RECOMMENDATION

The Illinois Environmental Protection Agency ("Illinois EPA") hereby files its Recommendation pursuant to Section 125.204 of the regulations of the Illinois Pollution Control Board, 35 Ill. Adm. Code 125.204.

1. On November 22, 2005, , the Illinois EPA received a request from The Andersons Agriservices, Inc.-Champaign (log number TC-13-06, Exhibit A) for an Illinois EPA recommendation regarding the tax certification of water pollution control facilities pursuant to 35 Ill. Adm. Code 125.204.
2. The applicant's address is: The Andersons Agriservices, Inc.
3515 N. Staley
P.O. Box 6659
Champaign, Illinois 61826
3. The proposed water pollution control facilities in this request are located at SE ¼ of Section 29, T20N, R8E of the 3rd P.M. in Champaign County, at the above street address and consist of the following:

Agrichemical containment structures consisting of seven dry fertilizer operational containment structures and the portion of the building over three dry fertilizer operational containment structures as approved under the Agency endorsed Agrichemical Facility Permit No. 01116848 (Log Nos. 01116848 and 05098346).

These facilities collect, transport, and store agrichemical rinsates, residues or washwaters prior to reuse or disposal, and are further described in Exhibit A.

4. Section 11-10 of the Property Tax Code, 35 ILCS 200/11-10 (2004), defines “pollution control facilities” as:

“any system, method, construction, device or appliance appurtenant thereto or any portion of any building or equipment, that is designed, constructed, installed or operated for the primary purpose of: (a) eliminating, preventing, or reducing air or water pollution ...or (b) treating, pretreating, modifying or disposing of any potential solid, liquid or gaseous pollutant which if released without treatment, pretreatment modification or disposal might be harmful, detrimental or offensive to human, plant or animal life, or to property.”
5. Pollution control facilities are entitled to preferential tax treatment, 35 ILCS 200/11-5.
6. Based on the information in the application and the purpose of the facilities, it is the Illinois EPA’s engineering judgment that the described facilities may be considered “pollution control facilities,” pursuant to 35 Ill. Adm. Code 125.200(a), with the primary purpose of eliminating, preventing, or reducing water pollution, or as otherwise provided in 35 Ill. Adm. Code 125.200, and are eligible for tax certification from the Board.

WHEREFORE, the Illinois EPA recommends that the Board issue the

requested tax certification.

SIGNATURE				
	Signature		Title	
Sec. G	INSTRUCTIONS FOR COMPILING AND FILING APPLICATION			
	General: Separate applications must be completed for each control facility claimed. Do not mix types (water and air). Where both air and water operations are related, file two applications. If attachments are needed, record them consecutively on an index sheet.			
Sec. A	Information refers to applicant as listed in the tax records and the person to be contacted for further details or for inspection of facilities. Define facility location by street address or legal description. A plat map location is required for facilities located outside of municipal boundaries. The property identification number is required.			
Sec. B	Self-explanatory. Submit copies of all permits issued by local pollution control agencies. (e.g. MSD Construction Permit)			
Sec. C	Refers to manufacturing processes or materials on which pollution control facility is used.			
Sec. D	Narrative description of the pollution control facility, indicating that its primary purpose is to eliminate, prevent or reduce pollution. State the type of control facility. State permit number, date, and agency issuing permit. A narrative description and a process flow diagram describing the <u>pollution control facility</u> . Include a listing of each major piece of equipment included in the claimed fair cash value for real property. Include an <u>average</u> analysis of the influent and effluent of the control facility stating the collection efficiency.			
INSTRUCTIONS	Sec. E List air contaminants, or water pollution substances released as effluents to the manufacturing processes. List also the final disposal of any contaminants removed from the manufacturing processes. Item (1) - Refers to pollutants and contaminants removed from the process by the pollution control facility. Item (2) - Refers to water pollution but can apply to water-carried wastes from air pollution control facilities. Submit drawings, which clearly show (a) Point(s) of discharge to receiving stream, and (b) Sewers and process piping to and from the control facility. Item (3) - If the collected contaminants are disposed of other than as wastes, state the disposition of the materials, and the value in dollars reclaimed by sale or reuse of the collected substances. State the cost of reclamation and related expense. Item (4) - State the date which the pollution control facility was first placed in service and operated. If not, explain. Item (5) - This information is essential to the certification and assessment actions. This accounting data must be completed to activate project review prior to certification by this Agency.			
	Sec. F	Self-explanatory. Signature must be a corporate authorized signature.

David,

I'm faxing to you a copy of the information you requested. We have included a list of the assets that should be included in the certification which are the containment pads around the domes and the building that contains the loadout area and containment. We are not requesting the certification of the domes.

Please call me if you have questions on this.

Sincerely,

Terry Owczarzak

Permittee: The Andersons PO Box 119 Champaign, IL 61286	Facility ID Number: AC0192360000 Facility Location: Champaign, IL
Permit #: AC01116848 Facility Type: Commercial: Retail Dealer Date Issued: February 22, 2002	Log Number: 01116848 Date Received: November 27, 2001 Expiration Date: February 22, 2007

Permit is hereby granted to the above designated permittee to construct and operate an agrichemical containment facility as follows:

BULK DRY FERTILIZER STRUCTURES

Operation of an existing bulk dry fertilizer storage building measuring 133' (diameter) with an estimated total storage capacity of 13,500 tons.

Operation of an existing bulk dry fertilizer storage building measuring 133' (diameter) with an estimated total storage capacity of 13,500 tons.

All bulk dry fertilizer shall be stored within the herein permitted structures.

Operation of an existing reinforced concrete operational containment structure measuring 30' (width) x 72' (length). The unloading of bulk dry fertilizer transportation and application equipment shall be performed upon the herein permitted structure.

Operation of an existing asphalt operational containment structure with the greatest dimension measuring 114' (width) x 136' (length). The conveyor transfer of bulk dry fertilizer to the bulk dry fertilizer storage building shall be performed upon the herein permitted structure.

Operation of an existing asphalt operational containment structure measuring 50' (width) x 155' (length). The conveyor transfer of bulk dry fertilizer from the unloading containment structure to the bulk dry fertilizer bulk dry fertilizer storage buildings shall be performed upon the herein permitted structure.

Operation of an existing asphalt operational containment structure measuring 19' (width) x 103' (length). The conveyor transfer of bulk dry fertilizer from the unloading containment structure to the bulk dry fertilizer storage buildings shall be performed upon the herein permitted structure.

David,

I'm faxing to you a copy of the information you requested. The assets that we are recommending to be included in the Agrichemical Containment Permit are the asphalt and concrete containment structures around the domes, the building that contains the loadout area and containment and that portion of the building over the unloading and loading structures. We are not requesting the certification of the domes. The total cost of the structures that we are recommending to be certified under the Agrichemical Facility Permit is \$432,394.64.

Please call me if you have questions on this.

Sincerely,

Terry Owczarzak
