**RECOMMENDATION**

The Illinois Environmental Protection Agency (“Illinois EPA”) hereby files its Recommendation pursuant to Section 125.204 of the regulations of the Illinois Pollution Control Board, 35 Ill. Adm. Code 125.204.

1. On September 3, 2008, the Illinois EPA received a request from Gary Donley, Pinnacle Genetics, LLC (log number TC-47-07, Exhibit A) for an Illinois EPA recommendation regarding the tax certification of water pollution control facilities pursuant to 35 Ill. Adm. Code 125.204.
2. The applicant’s address is: Pinnacle Genetics, LLC  
3131 N 600<sup>th</sup> Rd  
Colchester, IL 62326

The proposed water pollution control facilities in this request are located at Section 3, T4N, R4W of the 4th P.M. in McDonough County, at the above street address and consist of the following:

Livestock waste management facilities consisting of one concrete manure pit (75 ft. x 518 ft. x 2 ft.) and the slotted plastic and cast iron floor over the manure pit in building #1; one concrete manure pit ( 77 ft. x 480 ft. x 10 ft.) and the steel reinforced concrete slat floor over the manure pit and 12 pump outs pits ( 6 ft. x 6 ft. x 10 ft.) in building #2; one concrete manure pit (77 ft. x 512 ft. x 10 ft.) and the steel reinforced concrete slat floor over the manure pit and 12 pump out pits (6 ft. x 6 ft. x 10 ft.) in building #3; and approximately 100 ft. of 8-inch diameter PVC manure transfer pipe. These livestock waste management facilities are used

to collect, transport and/or store livestock wastes prior to cropland application, and are further described in Exhibit A.

4. Section 11-10 of the Property Tax Code, 35 ILCS 200/11-10 (2006), defines

“pollution control facilities” as:

any system, method, construction, device or appliance appurtenant thereto or any portion of any building or equipment, that is designed, constructed, installed or operated for the primary purpose of: (a) eliminating, preventing, or reducing air or water pollution ...or (b) treating, pretreating, modifying or disposing of any potential solid, liquid or gaseous pollutant which if released without treatment, pretreatment modification or disposal might be harmful, detrimental or offensive to human, plant or animal life, or to property.

5. Pollution control facilities are entitled to preferential tax treatment, 35 ILCS 200/11-5.
6. Based on the information in the application and the purpose of the facilities, it is the Illinois EPA’s engineering judgment that the described facilities may be considered “pollution control facilities,” pursuant to 35 Ill. Adm. Code 125.200(a), with the primary purpose of eliminating, preventing, or reducing water pollution, or as otherwise provided in 35 Ill. Adm. Code 125.200, and are eligible for tax certification from the Board.

WHEREFORE, the Illinois EPA recommends that the Board issue the

requested tax certification.

RECEIVED
Division of Legal Counsel
MAR 17 2009
Environmental Protection Agency

The Bureau of Water received a request on September 03, 2008 from Gary Donley for an Illinois EPA recommendation regarding the tax certification of water pollution control facilities pursuant to 35 Il. Adm. Code 125.204. We offer the following recommendation.

The water pollution control facilities in this request include the following:

Pinnacle Genetics, LLC
3131 N 600th Rd
Colchester, IL 62326

Section 3, T4N, R4W of the 4th P.M. in McDonough County

Livestock waste management facilities consisting of one concrete manure pit (75 ft. x 518 ft. x 2 ft.) and the slotted plastic and cast iron floor over the manure pit in building #1; one concrete manure pit (77 ft. x 480 ft. x 10 ft.) and the steel reinforced concrete slat floor over the manure pit and 12 pump outs pits (6 ft. x 6 ft. x 10 ft.) in building #2; one concrete manure pit (77 ft. x 512 ft. x 10 ft.) and the steel reinforced concrete slat floor over the manure pit and 12 pump out pits (6 ft. x 6 ft. x 10 ft.) in building #3; and approximately 100 ft. of 8-inch diameter PVC manure transfer pipe.

These livestock waste management facilities are used to collect, transport and/or store livestock wastes prior to cropland application.

These facilities are further described in the enclosed applications and supporting documents.

Based on the information included in this submittal, it is our engineering judgment that the above proposed facilities may be considered "Pollution Control Facilities" under 35 IAC 125.200(a), with the primary purpose of eliminating, preventing, or reducing water pollution, or as otherwise provided in this
