Mr. Fox:

The Illinois EPA recently filed comments in response to comments filed by Mostardi Platt, recommending a short extension of the May 1, 2010, compliance date to August 1, 2010. It was recently brought to my attention that our comments could potentially cause confusion because, while May 1 is the compliance date for the majority of the rule revisions, the compliance date for the industrial cleaning solvents section (218/219.187) is April 1, 2011. I just wanted to clarify that the Agency's comment was only intended to address references to the May 1, 2010, compliance date. In other words, the Agency is not recommending that the 2011 compliance date for solvents be shortened.

If this is something I need to include in a filing, please let me know.
