RECOMMENDATION

The Illinois Environmental Protection Agency ("Illinois EPA") hereby files its Recommendation pursuant to Section 125.204 of the regulations of the Illinois Pollution Control Board, 35 Ill. Adm. Code 125.204.

1. On September 3, 2008, the Illinois EPA received a request from Gary Donley (log number TC-43-07, Exhibit A) for an Illinois EPA recommendation regarding the tax certification of water pollution control facilities pursuant to 35 Ill. Adm. Code 125.204.
2. The applicant's address is: Lone Hollow, LLC
539 N. Co. Road 2600
Bowen, Illinois 62216
3. The proposed water pollution control facilities in this request are located at Section 5, T3N, R5W of the 4th P.M. in Hancock County, at the above street address and consist of the following

Livestock waste management facilities consisting of one concrete manure pit (24 ft. x 97 ft. x 2ft.) and the slotted plastic and cast iron floor over the manure pit in building #1; one concrete manure pit (97 ft. x 154 ft. x 8 ft.) and the steel reinforced concrete slat floor over the manure pit and 6 pump out pits (4 ft. x 4 ft. x 8 ft.) in building #2; one concrete manure pit (97 ft. x 516 ft. x 10 ft.) and the steel reinforced concrete slat floor over the manure pit and 14 pump out pits (4 ft. x 4 ft. x 10 ft.) in building #3; one concrete manure pit (160 ft. x 438 ft.) and the slotted plastic and cast iron floor over the manure pit in building #4; one concrete manure pit (97 ft. x 516 ft. x 10 ft.) and the steel reinforced concrete slat floor over the manure pit and 14 pump out pits (4 ft. x 4 ft. x 10 ft.) in building #4; and

approximately 150 ft. of 8-inch diameter PVC manure transfer pipe between the manure pits.

These livestock waste management facilities are used to collect, transport and/or store livestock wastes prior to cropland application, and are further described in Exhibit A.

4. Section 11-10 of the Property Tax Code, 35 ILCS 200/11-10 (2006), defines

“pollution control facilities” as:

“any system, method, construction, device or appliance appurtenant thereto or any portion of any building or equipment, that is designed, constructed, installed or operated for the primary purpose of: (a) eliminating, preventing, or reducing air or water pollution ...or (b) treating, pretreating, modifying or disposing of any potential solid, liquid or gaseous pollutant which if released without treatment, pretreatment modification or disposal might be harmful, detrimental or offensive to human, plant or animal life, or to property.”

5. Pollution control facilities are entitled to preferential tax treatment, 35 ILCS 200/11-5.

6. Based on the information in the application and the purpose of the facilities, it is the Illinois EPA’s engineering judgment that the described facilities may be considered “pollution control facilities,” pursuant to 35 Ill. Adm. Code 125.200(a), with the primary purpose of eliminating, preventing, or reducing water pollution, or as otherwise provided in 35 Ill. Adm. Code 125.200, and are eligible for tax certification from the Board.

WHEREFORE, the Illinois EPA recommends that the Board issue the

requested tax certification.

RECEIVED
Division of Legal Counsel

JAN 27 2009

Environmental Protection
Agency

The Bureau of Water received a request on September 03, 2008 from Gary Donley for an Illinois EPA recommendation regarding the tax certification of water pollution control facilities pursuant to 35 Il. Adm. Code 125.204. We offer the following recommendation.

The water pollution control facilities in this request include the following:

Lone Hollow, LLC
539 N. Co Rd 2600
Bowen, IL 62316

Section 5, T3N, R5W of the 4th P.M. in Hancock County

Livestock waste management facilities consisting of one concrete manure pit (24 ft. x 97 ft. x 2ft.) and the slotted plastic and cast iron floor over the manure pit in building #1; one concrete manure pit (97 ft. x 154 ft. x 8 ft.) and the steel reinforced concrete slat floor over the manure pit and 6 pump out pits (4 ft. x 4 ft. x 8 ft.) in building #2; one concrete manure pit (97 ft. x 516 ft. x 10 ft.) and the steel reinforced concrete slat floor over the manure pit and 14 pump out pits (4 ft. x 4 ft. x 10 ft.) in building #3; one concrete manure pit (160 ft. x 438 ft.) and the slotted plastic and cast iron floor over the manure pit in building #4; one concrete manure pit (97 ft. x 516 ft. x 10 ft.) and the steel reinforced concrete slat floor over the manure pit and 14 pump out pits (4 ft. x 4 ft. x 10 ft.) in building #4; and approximately 150 ft. of 8-inch diameter PVC manure transfer pipe between the manure pits.

These livestock waste management facilities are used to collect, transport and/or store livestock wastes prior to cropland application.

These facilities are further described in the enclosed applications and supporting documents.

Page No. 2

Log No. TC-43-07

Based on the information included in this submittal, it is our engineering judgment that the above proposed facilities may be considered "Pollution Control Facilities" under 35 IAC 125.200(a), with the primary purpose of eliminating, preventing, or reducing water pollution, or as otherwise provided in this

section, and therefore eligible for tax certification from the Illinois Pollution Control Board. The Bureau of Water therefore recommends that the Board issue the requested tax certification for these facilities.

If you have any questions regarding the above, please contact DRG at 217/782-3362.

Pam,

I have recieved the information and signature pages since we last spoke. There are a couple follow up questions and some of the unanswered questions from last time so I can finish.

The following is an update on the projects.

TC-39-07 -- Deer View, LLC
- Preparing paperwork

TC-40-07 -- Wildcat Farms, LLC
- Preparing paperwork

TC-41-07 -- LaMoine Valley Farms, LLC
- Provide dimensions of the manure collection pits on buildings 1 and 4. Dimensions same as the buildings x 2' deep.

TC-42-07 -- Hilltop View, LLC
- Provide dimensions of the manure collection pits on buildings 1 and 4. Dimensions same as the buildings x 2' deep.

TC-43-07 -- Lone Hollow, LLC
- Provide the depths for each manure pit. Bldg 2 = 8' / Bldg 3 & 5 = 10'
- Provide which manure pits have pumpout pits and how many? Bldg 2 has 6 pump outs / Bldg 3 & 5 have 14 pump outs each

TC-44-07 -- Eagle Point Farms, LLC
- Provide dimensions of the manure collection pits on buildings 1 and 4. Dimensions same as the buildings x 2' deep.

TC-45-07 -- North Fork Pork, LLC
- Provide the depths for each manure pit. Bldg 2 & 4 = 10' / Bldg 1 = 8' / Bldg 3 = 2'
- Provide which manure pits have pumpout pits and how many? Bldg 2 & 4...20 on each bldg

TC-46-07 -- Timberline, LLC
- Provide the depths for the manure collection pit in Building #4. 2'
- Provide how many pumpout pits for the manure pit in Building #1, 2, and 3. Bldg 1 has 6 / Bldg 2 & 3 have 16 pump outs each

TC-47-07 -- Pinnacle Genetics, LLC
- Provide the depth for the manure collection pit in Building #1. 2'
- Provide which manure pits have pumpout pits and how many? Bldgs 2 & 3...each have 12 pumpouts
- Provide the dimensions of the pumpout pits. Working on...

TC-48-07 -- Western Creek Farms, LLC

10/22/2008

Electronic Filing - Received, Clerk's Office, April 16, 2009

- Provide the dimensions of the pump out pits (02 ft x 04 ft x 8 ft conc. ???) Working on...

POB 2009-089

TC-50-07 -- Cedercrest, LLC

- Provide dimensions of the collection pits on buildings 1 and 4. Dimensions same as the buildings x 2' deep.

		e. PERCENTAGE CONTROL FACILITY BEARS TO WHOLE FACILITY VALUE:	% 40		
Sec. F	The following information is submitted in accordance with the Illinois Property Tax Code, as amended, and to the best of my knowledge, is true and correct. The facilities claimed herein are "pollution control facilities" as defined in Section 11-10 of the Illinois Property Tax Code.				
SIGNATURE	 _____ Signature		Registered Agent _____ Title		
Sec. G	INSTRUCTIONS FOR COMPILING AND FILING APPLICATION				
	General: Separate applications must be completed for each control facility claimed. Do not mix types (water and air). Where both air and water operations are related, file two applications. If attachments are needed, record them consecutively on an index sheet.				
INSTRUCTIONS	Sec. A	Information refers to applicant as listed in the tax records and the person to be contacted for further details or for inspection of facilities. Define facility location by street address or legal description. A plat map location is required for facilities located outside of municipal boundaries. The property identification number is required.			
	Sec. B	Self-explanatory. Submit copies of all permits issued by local pollution control agencies. (e.g. MSD Construction Permit)			
	Sec. C	Refers to manufacturing processes or materials on which pollution control facility is used.			
	Sec. D	Narrative description of the pollution control facility, indicating that its primary purpose is to eliminate, prevent or reduce pollution. State the type of control facility. State permit number, date, and agency issuing permit. A narrative description and a process flow diagram describing the <u>pollution control facility</u> . Include a listing of each major piece of equipment included in the claimed fair cash value for real property. Include an <u>average</u> analysis of the influent and effluent of the control facility stating the collection efficiency.			
	Sec. E	List air contaminants, or water pollution substances released as effluents to the manufacturing processes. List also the final disposal of any contaminants removed from the manufacturing processes. Item (1) - Refers to pollutants and contaminants removed from the process by the pollution control facility. Item (2) - Refers to water pollution but can apply to water-carried wastes from air pollution control facilities. Submit drawings, which clearly show (a) Point(s) of discharge to receiving stream, and (b) Sewers and process piping to and from the control facility. Item (3) - If the collected contaminants are disposed of other than as wastes, state the disposition of the materials, and the value in dollars reclaimed by sale or reuse of the collected substances. State the cost of reclamation and related expense. Item (4) - State the date which the pollution control facility was first placed in service and operated. If not, explain. Item (5) - This information is essential to the certification and assessment actions. This accounting data must be completed to activate project review prior to certification by this Agency.			
	Sec. F	Self-explanatory. Signature must be a corporate authorized signature.

Attached Sheet in Support of Application for Certification of Pollution Control Facility
For Lone Hollow LLC
Page 1 Section D of the form –

Lone Hollow LLC is a swine farm with 5 separate buildings.

Each of these building has manure storage capacity in below ground level concrete pits. Also integrated into the design is specially designed flooring material that separates the animals from the manure holding area yet allows the manure to pass thru the floor into the holding area. The flooring in buildings 1 & 4 have a combination of slatted plastic & cast iron flooring that allows for manure to pass thru into the below ground storage pits. Buildings 2,3,& 5 have slatted floor made of concrete, re-enforced with steel.

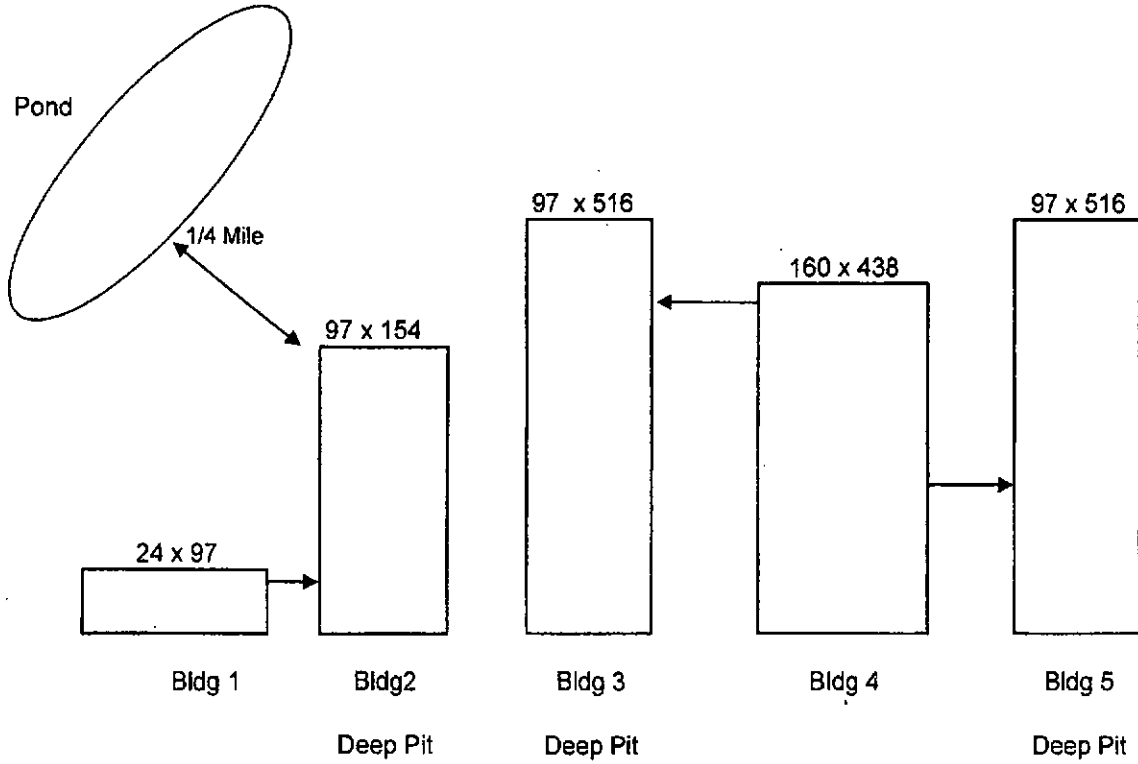

Buildings 1 & 4 (from diagram below) have manure pits that drain into, thru underground piping, buildings 2,3 & 5. This underground piping consists of 8" PVC pipe, these lines are approximately 50 feet long, the distance between buildings. Buildings 2,3,&5 have deep concrete (8' & 10') pits below them that will retain approx 12 months worth of manure produced by the animals at the farm. Manure is retained by these structures to prevent it from leaving the farm and reaching surrounding water sources. The nearest body of water is approx ¼ mile from the nearest building. Multiple times each year the manure is pumped out of the pits and injected into surrounding farmland at ergonomically appropriate rates. Each of the buildings with deep pits have multiple pump out locations located on the longer sides of the buildings. These pump out locations are approx 4 feet square and are made of concrete & steel. They are poured as floors and walls of the building are constructed. This feature allows for portable pumps to be lowered into the pits from the outside of building.

Collection efficiency of this design of pollution control facility is 100%.

On the accompanying diagram the buildings are identified as 1-5 with approx. dimensions listed at the top of each. Arrows between buildings indicate the direction and flow of manure from one building to another.
