

RECEIVED
CLERK'S OFFICE

JUL 31 2007

STATE OF ILLINOIS
Pollution Control Board

In reference To PCB No. 07-113,
Rochelle Waste Disposal, L.L.C. v The City
Of Rochelle, and Illinois Municipal
Devin Moose stated this landfill is a near
perfect design, but will be only as safe as the
operator builds it. Everyone, involved in the
siting process has seen and knows the
operator and that he does a very poor job of
abiding by regulations, so they continually
try to get them set aside or eliminated as
with these conditions now.

PC#5

This application has only come this far
because the Hearing Officer, Mayor and
Council knew these 37 conditions would
help force this operator to have a safer
Dump in the community for the citizens.

Without the 37 conditions kept in place
this application will be greatly flawed and
the citizens in this community will be the
victims

Please vote to maintain all 37 conditions.
Thank You

Frank Beardia
