## Narrative

### General Remarks

On June 30, 2006, Chris Cahnovsky and I went to Greenville, Illinois to conduct an inspection at this site. This site is a permitted landfill operating under permit number 1993-188-LF Mod #27. The weather was rainy, wet and the temperature was 70° degrees F. Sharron Hughes, scale house operator was not present during this inspection. Filling in for Ms. Hughes was Jennifer Bradley. Also present were Greg Dolliger, Bob London and Environmental Manager, Tim Curry.

### Inspection

When we arrived we met with Jennifer Bradley, scale house operator. Ms. Bradley presented required paperwork documenting operations at this facility. Most of the documentation appeared to be in order. The leachate log appeared incomplete with entries ended on May 24, 2006. The special waste log also appeared incomplete with entries ending on April 28, 2006. A methane gas monitor and fire extinguisher were observed in the scale house and appeared to be in working order. It appears that this facility is receiving an average of 250 tons of waste per day.

After reviewing Bond County Landfill's required documentation, we met with Greg Dolliger and Bob London. Mr. Dolliger explained that Tim Johnson, Bond County Landfill's certified operator had been transferred to the State of Georgia approximately two weeks before this inspection. Mr. Dolliger also explained that his facility was using tarps for their daily refuse cover and had not received any unpermitted waste.

This site is taking their leachate to the Greenville waste water treatment plant (WWTP). Allied Waste of Greenville, Illinois transports the leachate under special waste haulers permit #0437. Allied Waste uses a pump truck to load the leachate from their leachate receptacles and then transports the leachate to a manhole located on the northeast part of this site. The leachate is then transport via sewer main to the Greenville WWTP. Approximately 8,000 to 12,000 gallons of leachate are removed from this facility per day. The leachate log was completed up to May 24, 2006. The leachate tank locks were locked and appeared to be in good condition. This facility has a water pollution sewer connect permit#, 2005-EP-3622, which expires on April 30, 2010.

After discussing this site's leachate disposal operations, we went to the eastern slope of Phase one, two and three A. This slope had several erosion ditches and leachate seeps. The leachate seeps appeared brown or black in color. Some of the leachate seeps were bubbling. We then went to the western side of Phase one, two and three A. Several erosion ditches were observed on the side slope of this area. Exposed refuse was also observed on this side slope.

We walked to the top of this western slope and observed several areas of exposed refuse on this slope. The area on top of these slopes contained another leachate seep and we observed another area of exposed refuse. These leachate seeps were documented in the daily landfill inspection logs. The log began documenting the leachate seeps on May 15, 2006. I observed a non-functional aeration unit in the leachate lagoon. It appears that the aeration unit had an electrical short and had not been operational for two to three weeks.

We then went to the service garage located on the southeastern edge of this facility and viewed Cell Phase three B. This Cell contains the Active Face of this landfill. Several trucks were observed unloading residential trash. No litter was observed around or outside of the permitted landfill boundary. Windscreens were in place on the active face during this inspection.

During this time we waited for Tim Curry, Allied Waste's Environmental Manger to arrive. I observed a methane monitor within the garage. This monitor appeared to be in working order. When Mr. Curry arrived, we toured the areas of concern with respect to the leachate seeps, erosion and exposed refuse. Mr. Curry explained that a large rain occurred approximately one week after the seeding and produced the aforementioned erosion ditches. Mr. Curry assured us that these concerns would be addressed and corrected as soon as time permitted.

During this part of the inspection, Chris Cahnovsky and Tim Curry discussed the aforementioned issues and their discussion went as follows: Mr. Curry was asked about the exposed refuse on the top of the landfill. According to Mr. Curry, this portion of the landfill was overfilled by the previous owner. Bond County Landfill began to relocate this waste in February or March 2006. About 20,000 cubic yards were relocated to the active area. The exposed refuse resulted from these relocation activities. Trucks made ruts and turned up the soil and exposed the refuse. Mr. Curry stated that they would immediately cover the exposed refuse and leachate seep with six inches of intermediate cover. After meeting with Mr. Curry, we left the site.

On July 25, 2006, I checked with IEPA staff as to prior conduct certification for the operators of this site. The IEPA database did not contain any information pertaining to prior certification for any operators at this site. On this day, I also spoke with Tim Curry via phone. According to Mr. Curry, Mr. Johnson is still employed by Allied Waste and is working at another work location in Georgia.

During this inspection, several apparent violations of the Illinois Environmental Protection Act, 35 Illinois Administrative Code Requirements Subtitle G. and Bond County Landfill's facility Permit #1993-188-LF Mod #27 were observed. These violations are listed below:

- **21(d)(1)**
- **21(d)(2)**

- **21(o)(5)**
- **745.201**
- **811.313(c)**
