Subject: Please Reject Ameren's Petition for a Variance (Docket No. PCB 2012-126)

Dear Illinois Pollution Control Board,

I object to Ameren's Petition for a Variance, Docket No. PCB 2012-126.

In 2006, Illinois made history by passing a leading mercury pollution reduction standard. The original agreement included new clean air standards for mercury, sulfur dioxide (SO₂) and nitrous oxide (NO_x), which create acid rain and smog, as well as many health-related problems. Ameren committed to a schedule for reducing its SO₂ and NO_x pollution in return for more time to make its mercury pollution reductions.

The state upheld its side of the deal, but now Ameren is trying to stall cleaning up its coal plants like it promised to. Please reject the company's request for a variance and hold the company to the standard passed in 2006. The agreement to reduce mercury pollution is vital in protecting public health and the environment through Illinois and the Midwest. This is critical for my health, our environment and the Midwest's future.

Make this company and others clean up the mess they create and stop them from outsourcing the problems they create!

Sincerely,
Mrs. Monika Merryman

In 2006, Illinois made history by passing a leading mercury pollution reduction standard. The original agreement included new clean air standards for mercury, sulfur dioxide (SO₂) and nitrous oxide (NO_x), which create acid rain and smog, as well as many health-related problems. Ameren committed to a schedule for reducing its SO₂ and NO_x pollution in return for more time to make its mercury pollution reductions.

The state upheld its side of the deal, but now Ameren is trying to stall cleaning up its coal plants like it promised to. Please reject the company's request for a variance and hold the company to the standard passed in 2006. The agreement to reduce mercury pollution is vital in protecting public health and the environment through Illinois and the Midwest. This is critical for my health, our environment and the Midwest's future.

Sincerely,
Mr. John And Rachel Heuman

Subject: Please Reject Ameren's Petition for a Variance (Docket No. PCB 2012-126)

Dear Illinois Pollution Control Board,

I object to Ameren's Petition for a Variance, Docket No. PCB 2012-126.

In 2006, Illinois made history by passing a leading mercury pollution reduction standard. The original agreement included new clean air standards for mercury, sulfur dioxide (SO₂) and nitrous oxide (NO_x), which create acid rain and smog, as well as many health-related problems. Ameren committed to a schedule for reducing its SO₂ and NO_x pollution in return for more time to make its mercury pollution reductions.

The state upheld its side of the deal, but now Ameren is trying to stall cleaning up its coal plants like it promised to. Please reject the company's request for a variance and hold the company to the standard passed in 2006. The agreement to reduce mercury pollution is vital in protecting public health and the environment through Illinois and the Midwest. This is critical for my health, our environment and the Midwest's future.

Sincerely,
Mr. DAN REDMON

Subject: Please Reject Ameren's Petition for a Variance (Docket No. PCB 2012-126)

Dear Illinois Pollution Control Board,

I object to Ameren's Petition for a Variance, Docket No. PCB 2012-126.

In 2006, Illinois made history by passing a leading mercury pollution reduction standard. The original agreement included new clean air standards for mercury, sulfur dioxide (SO₂) and nitrous oxide (NO_x), which create acid rain and smog, as well as many health-related problems. Ameren committed to a schedule for reducing its SO₂ and NO_x pollution in return for more time to make its mercury pollution reductions.

The state upheld its side of the deal, but now Ameren is trying to stall cleaning up its coal plants like it promised to. Please reject the company's request for a variance and hold the company to the standard passed in 2006. The agreement to reduce mercury pollution is vital in protecting public health and the environment through Illinois and the Midwest. This is critical for my health, our environment and the Midwest's future.

Sincerely,
Mrs. Joyce Flaherty

Miss Gregory Lachapelle

Ameren committed to a schedule for reducing its SO₂ and NO_x pollution in return for more time to make its mercury pollution reductions.

The state upheld its side of the deal, but now Ameren is trying to stall cleaning up its coal plants like it promised to. Please reject the company's request for a variance and hold the company to the standard passed in 2006. The agreement to reduce mercury pollution is vital in protecting public health and the environment through Illinois and the Midwest. This is critical for my health, our environment and the Midwest's future.

Sincerely,
Mr. Charles Miller

Subject: Please Reject Ameren's Petition for a Variance (Docket No. PCB 2012-126)

Dear Illinois Pollution Control Board,

I object to Ameren's Petition for a Variance, Docket No. PCB 2012-126.

In 2006, Illinois made history by passing a leading mercury pollution reduction standard. The original agreement included new clean air standards for mercury, sulfur dioxide (SO₂) and nitrous oxide (NO_x), which create acid rain and smog, as well as many health-related problems. Ameren committed to a schedule for reducing its SO₂ and NO_x pollution in return for more time to make its mercury pollution reductions.

The state upheld its side of the deal, but now Ameren is trying to stall cleaning up its coal plants like it promised to. Please reject the company's request for a variance and hold the company to the standard passed in 2006. The agreement to reduce mercury pollution is vital in protecting public health and the environment through Illinois and the Midwest. This is critical for my health, our environment and the Midwest's future.

Dear Illinois Pollution Control Board,

I object to Ameren's Petition for a Variance, Docket No. PCB 2012-126.

In 2006, Illinois made history by passing a leading mercury pollution reduction standard. The original agreement included new clean air standards for mercury, sulfur dioxide (SO₂) and nitrous oxide (NO_x), which create acid rain and smog, as well as many health-related problems. Ameren committed to a schedule for reducing its SO₂ and NO_x pollution in return for more time to make its mercury pollution reductions.

The state upheld its side of the deal, but now Ameren is trying to stall cleaning up its coal plants like it promised to. Please reject the company's request for a variance and hold the company to the standard passed in 2006. The agreement to reduce mercury pollution is vital in protecting public health and the environment through Illinois and the Midwest. This is critical for my health, our environment and the Midwest's future.

Sincerely,
Mr. Ryan Danzinger

The original agreement included new clean air standards for mercury, sulfur dioxide (SO₂) and nitrous oxide (NO_x), which create acid rain and smog, as well as many health-related problems. Ameren committed to a schedule for reducing its SO₂ and NO_x pollution in return for more time to make its mercury pollution reductions.

The state upheld its side of the deal, but now Ameren is trying to stall cleaning up its coal plants like it promised to. Please reject the company's request for a variance and hold the company to the standard passed in 2006. The agreement to reduce mercury pollution is vital in protecting public health and the environment through Illinois and the Midwest. This is critical for my health, our environment and the Midwest's future.

Sincerely,
Mr. Richard Stark

Subject: Please Reject Ameren's Petition for a Variance (Docket No. PCB 2012-126)

Dear Illinois Pollution Control Board,

I object to Ameren's Petition for a Variance, Docket No. PCB 2012-126.

In 2006, Illinois made history by passing a leading mercury pollution reduction standard. The original agreement included new clean air standards for mercury, sulfur dioxide (SO₂) and nitrous oxide (NO_x), which create acid rain and smog, as well as many health-related problems. Ameren committed to a schedule for reducing its SO₂ and NO_x pollution in return for more time to make its mercury pollution reductions.

The state upheld its side of the deal, but now Ameren is trying to stall cleaning up its coal plants like it promised to. Please reject the company's request for a variance and hold the company to the standard passed in 2006. The agreement to reduce mercury pollution is vital in protecting public health and the environment through Illinois and the Midwest. This is critical for my health, our environment and the Midwest's future.

Subject: Please Reject Ameren's Petition for a Variance (Docket No. PCB 2012-126)

Dear Illinois Pollution Control Board,

I object to Ameren's Petition for a Variance, Docket No. PCB 2012-126.

In 2006, Illinois made history by passing a leading mercury pollution reduction standard. The original agreement included new clean air standards for mercury, sulfur dioxide (SO₂) and nitrous oxide (NO_x), which create acid rain and smog, as well as many health-related problems. Ameren committed to a schedule for reducing its SO₂ and NO_x pollution in return for more time to make its mercury pollution reductions.

The state upheld its side of the deal, but now Ameren is trying to stall cleaning up its coal plants like it promised to. Please reject the company's request for a variance and hold the company to the standard passed in 2006. The agreement to reduce mercury pollution is vital in protecting public health and the environment through Illinois and the Midwest. This is critical for my health, our environment and the Midwest's future.

Sincerely,
Ms. Alicia Zody

The state upheld its side of the deal, but now Ameren is trying to stall cleaning up its coal plants like it promised to. Please reject the company's request for a variance and hold the company to the standard passed in 2006. The agreement to reduce mercury pollution is vital in protecting public health and the environment through Illinois and the Midwest. This is critical for my health, our environment and the Midwest's future.

Sincerely,
Kay Howard

Subject: Please Reject Ameren's Petition for a Variance (Docket No. PCB 2012-126)

Dear Illinois Pollution Control Board,

I object to Ameren's Petition for a Variance, Docket No. PCB 2012-126.

In 2006, Illinois made history by passing a leading mercury pollution reduction standard. The original agreement included new clean air standards for mercury, sulfur dioxide (SO₂) and nitrous oxide (NO_x), which create acid rain and smog, as well as many health-related problems. Ameren committed to a schedule for reducing its SO₂ and NO_x pollution in return for more time to make its mercury pollution reductions.

The state upheld its side of the deal, but now Ameren is trying to stall cleaning up its coal plants like it promised to. Please reject the company's request for a variance and hold the company to the standard passed in 2006. The agreement to reduce mercury pollution is vital in protecting public health and the environment through Illinois and the Midwest. This is critical for my health, our environment and the Midwest's future.

Sincerely,
Ms. Alden Bullwinkle-Hatton
