To the Public Comment File, Case 2006-184:

In reading the web postings for this case, I saw that the May 17th deadline for a determination has been postponed for what was termed considerations of a "global settlement." I would like to point out that there have been no public meetings and there is no information available to the public regarding a "global settlement." The local siting act requires public participation. A settlement of a local siting case should also have public participation. I do not know of anything being proposed in the current settlement that causes this landfill to be safe for the public health and welfare, that shows this landfill is needed, or makes it compatible with the local surroundings.
