Pollution Control Board

Dear Members

I am writing to strongly support the decision of the Peoria County Board to deny the expansion of Peoria Disposal Co.'s hazardous toxic waste landfill. I am also doing so on behalf of my children and grandchildren who will have to live with this problem well into the future. I think that is really what has gotten our local residents so upset.

I would like to recount a personal experience I had last summer while in Wisconsin. There was an article in the Green Bay paper which dealt with cleaning up PCBs from the Fox River. The article took great delight in saying the hazardous material wouldn't be a problem anymore as it would be taken out of state to a toxic dump in Peoria Illinois. Wisconsin does a great job of pushing that it is a "green state" evidently at our expense. They take our money as tourists and send back their "crap". Please take pride in our State and say "enough is enough".

Very truly yours
