STATE OF ILLINOIS
Pollution Control Board

In reference to PCB No. 07-113 Rochelle Waste Disposal, L.L.C.v **PC#6**
The City of Rochehle

I am concerned with Special Condition Number 13, which requires the exhumation and relocation of waste from unit 1 to be complete within 6 years from the time of IEPA permit approximately for expansion.

I question the reliability of the operator to do this considering unit 1 was to be exhumed in the late 1990's and he went to the Pollution Control Board with the request to have an extension. So why can we expect he will not try that again, and again. Unit 1 was filled in the 70-80 and early 90's at that time the limits of what could be placed in the landfill were not as strict as today and I am sure extra precautions will have to be considered in the exhumation process.

This area for a landfill was only to be used for local garbage originally.

I also have a problem with the height and size of the projected landfill--this concerns condition #33 the sight of the landfill is only 1/4 Mile from Lincoln Highway (Rte 38). Now the Lincoln Highway is setup to cross the entire United States they are proud to display. I do not think a mountain of garbage is an added attraction for this highway.

An Condition # 36 states the widening of Rt. 38 yet the operator has not required all trucks & trailers to use Hwy 38 instead allow semis to use routes not designed for semis.

Therefore, I do hope you, the Pollution Board will consider keeping all the Conditions required as voted on..
