Weather Conditions: 64 degrees Fahrenheit. Mostly cloudy. Winds south at 13 mph.
Conditions obtained from The Weather Channel electronic mail

Estimated Amount of Waste: 4 cubic yards

General Remarks

I conducted this inspection in response to a complaint that waste was being open burned at the site. After arriving, I walked to the house where I attempted to locate an owner. A tenant answered the door. I explained why I was on site. I then walked behind the house where the burn pile was located.

The pile was approximately 6 feet in diameter. It contained bottles, cardboard, furniture, foam cushion, carpet, textiles, aluminum cans, metal, roofing shingles, carpeting and other miscellaneous waste (Photo 1 and Photo 2). The pile of ashes was about one foot in height. The bottles, aluminum cans, metal waste and some of the other debris was partially burned (Photo 3 and Photo 4).

After reviewing the pile, I exited the site.

General Remarks

Pre-Inspection Notes: An Administrative Citation Warning Notice was issued as a result of an inspection completed on September 17, 2007. The Notice cited alleged violations for open dumping and open burning. I received a telephone call from Mr. Sotelo on October 15th. He agreed to remove all the waste and ashes.

I conducted this inspection to determine if the site had been cleaned. After arriving, I walked to the house where I met with Mr. Sotelo. I explained that I was on site to see if they had removed all waste and ash remnants from the open burning. I reviewed the area and found that the waste I had previously observed was not on the site. The majority of the ashes had been removed. However, vinyl flooring was now in place in the burn pile.

After inspecting the site, I informed Mr. Sotelo that the vinyl flooring and all ash needed to be removed. I asked that he remove the waste within one week.

I returned to the site on December 20, 2007 and the vinyl flooring was still open dumped on the site. I then exited the site.
