Illinois Pollution Control Board

RECEIVED  
CLERK'S OFFICE  
OCT 17 2011  
STATE OF ILLINOIS  
Pollution Control Board

Dear Illinois Pollution Control Board Members,

We are residents of the community that surrounds the new Kirk C&D Concrete and Recycling plant. Our homes and businesses are in close proximity to the plant and we would like to voice our concerns about the plant and its effect on our neighborhood.

The roads in our neighborhood are not the best. The increased traffic from large trucks carrying heavy loads will quickly make our roads go from bad to worse. Roads that are torn up can damage vehicles and deter people from the surrounding businesses. Another fear is the constant vibrations from the heavy trucks and the plant will cause damage to our driveways, parking lots and the foundations of our homes and businesses.

The noise is another concern of ours. The constant sounds of the trucks and plant machinery will be a disruption to residents and businesses. Some of us have evening shifts that require us to sleep during the day, small children that require naps, or we ourselves require an afternoon rest. More importantly, our home is our sanctuary, and we should not have to be subjected to these noises in the privacy our own homes. Loud noise can be a distraction to local businesses and their patrons, making it difficult to communicate with each other and concentrate on tasks.

Our final concern, which is the most worrisome for us, is the dust and fume emissions from the plant and the trucks. The plant recycles asphalt, shingles and wood according to its website. These materials can emit dust particles that contain silica, asbestos, asphalt, and PCB's short and long term exposure to these dust particles can cause severe lung issues, especially to those with preexisting respiratory problems and can irritate skin and eyes. Not only do we fear for our health but the increased medical cost we will surely have with exposure to this toxic dust. The toxins will settle into the soil surrounding our properties, which will eventually kill our grasses, trees and gardens and contaminate our water.

We recognize the significance of recycling and its importance in creating a more environmentally-sustainable economy. However, the health and well-being of people should not be at the expense of this endeavor. Therefore, we as a community, respectfully request the members of the Illinois Pollution Control Board deny Kirk C&D Concrete and Recycling, Inc.'s operating permit for its plant located at 2148 Tri Lakes Road, Bloomington, IL 61704.

Sincerely,

Christy Johnson

The noise is another concern of ours. The constant sounds of the trucks and plant machinery will be a disruption to residents and businesses. Some of us have evening shifts that require us to sleep during the day, small children that require naps, or we ourselves require an afternoon rest. More importantly, our home is our sanctuary, and we should not have to be subjected to these noises in the privacy our own homes. Loud noise can be a distraction to local businesses and their patrons, making it difficult to communicate with each other and concentrate on tasks.

Our final concern, which is the most worrisome for us, is the dust and fume emissions from the plant and the trucks. The plant recycles asphalt, shingles and wood according to its website. These materials can emit dust particles that contain silica, asbestos, asphalt, and PCB's short and long term exposure to these dust particles can cause severe lung issues, especially to those with preexisting respiratory problems and can irritate skin and eyes. Not only do we fear for our health but the increased medical cost we will surely have with exposure to this toxic dust. The toxins will settle into the soil surrounding our properties, which will eventually kill our grasses, trees and gardens and contaminate our water.

We recognize the significance of recycling and its importance in creating a more environmentally-sustainable economy. However, the health and well-being of people should not be at the expense of this endeavor. Therefore, we as a community, respectfully request the members of the Illinois Pollution Control Board deny Kirk C&D Concrete and Recycling, Inc.'s operating permit for its plant located at 2148 Tri Lakes Road, Bloomington, IL 61704.

Sincerely,

Darcy N. Herman 10/7/11

Illinois Pollution Control Board

Dear Illinois Pollution Control Board Members,

We are residents of the community that surrounds the new Kirk C&D Concrete and Recycling plant. Our homes and businesses are in close proximity to the plant and we would like to voice our concerns about the plant and its effect on our neighborhood.

The roads in our neighborhood are not the best. The increased traffic from large trucks carrying heavy loads will quickly make our roads go from bad to worse. Roads that are torn up can damage vehicles and deter people from the surrounding businesses. Another fear is the constant vibrations from the heavy trucks and the plant will cause damage to our driveways, parking lots and the foundations of our homes and businesses.

The noise is another concern of ours. The constant sounds of the trucks and plant machinery will be a disruption to residents and businesses. Some of us have evening shifts that require us to sleep during the day, small children that require naps, or we ourselves require an afternoon rest. More importantly, our home is our sanctuary, and we should not have to be subjected to these noises in the privacy our own homes. Loud noise can be a distraction to local businesses and their patrons, making it difficult to communicate with each other and concentrate on tasks.

Our final concern, which is the most worrisome for us, is the dust and fume emissions from the plant and the trucks. The plant recycles asphalt, shingles and wood according to its website. These materials can emit dust particles that contain silica, asbestos, asphalt, and PCB's short and long term exposure to these dust particles can cause severe lung issues, especially to those with preexisting respiratory problems and can irritate skin and eyes. Our final concern, which is the most worrisome for us, is the dust and fume emissions from the plant and the trucks. The plant recycles asphalt, shingles and wood according to its website. These materials can emit dust particles that contain silica, asbestos, asphalt, and PCB's short and long term exposure to these dust particles can cause severe lung issues, especially to those with preexisting respiratory problems and can irritate skin and eyes. Not only do we fear for our health but the increased medical cost we will surely have with exposure to this toxic dust. The toxins will settle into the soil surrounding our properties, which will eventually kill our grasses, trees and gardens and contaminate our water.

We recognize the significance of recycling and its importance in creating a more environmentally-sustainable economy. However, the health and well-being of people should not be at the expense of this endeavor. Therefore, we as a community, respectfully request the members of the Illinois Pollution Control Board deny Kirk C&D Concrete and Recycling, Inc.'s operating permit for its plant located at 2148 Tri Lakes Road, Bloomington, IL 61704.

Sincerely,

10-7-11

Illinois Pollution Control Board

Dear Illinois Pollution Control Board Members,

We are residents of the community that surrounds the new Kirk C&D Concrete and Recycling plant. Our homes and businesses are in close proximity to the plant and we would like to voice our concerns about the plant and its effect on our neighborhood.

The roads in our neighborhood are not the best. The increased traffic from large trucks carrying heavy loads will quickly make our roads go from bad to worse. Roads that are torn up can damage vehicles and deter people from the surrounding businesses. Another fear is the constant vibrations from the heavy trucks and the plant will cause damage to our driveways, parking lots and the foundations of our homes and businesses.

The noise is another concern of ours. The constant sounds of the trucks and plant machinery will be a disruption to residents and businesses. Some of us have evening shifts that require us to sleep during the day, small children that require naps, or we ourselves require an afternoon rest. More importantly, our home is our sanctuary, and we should not have to be subjected to these noises in the privacy our own homes. Loud noise can be a distraction to local businesses and their patrons, making it difficult to communicate with each other and concentrate on tasks.

Our final concern, which is the most worrisome for us, is the dust and fume emissions from the plant and the trucks. The plant recycles asphalt, shingles and wood according to its website. These materials can emit dust particles that contain silica, asbestos, asphalt, and PCB's short and long term exposure to these dust particles can cause severe lung issues, especially to those with preexisting respiratory problems and can irritate skin and eyes. Not only do we fear for our health but the increased medical cost we will surely have with exposure to this toxic dust. The toxins will settle into the soil surrounding our properties, which will eventually kill our grasses, trees and gardens and contaminate our water.

We recognize the significance of recycling and its importance in creating a more environmentally-sustainable economy. However, the health and well-being of people should not be at the expense of this endeavor. Therefore, we as a community, respectfully request the members of the Illinois Pollution Control Board deny Kirk C&D Concrete and Recycling, Inc.'s operating permit for its plant located at 2148 Tri Lakes Road, Bloomington, IL 61704.

The toxins will settle into the soil surrounding our properties, which will eventually kill our grasses, trees and gardens and contaminate our water.

We recognize the significance of recycling and its importance in creating a more environmentally-sustainable economy. However, the health and well-being of people should not be at the expense of this endeavor. Therefore, we as a community, respectfully request the members of the Illinois Pollution Control Board deny Kirk C&D Concrete and Recycling, Inc.'s operating permit for its plant located at 2148 Tri Lakes Road, Bloomington, IL 61704.

Sincerely,

  
10-7-11

Illinois Pollution Control Board

Dear Illinois Pollution Control Board Members,

We are residents of the community that surrounds the new Kirk C&D Concrete and Recycling plant. Our homes and businesses are in close proximity to the plant and we would like to voice our concerns about the plant and its effect on our neighborhood.

The roads in our neighborhood are not the best. The increased traffic from large trucks carrying heavy loads will quickly make our roads go from bad to worse. Roads that are torn up can damage vehicles and deter people from the surrounding businesses. Another fear is the constant vibrations from the heavy trucks and the plant will cause damage to our driveways, parking lots and the foundations of our homes and businesses.

The noise is another concern of ours. The constant sounds of the trucks and plant machinery will be a disruption to residents and businesses. Some of us have evening shifts that require us to sleep during the day, small children that require naps, or we ourselves require an afternoon rest. More importantly, our home is our sanctuary, and we should not have to be subjected to these noises in the privacy our own homes. Loud noise can be a distraction to local businesses and their patrons, making it difficult to communicate with each other and concentrate on tasks.

Our final concern, which is the most worrisome for us, is the dust and fume emissions from the plant and the trucks. The plant recycles asphalt, shingles and wood according to its website. These materials can emit dust particles that contain silica, asbestos, asphalt, and PCB's short and long term exposure to these dust particles can cause severe lung issues, especially to those with preexisting respiratory problems and can irritate skin and eyes. Not only do we fear for our health but the increased medical cost we will surely have with exposure to this toxic dust. The toxins will settle into the soil surrounding our properties, which will eventually kill our grasses, trees and gardens and contaminate our water.

We recognize the significance of recycling and its importance in creating a more environmentally-sustainable economy. However, the health and well-being of people should not be at the expense of this endeavor. Therefore, we as a community, respectfully request the members of the Illinois Pollution Control Board deny Kirk C&D Concrete and Recycling, Inc.'s operating permit for its plant located at 2148 Tri Lakes Road, Bloomington, IL 61704.

Sincerely,

Steve Kasm
