) ) PCB 09-) (Tax Certification)

### **RECOMMENDATION**

)

The Illinois Environmental Protection Agency ("Illinois EPA") hereby files its

Recommendation pursuant to Section 125.204 of the regulations of the Illinois Pollution

Control Board, 35 Ill. Adm. Code 125.204.

с.

 On December 28, 2007, the Illinois EPA received a request from Gary Donley (log number TC-39-07, Exhibit A) for an Illinois EPA recommendation regarding the tax certification of water pollution control facilities pursuant to 35 Ill. Adm. Code 125.204.

2. The applicant's address is:

Deer View, LLC 1487 East County Road 150 West Point, Illinois 62380

3. The proposed water pollution control facilities in this request are located at

NE ¼ of Section 29, T3N, R7W of the 4th P.M. in Hancock County, at the above

street address and consist of the following

Livestock waste management facilities consisting of one concrete pit (48 ft. x 52 ft. x 2 ft. deep) and the portion of the plastic slotted flooring over the manure pit in Building # 1; one concrete pit (61 ft. x 280 ft. x 2 ft. deep) and the portion of the concrete slotted flooring over the manure pit in Building # 2; one concrete pit (118 ft. x 428 ft. x 2 ft. deep) and the portion of the concrete slotted flooring over the manure pits in Building # 3; one concrete pit (159 ft. x 508 ft. x 2 ft. deep) and the portion of the plastic and cast iron slotted flooring over the manure pit in Building # 4; one concrete pit (118 ft. x 428 ft. x 2 ft. deep) and the portion of the concrete pit (118 ft. x 2 ft. deep) and the portion of the slotted flooring over the manure pit in Building # 4; one concrete pit (118 ft. x 428 ft. x 2 ft. deep) and the portion of the concrete slotted flooring over the manure pit in Building # 4; one concrete pit (118 ft. x 428 ft. x 2 ft. deep) and the portion of the concrete slotted flooring over the manure pit in Building # 4; one concrete pit (118 ft. x 428 ft. x 2 ft. deep) and the portion of the concrete slotted flooring over the manure pit in Building # 5; two steel slurry stores with glass lined manure storage tank with concrete base (each 176 ft. in diameter x 19 ft. deep); and approximately 800 ft. of 10 inch diameter PVC manure transfer piping.

These livestock waste management facilities are used to collect, transport and/or store livestock wastes prior to cropland application, and are further described in Exhibit A.

4. Section 11-10 of the Property Tax Code, 35 ILCS 200/11-10 (2006), defines

"pollution control facilities" as:

"any system, method, construction, device or appliance appurtenant thereto or any portion of any building or equipment, that is designed, constructed, installed or operated for the primary purpose of: (a) eliminating, preventing, or reducing air or water pollution ...or (b) treating, pretreating, modifying or disposing of any potential solid, liquid or gaseous pollutant which if released without treatment, pretreatment modification or disposal might be harmful, detrimental or offensive to human, plant or animal life, or to property."

- Pollution control facilities are entitled to preferential tax treatment, 35 ILCS 200/11-5.
- 6. Based on the information in the application and the purpose of the facilities, it is the Illinois EPA's engineering judgment that the described facilities may be considered "pollution control facilities," pursuant to 35 Ill. Adm. Code 125.200(a), with the primary purpose of eliminating, preventing, or reducing water pollution, or as otherwise provided in 35 Ill. Adm. Code 125.200, and are eligible for tax certification from the Board.

WHEREFORE, the Illinois EPA recommends that the Board issue the

#### THIS FILING SUBMITTED ON RECYCLED PAPER

requested tax certification.

Re: Deer View, LLC - West Point Recommendation of Tax Certification Log # TC-39-07 Property Identification # 23-29-200-004 RECEIVED Division of Legal Counsel

JAN 27 2009

Environmental Protection Agency

The Bureau of Water received a request on December 28, 2007 from Deer View, LLC for an Illinois EPA recommendation regarding the tax certification of water pollution control facilities pursuant to 35 Il. Adm. Code 125.204. We offer the following recommendation.

The water pollution control facilities in this request include the following:

Deer View, LLC 1487 East County Road 150 West Point, IL 62380

NE 1/4 of Section 29, T3N, R7W of the 4th P.M. in Hancock County

Livestock waste management facilities consisting of one concrete pit (48 ft. x 52 ft. x 2 ft. deep) and the portion of the plastic slotted flooring over the manure pit in Building # 1; one concrete pit (61 ft. x 280 ft. x 2 ft. deep) and the portion of the concrete slotted flooring over the manure pit in Building # 2; one concrete pit (118 ft. x 428 ft. x 2 ft. deep) and the portion of the concrete slotted flooring over the manure pit in Building # 3; one concrete pit (159 ft. x 508 ft. x 2 ft. deep) and the portion of the plastic and cast iron slotted flooring over the manure pit in Building # 4; one concrete pit (118 ft. x 428 ft. x 2 ft. deep) and the portion of the concrete pit (118 ft. x 428 ft. x 2 ft. deep) and the portion of the concrete pit (118 ft. x 428 ft. x 2 ft. deep) and the portion of the concrete pit (118 ft. x 428 ft. x 2 ft. deep) and the portion of the concrete pit (118 ft. x 428 ft. x 2 ft. deep) and the portion of the concrete pit (118 ft. x 428 ft. x 2 ft. deep) and the portion of the concrete slotted flooring over the manure pit in Building # 4; one concrete pit (118 ft. x 428 ft. x 2 ft. deep) and the portion of the concrete slotted flooring over the manure pit in Building # 5; two steel glass lined manure storage tanks with concrete base (each 176 ft. in diameter x 19 ft. deep); and approximately 800 ft. of 10 inch diameter PVC manure transfer piping. These livestock waste management facilities are used to collect, transport, and/or store livestock wastes prior to cropland application.

These facilities are further described in the enclosed applications and supporting documents.

Based on the information included in this submittal, it is our engineering judgment that the above proposed facilities may be considered "Pollution Control Facilities" under 35 IAC 125.200(a), with the primary purpose of eliminating, preventing, or reducing water pollution, or as otherwise provided in this section, and therefore eligible for tax certification from the Illinois Pollution Control Board. The Bureau of Water therefore recommends that the Board issue the requested tax certification for these facilities.

If you have any questions regarding the above, please contact James Allison at 217/782-3362.

From: Allison, James [mailto:James.Allison@Illinois.gov] Sent: Tuesday, October 21, 2008 10:00 AM To: Pam Flesner Subject: RE: IL EPA App for Cert (Property Tax Treatment)

Pam,

Please indicate if the manure pits are the dimesions of the buildings. Yes If any are different from the building please specify which location, which building, and what are the dimensions.

In addition answer the following:

TC-39-07 -- Deer View, LLC

What is the flooring material of the slurry stores? Steel reinforced concrete

TC-40-07 -- Wildcat Farms, LLC

What is the flooring of the slurry store? Steel reinforced concrete

Sent: Monday, August 25, 2008 2:27 PM

To: Allison, James

Subject: RE: IL EPA App for Cert (Property Tax Treatment)

James, I have some of the info you need in red below... I am working on getting the info for the last 4 farms.

Also, I will be mailing the signature pages with the original signatures out today. Should I mail to the PO 19276 Springfield address?

From: Allison, James [mailto:James.Allison@Illinois.gov] Sent: Wednesday, August 06, 2008 3:01 PM To: Pam Flesner Subject: RE: IL EPA App for Cert (Property Tax Treatment)

yes

From: Pam Flesner [mailto:pflesner@hogvet.com] Sent: Wednesday, August 06, 2008 11:56 AM To: Allison, James Subject: RE: IL EPA App for Cert (Property Tax Treatment)

Thank you. I will work on getting this info together. I assume you will need the signature pages mailed, not faxed or scanned?

Sec. G	Olgitizta		ONS FOR COMPILING AND FILING APP	LICATION	<u> </u>		
	General						
	General: Separate applications must be completed for each control facility claimed. Do not mix types (water and air). Where both air and water operations are related, file two applications. If attachments are needed, record them consecutively on an index sheet.						
	Sec. A Information refers to applicant as listed in the tax records and the person to be contacted for further details or for inspection of facilities. Define facility location by street address or legal description. A plat map location is required for facilities located outside of municipal boundaries. The property identification number is required.						
	Sec. B	Self-explanatory. Submit copies of all permits issued by local pollution control agencies. (e.g. MSD Construction Permit)				n Permit)	
	Sec. C	Refers to manufacturing processes or materials on which pollution control facility is used.					
INSTRUCTIONS	Sec. D	State the type of control facility. State permit number, date, and agency issuing permit. A narrative description and a process flow diagram describing the <u>pollution control facility</u> . Include a listing of each major piece of equipment included in the claimed fair cash value for real property. Include an <u>average</u> analysis of the influent and effluent of the control facility stating the collection efficiency.					
	Sec. E	List air contaminants, or water pollution substances released as effluents to the manufacturing processes. List also the final disposal of any contaminants removed from the manufacturing processes. Item (1) – Refers to pollutants and contaminants removed from the process by the pollution control facility. Item (2) – Refers to water pollution but can apply to water carried wastes from air pollution control facilities. Submit drawings, which clearly show (a) Point(s) of discharge to receiving stream, and (b) Sewers and process piping to and from the control facility. Item (3) – If the collected contaminants are disposed of other than as wastes, state the disposition of the materials, and the value					
		in dollars reclaimed by sale or reuse of the collected substances. State the cost of reclamation and related expense. Item (4) – State the date which the pollution control facility was first placed in service and operated. If not, explain. Item (5) – This information is essential to the certification and assessment actions. This accounting data must be completed to activate project review prior to certification by this Agency.					
	Sec. F	Self-explanatory. Signature must be a corporate authorized signature.

Attached Sheet in Support of Application for Certification of Pollution Control Facility For Deer View Farm LLC Page 1 Section D of the form –

Deer View Farm LLC is a swine farm with 5 separate buildings that house swine. Each of these building has manure storage capacity in below ground level concrete pits. Also integrated into the design is specially designed flooring material that separates the animals from the manure holding area yet allows the manure to pass thru the floor into the holding area. In buildings 1 & 4 there are two special types of flooring that allow for the manure to pass into the storage area. A portion of the flooring in building 4 is made from cast iron with a slatted pattern. In building 1 & a portion of building 4 the flooring is made of slatted plastic material. In buildings 2, 3 & 5 the floor is made of steel reinforced concrete slats. All of these floor types efficiently allow for the manure to pass into the storage area.

The manure storage area beneath each building is approx 2 ft deep. Primary manure storage is accomplished by two above ground storage tanks that will hold approx 12 months worth of manure produced by the facility. The outside storage units are 176 ft in diameter & 19 feet tall. They are constructed of steel with a glass like material covering to resist corrosion. Underground sewer lines allow for gravity transfer of manure from the buildings to a central pump location. The underground sewer lines are made with 10' PVC. There is approx 800 feet of this pipe that connects the buildings to the special pump found in the lift station. Manure is then pumped from this "lift station" into the storage tanks. Manure is retained by these structures to prevent it from leaving the farm and reaching surrounding water sources. The nearest body of water is a pond approx ¼ mile from the nearest building. Multiple times each year the manure is pumped out of the pits and injected into surrounding farmland at ergonomically appropriate rates. Collection efficiency of this design of pollution control facility is 100%.

On the accompanying diagram the buildings are identified as Buildings 1-5 with approx. dimensions listed at the top of each. The diagram also shows the pattern of the underground sewer lines that drain the buildings manure to the lift station where the material is pumped into the storage tanks.
