PC#225

To - Illinois Pollution Control Board

Please deny Peoria Disposal Co a permit to expand its Peoria County hazardous toxic waste land fill,

The weight of the toxic waste already dumped in this landfill plus the weight of the bulk baggers packing it down no doubt has already caused tears in the plastic liners and toxic will leak thru the clay soil. If this has not already happened it will without a shadow of a doubt 500 years or less from now.

So what are we going to say then?

Sorry we didn't think of that.

What a dumb answer

A toxic waste landfill should be located where there are no under ground aquifers.
