**RE: Proposed Amendments to Dissolved Oxygen Standard
35 ILL. ADM.CODE 302.206
Pollution Control Board Rule R04-25**

Dear Ms Gunn:

The Village of Addison would like to record its support for the Illinois Association of Wastewater Agency (IAWA), petition R04-25.

We have followed the hearings closely and feel that the evidence supports the position of the IAWA as originally filed. The IAWA petition would establish a dissolved oxygen water quality standard that is protective of the states surface waters and biological resources. We feel that the petition is founded in good science and is attainable in the least disturbed water systems. The IAWA position would establish a seasonal dissolved oxygen standard that is protective of early live stages of fish, aquatic insects and benthic organisms and establish a minimum concentration of 3.5 mg/L, which is more protective than suggested in the USEPA National Criteria Document.

We do not agree with the position supported by the Illinois Department of Natural Resources and the Illinois Environmental Protection Agency. The agencies have not proven the case for their proposed oxygen concentrations in surface waters. The data show that adoption of the agency proposed dissolved oxygen concentrations would continue a water quality standard that is unattainable even in the least disturbed surface water systems. We especially are opposed to the establishment of river segments held to a different standard with out the evidence to justify such a designation.

We encourage the Board to adopt the IAWA petition R04-25 as filed.

Sincerely,
VILLAGE OF ADDISON

Gregory J. Brunst
