#### **RECOMMENDATION**

The Illinois Environmental Protection Agency ("Illinois EPA") hereby files its

Recommendation pursuant to Section 125.204 of the regulations of the Illinois Pollution

Control Board, 35 Ill. Adm. Code 125.204.

On November 29, 2007, the Illinois EPA received a request from Ken Maschhoff
(log number TC-23-07, Exhibit A) for an Illinois EPA recommendation regarding
the tax certification of water pollution control facilities pursuant to 35 Ill. Adm.
Code 125.204.

2. The applicant's address is: Riverview Frenetics
7255 Greenwood Road
Centralia, Illinois 62801

3. The proposed water pollution control facilities in this request are located at Section 16, TIN, R2W of the 3<sup>rd</sup> P.M. in Clinton County, at the above street address and consist of the following:

Livestock waste management facilities consisting of two concrete manure pits (each 91 ft. x 66 ft. x 10 ft. deep) each with two concrete pump outs (each 7 ft. x 6 ft. x 10 ft. deep) and the slotted concrete portion of the floor over the manure pits. Two concrete manure pits (each 58 ft. x 42 ft. x 10 ft. deep) each with two concrete pump outs (each 7 ft. x 6 ft. x 10 ft. deep) and the slotted concrete portion of the floor over the manure pits.

These livestock waste management facilities are used to collect, transport and/or store livestock wastes prior to cropland application, and are further described in Exhibit A.

Section 11-10 of the Property Tax Code, 35 ILCS 200/11-10 (2006), defines
 "pollution control facilities" as:

"any system, method, construction, device or appliance appurtenant thereto or any portion of any building or equipment, that is designed, constructed, installed or operated for the primary purpose of: (a) eliminating, preventing, or reducing air or water pollution ...or (b) treating, pretreating, modifying or disposing of any potential solid, liquid or gaseous pollutant which if released without treatment, pretreatment modification or disposal might be harmful, detrimental or offensive to human, plant or animal life, or to property."

- 5. Pollution control facilities are entitled to preferential tax treatment, 35 ILCS 200/11-5.
- 6. Based on the information in the application and the purpose of the facilities, it is the Illinois EPA's engineering judgment that the described facilities may be considered "pollution control facilities," pursuant to 35 Ill. Adm. Code 125.200(a), with the primary purpose of eliminating, preventing, or reducing water pollution, or as otherwise provided in 35 Ill. Adm. Code 125.200, and are eligible for tax certification from the Board.

WHEREFORE, the Illinois EPA recommends that the Board issue the

requested tax certification.

Division of Legal Counsel

DEC 1 2 2008

**Environmental Protection** Agency

The Bureau of Water received a request on November 29, 2007 from Ken Maschhoff for an Illinois EPA recommendation regarding the tax certification of water pollution control facilities pursuant to 35 II. Adm. Code 125.204. We offer the following recommendation.

The water pollution control facilities in this request include the following:

Riverview Frenetics 7255 Greenwood Road Centralia, IL 62801

Section 16, T1N, R2W of the 3rd P.M. in Clinton County

Livestock waste management facilities consisting of two concrete manure pits (each 91 ft. x 66 ft. x 10 ft. deep) each with two concrete pump outs (each 7 ft. x 6 ft. x 10 ft. deep) and the slotted concrete portion of the floor over the manure pits. Two concrete manure pits (each 58 ft. x 42 ft. x 10 ft. deep) each with two concrete pump outs (each 7 ft. x 6 ft. x 10 ft. deep) and the slotted concrete portion of the floor over the manure pits.

These livestock waste management facilities are used to collect, transport and/or store livestock wastes prior to cropland application.

These facilities are further described in the enclosed applications and supporting documents.

Based on the information included in this submittal, it is our engineering judgment that the above proposed facilities may be considered "Pollution Control Facilities" under 35 IAC 125.200(a), with the primary purpose of eliminating, preventing, or reducing water pollution, or as otherwise provided in this section, and therefore eligible for tax certification from the Illinois Pollution Control Board. The Bureau of Water therefore recommends that the Board issue the requested tax certification for these facilities.

If you have any questions regarding the above, please contact Thaddeus Faught at 217/782-3362.

#### Riverview Genetics - Boar Stud

Section D.

The manure from the swine goes through the slats into the deep pits. The manure is stored in the pit until application is necessary. A pump with a hose is connected from the pump out port in/on the pit to the tractor and injected into the ground at agronomic rates in accordance to the Comprehensive Nutrient Management Plan.

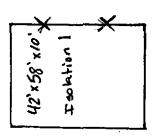

There are 4 buildings at this site. There are two gestation houses that are 66' x 91' with a 10' deep pit and two isolation houses that are 42' x 58' with 10 deep pits.

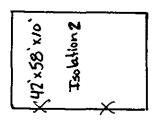

All pits are made out of concrete that is reinforced with rebar.

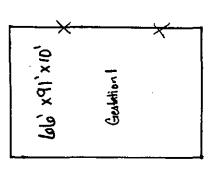

Each of the buildings have manure pumpouts. (Please see included documents for their locations and number on each building.)

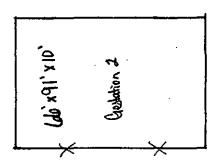

All buildings have 100% total slatted floors.

There is a center wall in all of the pits with flow through holes that equalize the manure levels.

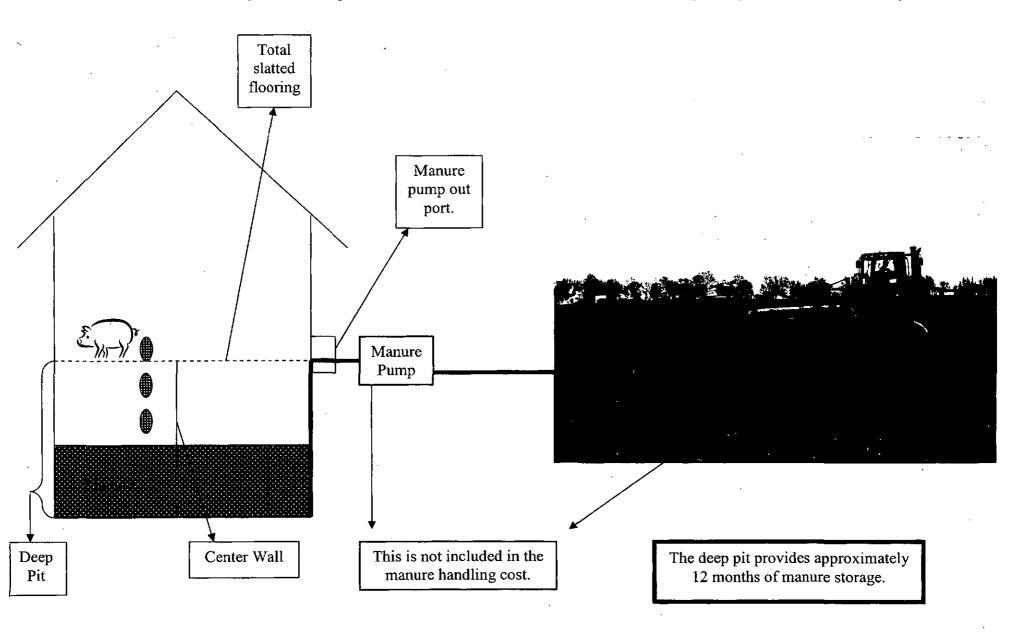

Sketched Diagram showing the flow of livestock waste from the animal through the pollution control facility.
