Subject: Please Reject Ameren's Petition for a Variance (Docket No. PCB 2012-126)

Dear Illinois Pollution Control Board,

I object to Ameren's Petition for a Variance, Docket No. PCB 2012-126.

In 2006, Illinois made history by passing a leading mercury pollution reduction standard. The original agreement included new clean air standards for mercury, sulfur dioxide (SO₂) and nitrous oxide (NO_x), which create acid rain and smog, as well as many health-related problems. Ameren committed to a schedule for reducing its SO₂ and NO_x pollution in return for more time to make its mercury pollution reductions.

The state upheld its side of the deal, but now Ameren is trying to stall cleaning up its coal plants like it promised to. Please reject the company's request for a variance and hold the company to the standard passed in 2006. The agreement to reduce mercury pollution is vital in protecting public health and the environment through Illinois and the Midwest. This is critical for my health, our environment and the Midwest's future.

I think it is time we got serious about implementing practices that will lead to cleaner air. What good is experience if we don't learn from it? How many more people need to become ill before significant preventive measures are taken? It is your responsibility to stand firm on behalf of all residents of the state and enforce the limits.

Sincerely,
Mr. Robert Kass

Subject: Please Reject Ameren's Petition for a Variance (Docket No. PCB 2012-126)

Dear Illinois Pollution Control Board,

I object to Ameren's Petition for a Variance, Docket No. PCB 2012-126.

In 2006, Illinois made history by passing a leading mercury pollution reduction standard. The original agreement included new clean air standards for mercury, sulfur dioxide (SO₂) and nitrous oxide (NO_x), which create acid rain and smog, as well as many health-related problems. Ameren committed to a schedule for reducing its SO₂ and NO_x pollution in return for more time to make its mercury pollution reductions.

I maintain a real sense of pride in our state's leadership in requiring power plants to maintain strong coal plant performance promoting clean air for healthier Illinois citizens.

The state upheld its side of the agreement, but Ameren is trying to stall the cleaning up of its coal plants as it promised.

Please reject Ameren's's request for this variance. Hold this company to the standard passed in 2006.

The agreement to reduce mercury pollution is vital in protecting public health and the environment throughout Illinois and the Midwest. Further, this pollution reduction is critical for my own health & that of my family, for our environment, and for the Midwest's developing future.

Respectfully,
Patricia Procter

Sincerely,
Mrs. Patricia Procter

Subject: Please Reject Ameren's Petition for a Variance (Docket No. PCB 2012-126)

Dear Illinois Pollution Control Board,

I object to Ameren's Petition for a Variance, Docket No. PCB 2012-126.

If Ameren gets away with backing out of its deal, then all the polluters in the state will want to open the floodgates and valves to anything that will save them some money. Ultimately, the whole society, mainly us taxpayers, end up paying for their free ride from these externalities, just so the CEO can enjoy a huge bonus from cutting expenses.

The only thing they're concerned about is the bottom line; therefore, we should put public health first and let the market with help from human ingenuity adjust accordingly. If we can put a man on the Moon, then I'm sure we can produce some energy without choking on all those fumes.

In 2006, Illinois made history by passing a leading mercury pollution reduction standard. The original agreement included new clean air standards for mercury, sulfur dioxide (SO₂) and nitrous oxide (NO_x), which create acid rain and smog, as well as many health-related problems. Ameren committed to a schedule for reducing its SO₂ and NO_x pollution in return for more time to make its mercury pollution reductions.

The agreement to reduce mercury pollution is vital in protecting public health and the environment through Illinois and the Midwest. This is critical for my health, our environment and the Midwest's future.

We allowed them additional time to stop poisoning us with mercury pollution because they said they would also reduce acid-producing sulfur and nitrogen oxide pollution. Now that the extended deadline is coming, they want a waiver! In other words, they have taken NO ACTION to clean up their emissions, which demonstrates that they intended all along to ignore the law because they do not like it! Do not let them pour even more poison into our air and lungs--hold them to the extended deadline and levy LARGE fines for non-compliance.

Sincerely,
Ms. Elizabeth Cerny

Subject: Please Reject Ameren's Petition for a Variance (Docket No. PCB 2012-126)

Dear Illinois Pollution Control Board,

I object to Ameren's Petition for a Variance, Docket No. PCB 2012-126.

As an Environmental Scientist since 1975, with 17 years of experience working for the nation's largest coal producer, I know all too well about the dangers of coal powered electrical facilities. I was on the front lines in the scientific studies on acid rain. Our meteorological and sampling stations covered the United States from coast to coast and were among the best in the nation and our own laboratories were state of the art facilities. I personally managed our regional laboratories in Kentucky and Ohio and got my start at our Central Laboratory in Illinois.

Our studies were a part of a much larger study controlled by the Bituminous Coal Research Association. My knowledge and experience on this subject is unquestionably exhaustive, and as a resident of the State of Illinois, I am extremely troubled and distressed that Ameren is trying to renege on its promise to clean up its dirty coal-fired power plants. The IPCB needs to reject this request to protect the health and general well-being of all Illinois residents.

I have personally analyzed the emissions from these plants and have gathered indisputable evidence that these plants emit toxic pollutants that have severe adverse effects on the human population. It would be an egregious mistake to allow a waiver to Ameren or any coal fired power plant at this late date. It is not as if the hazards of these toxic pollutants were just learned about yesterday. We have known for over three decades that these substances are extremely hazardous to humans. I urge you to stand up for the people of Illinois and emphatically deny any requests for a waiver of Ameren's promise to clean up its act. A promise is a promise and a deal is a deal, and it is already past time for these toxic pollutants to be rendered harmless to the American population.

Granting a waiver to Ameren would make the IPCB complicit with the polluters and I will personally hold the IPCB equally responsible for any and all health related problems due to these emissions if the Board grants a waiver to Ameren to continue to pollute our fragile environment. This simply must not happen and should not even be considered as an option of the IPCB. The people of Illinois rely on the IPCB, EPA, and other regulatory agencies to protect the health of the public from the polluters of this state. Please, do not grant Ameren a waiver from their agreed upon responsibilities to clean up their toxic,

hazardous, air pollutants.

In 2006, Illinois made history by passing a leading mercury pollution reduction standard. The original agreement included new clean air standards for mercury, sulfur dioxide (SO₂) and nitrous oxide (NO_x), which create acid rain and smog, as well as many health-related problems. Ameren committed to a schedule for reducing its SO₂ and NO_x pollution in return for more time to make its mercury pollution reductions.

The state upheld its side of the deal, but now Ameren is trying to stall cleaning up its coal plants like it promised to. Please reject the company's request for a variance and hold the company to the standard passed in 2006. The agreement to reduce mercury pollution is vital in protecting public health and the environment through Illinois and the Midwest. This is critical for my health, our environment and the Midwest's future.

Sincerely,
Mr. Stephen Bennett

Subject: Please Reject Ameren's Petition for a Variance (Docket No. PCB 2012-126)

Dear Illinois Pollution Control Board,

I object to Ameren's Petition for a Variance, Docket No. PCB 2012-126.

In 2006, Illinois made history by passing a leading mercury pollution reduction standard. The original agreement was indicative of its lack of understanding of the most basic organic chemistry principles.

The state upheld its side of the deal, and now Ameren is still cleaning up its coal plants like it promised to. Please allow the company's request for a variance. The agreement to reduce mercury pollution is being met and the alarmists need to be silenced, as their issues have no basis in fact. This is critical for my health, our country's economic future and the Midwest's future.

Lay off Ameren please!! Give or state, and our country, a chance!!!
Sierra Club needs to get a clue.

Sincerely,
Helen Trzupek

Subject: Please Reject Ameren's Petition for a Variance (Docket No. PCB 2012-126)

Dear Illinois Pollution Control Board,

I object to Ameren's Petition for a Variance, Docket No. PCB 2012-126.

In 2006, Illinois made history by passing a leading mercury pollution reduction standard. The original agreement included new clean air standards for mercury, sulfur dioxide (SO₂) and nitrous oxide (NO_x), which create acid rain and smog, as well as many health-related problems. Ameren committed to a schedule for reducing its SO₂ and NO_x pollution in return for more time to make its mercury pollution reductions.

The state upheld its side of the deal, but now Ameren is trying to stall cleaning up its coal plants like it promised to. Please reject the company's request for a variance and hold the company to the standard passed in 2006. The agreement to reduce mercury pollution is vital in protecting public health and the environment through Illinois and the Midwest. This is critical for my health, our environment and the Midwest's future.

Sincerely,
Cary Helms

Subject: Please Reject Ameren's Petition for a Variance (Docket No. PCB 2012-126)

Dear Illinois Pollution Control Board,

I object to Ameren's Petition for a Variance, Docket No. PCB 2012-126.

In 2006, Illinois made history by passing a leading mercury pollution reduction standard. The original agreement included new clean air standards for mercury, sulfur dioxide (SO₂) and nitrous oxide (NO_x), which create acid rain and smog, as well as many health-related problems. Ameren committed to a schedule for reducing its SO₂ and NO_x pollution in return for more time to make its mercury pollution reductions.

The state upheld its side of the deal, but now Ameren is trying to stall cleaning up its coal plants like it promised to. Please reject the company's request for a variance and hold the company to the standard passed in 2006. The agreement to reduce mercury pollution is vital in protecting public health and the environment through Illinois and the Midwest. This is critical for my health, our environment and the Midwest's future.

Sincerely,
Ms. Dagmar Wolf

Subject: Please Reject Ameren's Petition for a Variance (Docket No. PCB 2012-126)

Dear Illinois Pollution Control Board,

I object to Ameren's Petition for a Variance, Docket No. PCB 2012-126.

In 2006, Illinois made history by passing a leading mercury pollution reduction standard. The original agreement included new clean air standards for mercury, sulfur dioxide (SO₂) and nitrous oxide (NO_x), which create acid rain and smog, as well as many health-related problems. Ameren committed to a schedule for reducing its SO₂ and NO_x pollution in return for more time to make its mercury pollution reductions.

The state upheld its side of the deal, but now Ameren is trying to stall cleaning up its coal plants like it promised to. Please reject the company's request for a variance and hold the company to the standard passed in 2006. The agreement to reduce mercury pollution is vital in protecting public health and the environment through Illinois and the Midwest. This is critical for my health, our environment and the Midwest's future.

Sincerely,
Mr. Joseph Stieglitz

Illinois Pollution Control Board
IL

Subject: Please Reject Ameren's Petition for a Variance (Docket No. PCB 2012-126)

Dear Illinois Pollution Control Board,

I object to Ameren's Petition for a Variance, Docket No. PCB 2012-126.

In 2006, Illinois made history by passing a leading mercury pollution reduction standard. The original agreement included new clean air standards for mercury, sulfur dioxide (SO₂) and nitrous oxide (NO_x), which create acid rain and smog, as well as many health-related problems. Ameren committed to a schedule for reducing its SO₂ and NO_x pollution in return for more time to make its mercury pollution reductions.

The state upheld its side of the deal, but now Ameren is trying to stall cleaning up its coal plants like it promised to. Please reject the company's request for a variance and hold the company to the standard passed in 2006. The agreement to reduce mercury pollution is vital in protecting public health and the environment through Illinois and the Midwest. This is critical for my health, our environment and the Midwest's future.

Sincerely,
Mr. Dan Popp

Subject: Please Reject Ameren's Petition for a Variance (Docket No. PCB 2012-126)

Dear Illinois Pollution Control Board,

I object to Ameren's Petition for a Variance, Docket No. PCB 2012-126.

In 2006, Illinois made history by passing a leading mercury pollution reduction standard. The original agreement included new clean air standards for mercury, sulfur dioxide (SO₂) and nitrous oxide (NO_x), which create acid rain and smog, as well as many health-related problems. Ameren committed to a schedule for reducing its SO₂ and NO_x pollution in return for more time to make its mercury pollution reductions.

The state upheld its side of the deal, but now Ameren is trying to stall cleaning up its coal plants like it promised to. Please reject the company's request for a variance and hold the company to the standard passed in 2006. The agreement to reduce mercury pollution is vital in protecting public health and the environment through Illinois and the Midwest. This is critical for my health, our environment and the Midwest's future.

Sincerely,
Patricia Moffett-Ward

Subject: Please Reject Ameren's Petition for a Variance (Docket No. PCB 2012-126)

Dear Illinois Pollution Control Board,

I object to Ameren's Petition for a Variance, Docket No. PCB 2012-126.

In 2006, Illinois made history by passing a leading mercury pollution reduction standard. The original agreement included new clean air standards for mercury, sulfur dioxide (SO₂) and nitrous oxide (NO_x), which create acid rain and smog, as well as many health-related problems. Ameren committed to a schedule for reducing its SO₂ and NO_x pollution in return for more time to make its mercury pollution reductions.

The state upheld its side of the deal, but now Ameren is trying to stall cleaning up its coal plants like it promised to. Please reject the company's request for a variance and hold the company to the standard passed in 2006. The agreement to reduce mercury pollution is vital in protecting public health and the environment through Illinois and the Midwest. This is critical for my health, our environment and the Midwest's future.

Sincerely,
Mr. David Ogorzaly

Subject: Please Reject Ameren's Petition for a Variance (Docket No. PCB 2012-126)

Dear Illinois Pollution Control Board,

I object to Ameren's Petition for a Variance, Docket No. PCB 2012-126.

In 2006, Illinois made history by passing a leading mercury pollution reduction standard. The original agreement included new clean air standards for mercury, sulfur dioxide (SO₂) and nitrous oxide (NO_x), which create acid rain and smog, as well as many health-related problems. Ameren committed to a schedule for reducing its SO₂ and NO_x pollution in return for more time to make its mercury pollution reductions.

The state upheld its side of the deal, but now Ameren is trying to stall cleaning up its coal plants like it promised to. Please reject the company's request for a variance and hold the company to the standard passed in 2006. The agreement to reduce mercury pollution is vital in protecting public health and the environment through Illinois and the Midwest. This is critical for my health, our environment and the Midwest's future.

Sincerely,
Mr. Andrew Pokin

Ameren committed to a schedule for reducing its SO₂ and NO_x pollution in return for more time to make its mercury pollution reductions.

The state upheld its side of the deal, but now Ameren is trying to stall cleaning up its coal plants like it promised to. Please reject the company's request for a variance and hold the company to the standard passed in 2006. The agreement to reduce mercury pollution is vital in protecting public health and the environment through Illinois and the Midwest. This is critical for my health, our environment and the Midwest's future.

Sincerely,
Ms. Diane Niesman

Subject: Please Reject Ameren's Petition for a Variance (Docket No. PCB 2012-126)

Dear Illinois Pollution Control Board,

I object to Ameren's Petition for a Variance, Docket No. PCB 2012-126.

In 2006, Illinois made history by passing a leading mercury pollution reduction standard. The original agreement included new clean air standards for mercury, sulfur dioxide (SO₂) and nitrous oxide (NO_x), which create acid rain and smog, as well as many health-related problems. Ameren committed to a schedule for reducing its SO₂ and NO_x pollution in return for more time to make its mercury pollution reductions.

The state upheld its side of the deal, but now Ameren is trying to stall cleaning up its coal plants like it promised to. Please reject the company's request for a variance and hold the company to the standard passed in 2006. The agreement to reduce mercury pollution is vital in protecting public health and the environment through Illinois and the Midwest. This is critical for my health, our environment and the Midwest's future.

I object to Ameren's Petition for a Variance, Docket No. PCB 2012-126.

In 2006, Illinois made history by passing a leading mercury pollution reduction standard. The original agreement included new clean air standards for mercury, sulfur dioxide (SO₂) and nitrous oxide (NO_x), which create acid rain and smog, as well as many health-related problems. Ameren committed to a schedule for reducing its SO₂ and NO_x pollution in return for more time to make its mercury pollution reductions.

The state upheld its side of the deal, but now Ameren is trying to stall cleaning up its coal plants like it promised to. Please reject the company's request for a variance and hold the company to the standard passed in 2006. The agreement to reduce mercury pollution is vital in protecting public health and the environment through Illinois and the Midwest. This is critical for my health, our environment and the Midwest's future.

Sincerely,
Ms. Mary Kullman

Illinois Pollution Control Board
IL

Subject: Please Reject Ameren's Petition for a Variance (Docket No. PCB 2012-126)

Dear Illinois Pollution Control Board,

I object to Ameren's Petition for a Variance, Docket No. PCB 2012-126.

In 2006, Illinois made history by passing a leading mercury pollution reduction standard. The original agreement included new clean air standards for mercury, sulfur dioxide (SO₂) and nitrous oxide (NO_x), which create acid rain and smog, as well as many health-related problems. Ameren committed to a schedule for reducing its SO₂ and NO_x pollution in return for more time to make its mercury pollution reductions.

The state upheld its side of the deal, but now Ameren is trying to stall cleaning up its coal plants like it promised to. Please reject the company's request for a variance and hold the company to the standard passed in 2006. The agreement to reduce mercury pollution is vital in protecting public health and the environment through Illinois and the Midwest. This is critical for my health, our environment and the Midwest's future.

Sincerely,
Miss Sarah Winblad
