Re PCB 2007-084 North Milan

PC#15

Dear Sir

I am writing you to express my concern in regards to the proposed future site of waste management landfill. There are several reasons why this site is such a poor choice. The first reason that concerns me, is putting this landfill in a wetland area. This area has unstable soil and the potential of leaching from the landfill into the ground water.

Then to have this site not only near a World Heritage Site of Cahokia Mounds, but possibly on other Indian heritage cultural sites. Also it would be very close to the natural state park, Horseshoe Lake. I have lived all my life in this area and find it sad that instead of preserving the good things, instead they get buried in trash. ~~Thank you~~ I hope the board does not let this project go forward.
