Subject: Please Reject Ameren's Petition for a Variance (Docket No. PCB 2012-126)

Dear Illinois Pollution Control Board,

I object to Ameren's Petition for a Variance, Docket No. PCB 2012-126.

As the parent of a young child, I care about him having decent air to breathe and don't want him developing asthma.

In 2006, Illinois made history by passing a leading mercury pollution reduction standard. The original agreement included new clean air standards for mercury, sulfur dioxide (SO₂) and nitrous oxide (NO_x), which create acid rain and smog, as well as many health-related problems. Ameren committed to a schedule for reducing its SO₂ and NO_x pollution in return for more time to make its mercury pollution reductions.

The state upheld its side of the deal, but now Ameren is trying to stall cleaning up its coal plants like it promised to. Please reject the company's request for a variance and hold the company to the standard passed in 2006. The agreement to reduce mercury pollution is vital in protecting public health and the environment through Illinois and the Midwest. This is critical for my health and my son's health, our environment and the Midwest's future.

Sincerely,
Maureen King

If this was a 'regular' business - there are laws against "bait & switch" tactics and also against signing agreements you don't intend to honor. Make them keep their agreement!!

Sincerely,
Jill Liedlich

This is critical for my health, our environment and the Midwest's future.

Please, don't do this. Think about the future generations. Maybe you don't mind living in all of that filth-but what about our children? the ones who never did you any harm will need to pay for your selfish mistakes.

Do you remember when you were little? The parks were clean, you could be out all you wanted. You had no worry in the world, it was just you and the great outdoors. Now, children must worry about pollution, about littering because they need to watch out for trash in the parks. And more ominously, the air. the rate of asthmatic kids is growing do to pollution.

If you want our future generations to do well, you need to re-evaluate this situation. Don't do this. Please, don't do this.

Sincerely,
Ms. maria requena

The agreement to reduce mercury pollution is vital in protecting public health and the environment through Illinois and the Midwest. This is critical for my health, our environment and the Midwest's future.

In reality, mercury pollution is secondary to stopping greenhouse gas emissions from liberation of CO₂ from fossil fuels of all types, and as quickly as possible. If we don't we and the world's population will be faced with a very ugly future.

We must transition to non-greenhouse-gas polluting energy as quickly as possible. Don't let Amren avoid compliance.

Sincerely,
Mr. Scott Lombardo

The agreement to reduce mercury pollution is vital in protecting public health and the environment through Illinois and the Midwest. This is critical for my health, our environment and the Midwest's future.

Ameren - A Deal is a Deal!

A deal is a deal. Illinois should not to waver on pollution standards.

In 2006, Illinois made history by passing a "best in the nation" mercury pollution reduction standard. The Sierra Club worked hard to pass the Illinois mercury standard for power plants. Ameren and other power companies seized the opportunity to negotiate a deal that addressed additional pollutant limits on their Illinois coal fired power plant fleet.

Ameren, one of the largest polluters in the state, is now going back on their word and asking the Illinois Pollution Control Board (IPCB) for a free pass. If Ameren's requested "waiver" is granted, Ameren would be breaking its promise to Illinois to clean up its dirty, coal-fired power plants.

The IPCB is now accepting public comments and needs to hear from you. Ameren shouldn't get a free pass to pollute our communities!

Sincerely,
Ms. Diane Kastel

In 2006, Illinois made history by passing a leading mercury pollution reduction standard. The original agreement included new clean air standards for mercury, sulfur dioxide (SO₂) and nitrous oxide (NO_x), which create acid rain and smog, as well as many health-related problems. Ameren committed to a schedule for reducing its SO₂ and NO_x pollution in return for more time to make its mercury pollution reductions.

The state upheld its side of the deal, but now Ameren is trying to stall cleaning up its coal plants like it promised to. Please reject the company's request for a variance and hold the company to the standard passed in 2006. The agreement to reduce mercury pollution is vital in protecting public health and the environment through Illinois and the Midwest. This is critical for my health, our environment and the Midwest's future.

Sincerely,
Mr. Gregg Mierow

Subject: Please Reject Ameren's Petition for a Variance (Docket No. PCB 2012-126)

Dear Illinois Pollution Control Board,

I object to Ameren's Petition for a Variance, Docket No. PCB 2012-126.

In 2006, Illinois made history by passing a leading mercury pollution reduction standard. The original agreement included new clean air standards for mercury, sulfur dioxide (SO₂) and nitrous oxide (NO_x), which create acid rain and smog, as well as many health-related problems. Ameren committed to a schedule for reducing its SO₂ and NO_x pollution in return for more time to make its mercury pollution reductions.

The state upheld its side of the deal, but now Ameren is trying to stall cleaning up its coal plants like it promised to. Please reject the company's request for a variance and hold the company to the standard passed in 2006. The agreement to reduce mercury pollution is vital in protecting public health and the environment through Illinois and the Midwest. This is critical for my health, our environment and the Midwest's future.

If you spend any time with FAMILIES whose kids suffer from respiratory diseases, and who've lived in the shadow of dirty coal plants, you would not back down. Hold Ameren to the new clean air standards - our kids deserve clean air.

Sincerely,
Ms. Jacqueline Leavy

Subject: Please Reject Ameren's Petition for a Variance (Docket No. PCB 2012-126)

Dear Illinois Pollution Control Board,

I object to Ameren's Petition for a Variance, Docket No. PCB 2012-126.

In 2006, Illinois made history by passing a leading mercury pollution reduction standard. The original agreement included new clean air standards for mercury, sulfur dioxide (SO₂) and nitrous oxide (NO_x), which create acid rain and smog, as well as many health-related problems. Ameren committed to a schedule for reducing its SO₂ and NO_x pollution in return for more time to make its mercury pollution reductions.

The state upheld its side of the deal, but now Ameren is trying to stall cleaning up its coal plants like it promised to. Please reject the company's request for a variance and hold the company to the standard passed in 2006. The agreement to reduce mercury pollution is vital in protecting public health and the environment through Illinois and the Midwest. This is critical for my health, our environment and the Midwest's future.

Sincerely,
Ms. Mira Barbir

Subject: Please Reject Ameren's Petition for a Variance (Docket No. PCB 2012-126)

Dear Illinois Pollution Control Board,

I object to Ameren's Petition for a Variance, Docket No. PCB 2012-126.

In 2006, Illinois made history by passing a leading mercury pollution reduction standard. The original agreement included new clean air standards for mercury, sulfur dioxide (SO₂) and nitrous oxide (NO_x), which create acid rain and smog, as well as many health-related problems. Ameren committed to a schedule for reducing its SO₂ and NO_x pollution in return for more time to make its mercury pollution reductions.

The state upheld its side of the deal, but now Ameren is trying to stall cleaning up its coal plants like it promised to. Please reject the company's request for a variance and hold the company to the standard passed in 2006. The agreement to reduce mercury pollution is vital in protecting public health and the environment through Illinois and the Midwest. This is critical for my health, our environment and the Midwest's future.

Sincerely,
Mr. Manoj Vallati

Subject: Please Reject Ameren's Petition for a Variance (Docket No. PCB 2012-126)

Dear Illinois Pollution Control Board,

I object to Ameren's Petition for a Variance, Docket No. PCB 2012-126.

In 2006, Illinois made history by passing a leading mercury pollution reduction standard. The original agreement included new clean air standards for mercury, sulfur dioxide (SO₂) and nitrous oxide (NO_x), which create acid rain and smog, as well as many health-related problems. Ameren committed to a schedule for reducing its SO₂ and NO_x pollution in return for more time to make its mercury pollution reductions.

The state upheld its side of the deal, but now Ameren is trying to stall cleaning up its coal plants like it promised to. Please reject the company's request for a variance and hold the company to the standard passed in 2006. The agreement to reduce mercury pollution is vital in protecting public health and the environment through Illinois and the Midwest. This is critical for my health, our environment and the Midwest's future.

Sincerely,
Kristi Whitfield

Subject: Please Reject Ameren's Petition for a Variance (Docket No. PCB 2012-126)

Dear Illinois Pollution Control Board,

I object to Ameren's Petition for a Variance, Docket No. PCB 2012-126.

In 2006, Illinois made history by passing a leading mercury pollution reduction standard. The original agreement included new clean air standards for mercury, sulfur dioxide (SO₂) and nitrous oxide (NO_x), which create acid rain and smog, as well as many health-related problems. Ameren committed to a schedule for reducing its SO₂ and NO_x pollution in return for more time to make its mercury pollution reductions.

The state upheld its side of the deal, but now Ameren is trying to stall cleaning up its coal plants like it promised to. Please reject the company's request for a variance and hold the company to the standard passed in 2006. The agreement to reduce mercury pollution is vital in protecting public health and the environment through Illinois and the Midwest. This is critical for my health, our environment and the Midwest's future.

Sincerely,
Mr. Ryan Budgin

Subject: Please Reject Ameren's Petition for a Variance (Docket No. PCB 2012-126)

Dear Illinois Pollution Control Board,

I object to Ameren's Petition for a Variance, Docket No. PCB 2012-126.

In 2006, Illinois made history by passing a leading mercury pollution reduction standard. The original agreement included new clean air standards for mercury, sulfur dioxide (SO₂) and nitrous oxide (NO_x), which create acid rain and smog, as well as many health-related problems. Ameren committed to a schedule for reducing its SO₂ and NO_x pollution in return for more time to make its mercury pollution reductions.

The state upheld its side of the deal, but now Ameren is trying to stall cleaning up its coal plants like it promised to. Please reject the company's request for a variance and hold the company to the standard passed in 2006. The agreement to reduce mercury pollution is vital in protecting public health and the environment through Illinois and the Midwest. This is critical for my health, our environment and the Midwest's future.

Sincerely,
Mrs. Mary Ann Shatto
