Subject: Please Reject Ameren's Petition for a Variance (Docket No. PCB 2012-126)

Jun 27, 2012

Illinois Pollution Control Board Members

Dear Control Board Members,

I object to Ameren's Petition for a Variance, Docket No. PCB 2012-126.

In 2006, Illinois made history by passing a leading mercury pollution reduction standard. The original agreement included new clean air standards for mercury, sulfur dioxide (SO<sub>2</sub>) and nitrous oxide (NO<sub>x</sub>), which create acid rain and smog, as well as many health-related problems. Ameren committed to a schedule for reducing its SO<sub>2</sub> and NO<sub>x</sub> pollution in return for more time to make its mercury pollution reductions.

The state upheld its side of the deal, but now Ameren is trying to stall cleaning up its coal plants like it promised to. I hope you will reject the company's request for a variance and instead hold the company to the standard passed in 2006 and the agreement it made to reduce mercury pollution. I believe this is critical for my health and the health and environment of all of Illinois.

Sincerely,

Dr. Donna Blue

Subject: Ameren's Request for further delay

Dear Members of the Illinois Pollution Control Board,

Please do not accede to Ameren's request to further delay the reduction of sulfur dioxide which it had promised to accomplish if the Board agreed to delay a requirement to reduce mercury admissions.

As a concerned mother of eight blessed with 23 young grandchildren, I demand an end to the acceptance of the constant excuses provided by polluters of our environment. There will never come a time when they can clean up without spending money. Better for them to sacrifice profits than for the citizens to have to continue to suffer damages to our health now that we have discovered what has been causing illness and premature death for too long.

The recent Board decision with regard to water testing around landfills seemed to be one based upon the high monetary costs the owners claimed would be involved while underestimating the costs in life and treasure resulting from failure to monitor possible pollution of the water supply.

Please keep in mind that the Illinois Pollution Control Board is really the last line of defense for residents of our great state.

May God bless you and guide each of you in your all important work.

Sincerely

Mary Simon
