and Mr. Tim Walker confirmed he owned the property. An ACWN was sent for open dumping the plaster material on September 22, 2003, but Mr. Walker did not pick up the letter at the post office. I later hand delivered the letter on November 6, 2003.

Current Inspection

I arrived at the site at approximately 1:35 and drove down a gravel drive, veered around the vacant house at the front of the property and entered a meadow behind the house. I immediately observed smoke coming from an area farther east. Near the west side of the meadow I saw a large pile of landscape waste with metal fence posts mixed with the load (see photos 1,2, and 10). The pile also contained a pallet, wooden furniture, charred metal chair, and charred propane gas cylinder. This area is denoted as the large landscape waste pile on the attached site sketch. Since the property did not have any metal fence posts during my last visit, I strongly suspect this load of landscape waste came from off-site.

The property still contained a large pile of metal that looked basically the same as during my last visit, although I did see a mattresses dumped near the pile (see photos 4,5 and 9).

The pile the farthest east consisted of a several burned logs and branches with what looked like the bead from the remains of two tires. Photo 7 includes a photo of a tire rim and bead, while photo 8 shows bead wire through the smoke coming from the pile.

I also took one photo of the yard near the vacant house. The yard was strewn with aluminum siding that had been stacked during my last visit. Recent strong winds had blown the material off the shelves.
