STATE OF ILLINOIS
Pollution Control Board

INFORMATIONAL NOTICE !!!

AC 04-66

IT IS IMPORTANT THAT YOU READ THE ENCLOSED DOCUMENTS.

NOTE: This Administrative Citation refers to TWO separate State of Illinois Agencies. One is the **ILLINOIS POLLUTION CONTROL BOARD** located at State of Illinois Center, 100 West Randolph Street, Suite 11-500, Chicago, Illinois 60601. The other state agency is the **ILLINOIS ENVIRONMENTAL PROTECTION AGENCY** located at: 1021 North Grand Avenue East, P.O. Box 19276, Springfield, Illinois 61794-9276.

If you elect to contest the enclosed Administrative citation, you must file a **PETITION FOR REVIEW** with **thirty-five (35) days** of the date the Administrative Citation was served upon you. Any such Petition for Review must be filed with the clerk of the Illinois Pollution Control Board by either hand delivering or mailing to the Board at the address given above. A copy of the Petition for Review should be either hand-delivered or mailed to the Illinois Environmental Protection Agency at the address given above and should be marked to the **ATTENTION: DIVISION OF LEGAL COUNSEL.**

JURISDICTION

This Administrative Citation is issued pursuant to the authority vested in the Illinois Environmental Protection Agency by Section 31.1 of the Illinois Environmental Protection Act, 415 ILCS 5/31.1 (2002).

FACTS

1. That Curry Ready-Mix & Builder's Supply, Inc. ("Respondent") is the present owner and operator of a facility located at 3600 N. Dirksen Parkway, Springfield, Sangamon County, Illinois. The property is commonly known to the Illinois Environmental Protection Agency as Springfield/Curry Ice & Coal.

2. That Curry Ice & Coal of Springfield, Inc. ("Respondent") is the generator and transporter of the waste that was dumped onto the property.

2. That said facility is an open dump operating without an Illinois Environmental Protection Agency Operating Permit and is designated with Site Code No. 1671205697.

3. That Respondent has owned and operated said facility at all times pertinent hereto.

4. That on March 3, 2004, Richard C. Johnson of the Illinois Environmental Protection Agency's Springfield Regional Office inspected the above-described facility. A copy of his

inspection report setting forth the results of said inspection is attached hereto and made a part hereof.

VIOLATIONS

Based upon direct observations made by Richard Johnson during the course of his March 3, 2004 inspection of the above-named facility, the Illinois Environmental Protection Agency has determined that Respondent has violated the Illinois Environmental Protection Act (hereinafter, the "Act") as follows:

- (1) That Respondent caused or allowed the open dumping of waste in a manner resulting in litter, a violation of Section 21(p)(1) of the Act, 415 ILCS 5/21(p)(1) (2002).

CIVIL PENALTY

Pursuant to Section 42(b)(4-5) of the Act, 415 ILCS 5/42(b)(4-5) (2002), Respondent is subject to a civil penalty of One Thousand Five Hundred Dollars (\$1,500.00) for each of the violations identified above, for a total of One Thousand Five Hundred Dollars (\$1,500.00). If Respondent elects not to petition the Illinois Pollution Control Board, the statutory civil penalty specified above shall be due and payable no later than March 1, 2004, unless otherwise provided by order of the Illinois Pollution Control Board.

If Respondent elects to contest this Administrative Citation by petitioning the Illinois Pollution Control Board in accordance with Section 31.1 of the Act, 415 ILCS 5/31.1 (2002), and if the Illinois Pollution Control Board issues a finding of violation as alleged herein, after an adjudicatory hearing, Respondent shall be assessed the associated hearing costs incurred by the Illinois Environmental Protection Agency and the Illinois Pollution Control Board. Those hearing costs shall be assessed in addition to the One Thousand Five Hundred Dollar (\$1,500.00) statutory civil penalty for each

violation.

Pursuant to Section 31.1(d)(1) of the Act, 415 ILCS 5/31.1(d)(1) (2002), if Respondent fails to petition or elects not to petition the Illinois Pollution Control Board for review of this Administrative Citation within thirty-five (35) days of the date of service, the Illinois Pollution Control Board shall adopt a final order, which shall include this Administrative Citation and findings of violation as alleged herein, and shall impose the statutory civil penalty specified above.

When payment is made, Respondent's check shall be made payable to the Illinois Environmental Protection Trust Fund and mailed to the attention of Fiscal Services, Illinois Environmental Protection Agency, 1021 North Grand Avenue East, P.O. Box 19276, Springfield, Illinois 62794-9276. Along with payment, Respondent shall complete and return the enclosed Remittance Form to ensure proper documentation of payment.

If any civil penalty and/or hearing costs are not paid within the time prescribed by order of the Illinois Pollution Control Board, interest on said penalty and/or hearing costs shall be assessed against the Respondent from the date payment is due up to and including the date that payment is received. The Office of the Illinois Attorney General may be requested to initiate proceedings against Respondent in Circuit Court to collect said penalty and/or hearing costs, plus any interest accrued.

PROCEDURE FOR CONTESTING THIS
ADMINISTRATIVE CITATION

Respondent has the right to contest this Administrative Citation pursuant to and in accordance with Section 31.1 of the Act, 415 ILCS 5/31/1 (2002). If Respondent elects to contest this Administrative Citation, then Respondent shall file a signed Petition for Review, including a Notice of Filing, Certificate of Service, and Notice of Appearance, with the Clerk of the Illinois Pollution Control Board, State of Illinois Center, 100 West Randolph, Suite 11-500, Chicago, Illinois 60601. A copy of said Petition for Review shall be filed with the Illinois Environmental Protection Agency's Division of Legal Counsel at 1021 North Grand Avenue East, P.O. Box 19276, Springfield, Illinois 62794-9276. Section 31.1 of the Act provides that any Petition for Review shall be filed within thirty-five (35) days of the date of service of this Administrative Citation or the Illinois Pollution Control Board shall enter a default judgment against the Respondent.

ILLINOIS ENVIRONMENTAL PROTECTION AGENCY

AFFIDAVIT

IN THE MATTER OF:)
)
 Illinois Environmental)
 Protection Agency.)
)
 vs.)
)
 Curry Ice & Coal Companies,))
)
 Respondent.)

IEPA DOCKET NO.

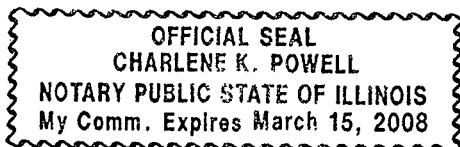

Affiant, Richard C. Johnson., being first duly sworn, voluntarily deposes and states as follows:

1. Affiant is a field inspector employed by the Division of Land Pollution Control of the Illinois Environmental Protection Agency and has been so employed at all times pertinent hereto.
2. On March 3, 2004 between 10:00 AM and 11:00 AM, Affiant conducted an inspection of a disposal site operated without an Illinois Environmental Protection Agency permit, located in Sangamon County, Illinois, and known as Springfield/Curry Ice & Coal by the Illinois Environmental Protection Agency. Said site has been assigned site code number LPC# 1671205697 by the Illinois Environmental Protection Agency.
3. Affiant inspected said Springfield/Curry Ice & Coal open dump site by an on-site inspection which included walking and photographing the site.
4. As a result of the activities referred to in paragraph 3 above, Affiant completed the Inspection Report form attached hereto and made a part hereof, which, to the best of Affiant's knowledge and belief, is an accurate representation of Affiant's observations and factual conclusions with respect to said Springfield/Curry Ice & Coal open dump.

 Richard C. Johnson.

Narrative

LPC #1671205697 – Sangamon County
Springfield/Curry Ice & Coal
Date of Inspection: March 3, 2004
Prepared by: Rich Johnson, DLPC/FOS, Springfield Region
FOS File *RCJ*

RECEIVED
APR 08 2004
IEPA-DLPC

I conducted a reinspection of Curry Ice & Coal (Curry) on March 3, 2004. Accompanying me on the inspection was Mr. Dave Jansen, Bureau of Land/Field Operation Section/Springfield Region. Mr. Jansen had been in contact with Mr. Bruce Garner of Curry who had indicated that the water previously observed in the excavated pit was gone. We were onsite to see what, if any, changes had occurred in the large excavation located along the west side of the north parking lot at the facility. No one from Curry was met and interviewed at the time of the inspection. I last inspected the site on February 5, 2004.

We arrived at about 10:00 am. It was about 45° F, cloudy, and the soil was wet.

The western portions of the pit were covered with ponded water (see photographs 1, 2, 3, 4, 5, 8, 9 and 10). Because of the mud in the pit, a determination was not made as to the total depth of the water. The floor of the pit along the eastern region was higher than the western region, which resulted in it not accumulating ponded water. It was estimated that the largest area of ponded water was about 203 by 135 feet. If an assumption is made that the area is square, and the water in the pond is uniformly 6 inches deep, than about 102,257 gallons water were present. Two smaller pools of water were also observed, but were considered smaller and shallower than the large pond.

No groundwater or stormwater was observed flowing into the pit at the time of the inspection. However, the bottom half of the pit's northeast sidewall was moist, and it is suspected that the moisture is caused by groundwater (see photo 11). A small flow of groundwater had been noted in the northeast corner of the pit on previous inspections.

The muddy conditions of the floor showed what appeared to be all-terrain vehicle tracks in the southwest region of the pit (see photo 1). The only other tracks noted in the excavation were footprints that Mr. Jansen and I added. There was no sign of pumps or trucks being in the excavation.

Near the northwest region of the excavation was an area of moist, white material on the floor. This material is ADM bed ash that had been deposited last year to help soak up a wet area. Curry is interested in disposing the ADM bed ash in the pit in the future to generate revenue. One of the characteristics of the bed ash is its absorbent properties. Reportedly, once the ash dries out it becomes as hard as concrete. What was found during the inspection is that the ADM bed ash, after it experiencing wet and dry cycles, breaks

down from a hardened state into a mud-like consistency. Photos 12 and 13 show our footprints in the moist, soft bed ash.

At the southwest edge of the north parking lot are piles of ADM bed ash (see photo 21). The stockpiled ash is surrounded on the north, south and east sides by a small un-compacted earthen berm. Truck tire prints in the southeast region of the berm indicate one or more trucks had run over the soil, flattening the berm (see photo 21).

North of the ADM ash was a hardened white to gray material along the east edge of the pit (see photos 5 and 6). The material appeared to have been dumped as a liquid and had flowed from the edge of the excavation down the sidewall. From its coloration and its changing from a liquid to a solid state, the material is believed to be concrete or cement cleaned out of a truck.

A ditch, and part of an earthen berm along the east edge of the pit, help divert stormwater from entering the excavation. In the north parking lot near the southeast corner of the excavation is a stormwater drain that carries the water south toward an intermittent creek in a wooded area. Photo 15 shows the drain inlet for the water, and photo 15 and 16 show a straw bale dike set up to filter out sediment from getting into the inlet. I walked to the end of the outlet pipe (see photo 14) located in the woods to the south. There didn't to be any recent discharges from the pipe, as determined by inspecting the erosion channel below the pipe outlet. I continued to inspect the wooded area west of the pipe and near the creek. Walking along the creek to the west, I didn't see any evidence that would suggest a recent flow of water or sediment coming from the pit.

During the inspection we observed the fueling station located at the north parking lot near the southeast corner of the excavation. It was noted that there were some staining of the 2 concrete pads where the Curry trucks park to pump diesel fuel (see photo 17). We then observed a dark stain on the gravel south of a concrete pad located north of the pumps (see photo 18). The concrete pad covers an underground tank for diesel. Stained gravel was also observed on the east and north sides of the pad (see photo 19), though dark stains were not evident on top of the concrete. Finally, a large stain on the gravel was observed east and south of the pumps (see photo 20). From the location and configuration of the stain it appeared that fuel had been allowed to overflow from a pump, or from a saddle tank on a truck. A strong diesel smell was detected in the area directly adjacent to the fueling station, and in the stained gravel. If the fuel had continued flowing south and east, it would have eventually reached the creek. The stained gravel indicated it had not reached the creek. Hazardous and special waste determinations will be needed before any stained gravel and/or soil can be removed for proper disposal.

There remains a small amount of black material on the west side of the northern parking lot. The black material is coal that was dislodged from the back of Curry's dump trucks. Curry hauls coal from the Turriss Coal mine near Elkhart, Illinois to CWLP (among other customers) on a daily basis.

During the previous inspection of the site, two plastic tanks were filled with a light bluish green liquid. This material is reportedly calcium chloride, which is used by the truck drivers to spread onto the truck beds to prevent icing. The tanks of material remain in the southeast region of the north parking lot.

We proceeded to inspect the rest of the north parking lot. Several piles of waste were observed during the current inspection in the northeast and eastern regions of the parking lot. It appears that the wastes are partly generated from the truck drivers bringing back materials in their truck that are emptied out before another load of material can be picked up.

Photo 22 was taken of a pile of what appeared to be broken drywall located in the northeast region of the north parking lot. Walking south from the northeast region, more piles of assorted general refuse were found. Photos 23, 24 and 25 are of different piles of waste found in the northeast/eastcentral region of the north parking lot. Photo 23 and 25 show a discarded metal hoist, abandoned hard piping, a used tire, a chain-link fence, a crushed metal 55-gallon drum, etc. Photo 24 shows what may be more broken drywall or gypsum. Further south of these piles was a pile of wood pallets, and near the southeast corner of north parking lot was a large metal tank on its side (see photo 26). The tank was empty except for a small amount of water and rusty scale, and it was observed to have several corrosion holes in it. A pile of general refuse was setting on the ground east of the tank (see photo 27). In the pile were heavy rubber hoses, metal scrap, concrete, wood and some soil.

Northeast of the metal tank were two trailers parked along the east property line. Between the two trailers were scattered pieces of wood, some heavy plastic sheets that may be some type of mud guard for the trucks, and a couple of used tires. Not pictured, but observed discarded on the south slope of the creek, were 2 used tires, wood, and other debris. This waste appeared to have been dumped down the slope from the northeast corner of the south parking lot.

We left the site at 11:00 am. Apparent violations noted at the time of the inspection are included in the checklist.
