RECOMMENDATION

The Illinois Environmental Protection Agency ("Illinois EPA") hereby files its

Recommendation pursuant to Section 125.204 of the regulations of the Illinois Pollution

Control Board, 35 Ill. Adm. Code 125.204.

- On December 16, 2009, the Illinois EPA received a request from Jerry L. Riggins
 (log number TC-22-09, Exhibit A) for an Illinois EPA recommendation regarding
 the tax certification of water pollution control facilities pursuant to 35 Ill. Adm.
 Code 125.204.
- 2. The applicant's address is:

 Jerry L. Riggins
 3685 Bellingham Road
 Macomb, Illinois 61455
- 3. The proposed water pollution control facilities in this request are located at NE ½ of Section 24, T4N, R3W of the 4th PM in McDonough County, at the above street address and consist of the following:

Livestock waste management facilities consisting of one concrete manure pit (approximately 281 ft. x 71.17 ft. x 8 ft. deep) with four concrete pump out pits (approximately 6 ft. x 6 ft. x 8 ft. deep); concrete slat flooring over the entire manure pit and approximately 850 feet of 6-inch PVC perimeter drain including sampling port in building # 1; one concrete manure pit (approximately 281 ft. x 71.17 ft. x 8 ft. deep) with four concrete pump out pits (approximately 6 ft. x 6 ft. x 8 ft. deep); concrete slat flooring over the entire manure pit and approximately 850 feet of 6-inch PVC perimeter drain including sampling port in building #2

These livestock waste management facilities are used to collect, transport and/or store livestock wastes prior to cropland application, and are further described in Exhibit A.

- 4. Section 11-10 of the Property Tax Code, 35 ILCS 200/11-10 (2008), defines "pollution control facilities" as:
 - "any system, method, construction, device or appliance appurtenant thereto or any portion of any building or equipment, that is designed, constructed, installed or operated for the primary purpose of: (a) eliminating, preventing, or reducing air or water pollution ...or (b) treating, pretreating, modifying or disposing of any potential solid, liquid or gaseous pollutant which if released without treatment, pretreatment modification or disposal might be harmful, detrimental or offensive to human, plant or animal life, or to property."
- 5. Pollution control facilities are entitled to preferential tax treatment, 35 ILCS 200/11-5.
- 6. Based on the information in the application and the purpose of the facilities, it is the Illinois EPA's engineering judgment that the described facilities may be considered "pollution control facilities," pursuant to 35 Ill. Adm. Code 125.200(a), with the primary purpose of eliminating, preventing, or reducing water pollution, or as otherwise provided in 35 Ill. Adm. Code 125.200, and are eligible for tax certification from the Board.

WHEREFORE, the Illinois EPA recommends that the Board issue the

requested tax certification.

Environmental Protection

Agency

The Bureau of Water received a request on December 16, 2009 from Jerry L. and Lynne J. Riggins for an Illinois EPA recommendation regarding the tax certification of water pollution control facilities pursuant to 35 Il. Adm. Code 125,204. We offer the following recommendation.

The water pollution control facilities in this request include the following:

Jerry L. Riggins 3685 Bellingham Rd. Macomb, IL 61455

NE 1/4 of Section 24, Township 4N, Range 3W of the 4th PM in McDonough County.

Livestock waste management facilities consisting of one concrete manure pit approximately (281 ft, x 71.17 ft. x 8 ft. deep) with 4 concrete pump out pits approximately (6 ft. x 6 ft. x 8 ft. deep), concrete slat flooring over the entire manure pit and approximately 850 feet of 6 inch PVC perimeter drain including sampling port in building #1; one concrete manure pit approximately (281 ft. x 71.17 ft. x 8 ft. deep) with 4 concrete pump out pits approximately (6 ft. x 6 ft. x 8 ft. deep), concrete slat flooring over the entire pit and approximately 850 feet of 6 inch PVC perimeter drain including sampling port in building #2.

These livestock waste management facilities are used to collect, transport and/or store livestock wastes prior to cropland application.

These facilities are further described in the enclosed applications and supporting documents.

Based on the information included in this submittal, it is our engineering judgment that the above proposed facilities may be considered "Pollution Control Facilities" under 35 IAC 125.200(a), with the primary purpose of eliminating, preventing, or reducing water pollution, or as otherwise provided in this section, and therefore eligible for tax certification from the Illinois Pollution Control Board. The Bureau of Water therefore recommends that the Board issue the requested tax certification for these facilities.

If you have any questions regarding the above, please contact Darren Gove at 217/782-0610.

Both perimeter drain outlets are approximately 100 feet from the buildings. The manure from the buildings is pumped to fields in close proximity to the buildings. No manure is hauled to other sites.

GENERAL NOTES

- 1,) ANY REVISIONS TO THESE DRAWINGS MUST BE APPROVED BY THE PROJECT ENGINEER OF THE COMPANY LISTED IN THE TITLE BLOCK.
- 2.) CONCRETE CONSTRUCTION SHALL MEET WITH MIDWEST PLAN SERVICE-36, CONCRETE MANURE STORAGES UNLESS NOTED OTHERWISE.
- 3.) NO CONCRETE SHALL BE PLACED ON ON ICE, SNOW OR FROZEN FOUNDATION MATERIAL. THE CONTRACTOR SHALL BE RESPONSIBLE FOR ALL CONCRETE DAMAGED BY LOW TEMPERATURES AND SHALL REMOVE AND REPLACE ANY CONCRETE SO DAMAGED AT HIS/HER EXPENSE.
- 4.) THE METHOD AND MANNER OF PLACING CONCRETE SHALL BE SUCH AS TO AVOID SEGREGATION OR SEPARATION OF THE AGGREGATES OR THE DISPLACEMENT OF THE REINFORCEMENT.
- 5.) THE FOOTINGS ARE TO BE CONSTRUCTED WITH A MINIMUM OF 3,000 PSI CONCRETE.

- 6.) ALL WALLS, COLUMNS, AND FLOORS ARE TO BE CONSTRUCTED OF 4,000 PSI CONCRETE.
- 7.) CONCRETE SLATS WILL BE UTILIZED FOR FLOORING.
- 8.) THE CONCRETE PAD WILL BE A CONTINUOUS POUR.
- 9.) EXTERIOR WALL CONSTRUCTION JOINTS WILL BE INSTALLED AT 1DD' O.C.
- 10.) NO VEHICLE LOADS ALLOWED WITHIN 5' OF PIT/GUTTER WALLS.
- 11.) ALL BEAMS SHALL BE BUTTED TIGHT AND/OR GROUTED TIGHT THE FULL WIDTH AND HEIGHT OF THE BEAM, GROUT WILL HAVE A MINIMUM COMPRESSIVE STRENGTH OF 5,500 PSI.
- 12.) ALL SLATS SHALL BE BUTTED TIGHT AND/OR GROUTED TIGHT THE FULL LENGTH AND DEPTH OF THE SLAT, GROUT WILL HAVE A MINIMUM COMPRESSIVE STRENGTH OF 5,500 PSI.
