RECOMMENDATION

The Illinois Environmental Protection Agency ("Illinois EPA") hereby files its Recommendation pursuant to Section 125,204 of the regulations of the Illinois Pollution Control Board, 35 Ill. Adm. Code 125.204.

1. On July 16, 2007, the Illinois EPA received a request from Honey Creek Hogs, Inc. (log number TC-12-07, Exhibit A) for an Illinois EPA recommendation regarding the tax certification of water pollution control facilities pursuant to 35 Ill. Adm. Code 125.204.

The applicant's address is: 2. Honey Creek Hogs, Inc. County Hwy 7

Pittsfield, Illinois 62363

The proposed water pollution control facilities in this request are located at SE 1/4 3. of Section 1, T6S, R4W of the 4th PM in Pike County, at the above street address and consist of the following:

> Livestock waste management facilities consisting of one concrete pit (100 ft. x 200 ft. x 8 ft. deep) with six concrete pump out pits (each 6 ft. x 6 ft. x 8 ft. deep) and the portion of the concrete slotted flooring over the manure pit in one swine building; and PVC foundation drainage tubing (6 in. diameter x 600 ft. long).

These livestock waste management facilities are used to collect, transport and/or store livestock wastes prior to cropland application, and are further described in Exhibit A.

- Section 11-10 of the Property Tax Code, 35 ILCS 200/11-10 (2006), defines
 "pollution control facilities" as:
 - "any system, method, construction, device or appliance appurtenant thereto or any portion of any building or equipment, that is designed, constructed, installed or operated for the primary purpose of: (a) eliminating, preventing, or reducing air or water pollution ...or (b) treating, pretreating, modifying or disposing of any potential solid, liquid or gaseous pollutant which if released without treatment, pretreatment modification or disposal might be harmful, detrimental or offensive to human, plant or animal life, or to property."
- 5. Pollution control facilities are entitled to preferential tax treatment, 35 ILCS 200/11-5.
- 6. Based on the information in the application and the purpose of the facilities, it is the Illinois EPA's engineering judgment that the described facilities may be considered "pollution control facilities," pursuant to 35 Ill. Adm. Code 125.200(a), with the primary purpose of eliminating, preventing, or reducing water pollution, or as otherwise provided in 35 Ill. Adm. Code 125.200, and are eligible for tax certification from the Board.

WHEREFORE, the Illinois EPA recommends that the Board issue the

requested tax certification.

Environmental Protection

Agency

The Bureau of Water received a request on July 16, 2007 from Honey Creek Hogs, Inc. for an Illinois EPA recommendation regarding the tax certification of water pollution control facilities pursuant to 35 Il. Adm. Code 125.204. We offer the following recommendation.

The water pollution control facilities in this request include the following:

Honey Creek Hogs, Inc. Co. Hwy 7 Pittsfield, IL 62363

SE 1/4 of Section 1, T6S, R4W of the 4th PM in Pike County

Livestock waste management facilities consisting of one concrete pit (100 ft. x 200 ft. x 8 ft. deep) with six concrete pump out pits (each 6 ft. x 6 ft. x 8 ft. deep) and the portion of the concrete slotted flooring over the manure pit in one swine building; and PVC foundation drainage tubing (6 in. diameter x 600 ft. long). These livestock waste management facilities are used to collect, transport, and/or store livestock wastes prior to cropland application.

These facilities are further described in the enclosed applications and supporting documents.

Based on the information included in this submittal, it is our engineering judgment that the above proposed facilities may be considered "Pollution Control Facilities" under 35 IAC 125.200(a), with the primary purpose of eliminating, preventing, or reducing water pollution, or as otherwise provided in this section, and therefore eligible for tax certification from the Illinois Pollution Control Board. The Bureau of Water therefore recommends that the Board issue the requested tax certification for these facilities.

If you have any questions regarding the above, please contact James Allison at 217/782-3362.

To Whom It May Concern:

Enclosed is an application for tax certification of the livestock pollution control facility known as Honey Creek Hogs. Following is discussion pertinent to the application.

Attached is a sketch showing both a top and side view of the manure storage facility. The underground pit measures 200' by 100' by 8' deep, holding up to one year's storage of manure from the 2400 head of swine. As indicated by the side view, the animals directly drop urine and feces into the concrete pit through the slatted floors.

Through the six manure removal ports indicated per the top view, the manure is pumped by a professional applicator through a hose to cropland that is located within a one-half mile radius of the pollution control facility. Up to 6000 gallons of manure per acre are injected into the soil following harvest, providing nutrients to crops the following year.

Since the pit is fully enclosed via concrete, instances of leakage is very rare and only possible should flaws exist in the concrete structure. To monitor potential leakage, a perimeter tile drain is located around the base of the facility and water samples are taken each calendar quarter, being analyzed by the IL Department of Agriculture for signs of contamination.

As noted by the sketch, a major waterway known as Honey Creek passes approximately 200 feet to the North of the facility, and a field ditch that runs water passes approximately 40 feet to the East of the facility. The concrete manure storage structure prevents the swine manure from entering these waterways via its full containment.

Approval of this tax certification will be appreciated, and I will be happy to provide further information or clarification of any item. I may be reached at (217) 473-5232.

Thank you.
