

**PROBLEM:**  
Water Pollution  
from Animal  
Waste

The water sources for about 43% of the U.S. have had pathogen contamination associated with manure.

29 states have identified other pollution problems from CAFOs

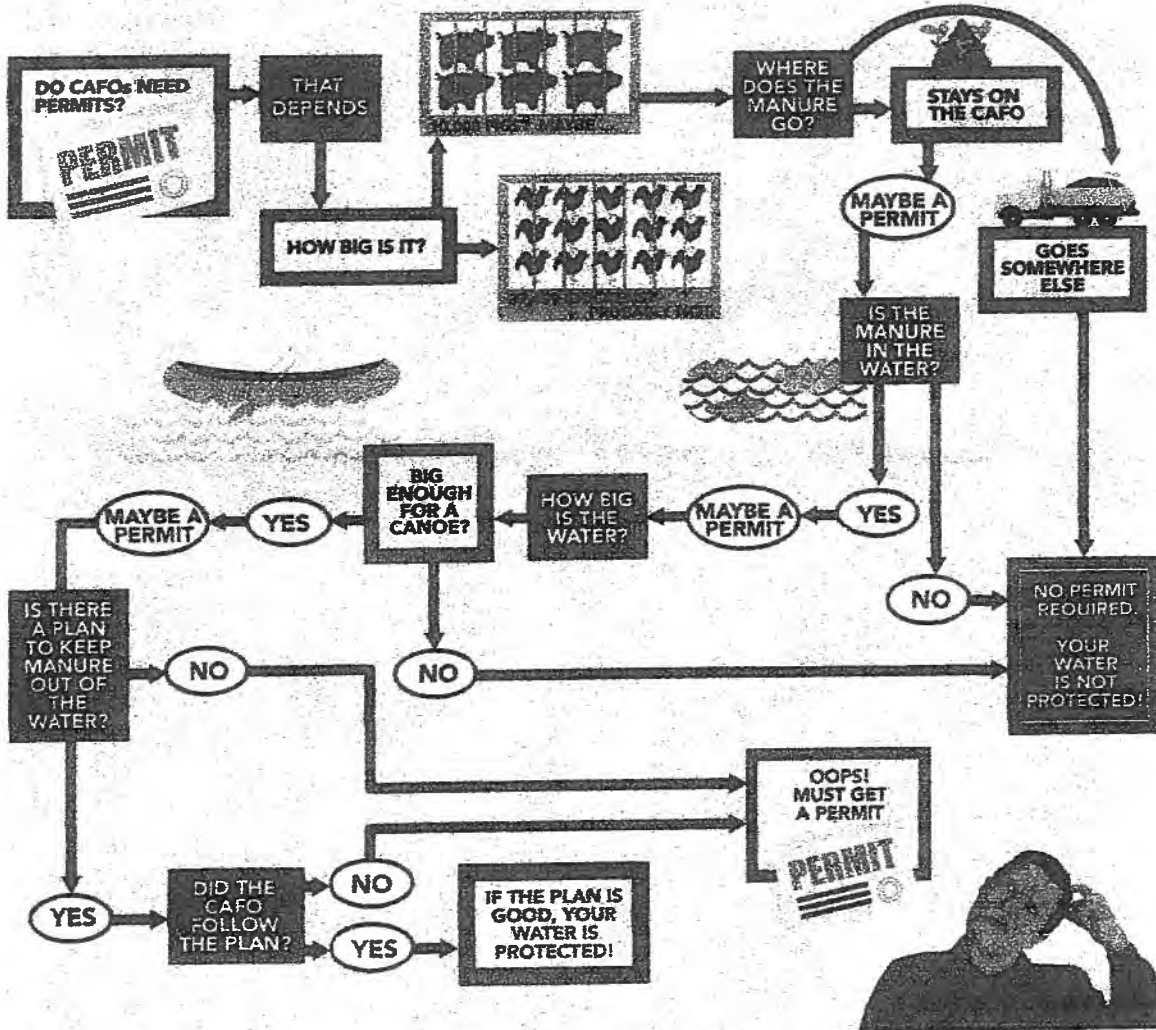

YUCK!

**IS ANYONE RESPONSIBLE FOR KEEPING OUR WATER SAFE?**

**THE CLEAN WATER ACT SAYS ...**  
The EPA must keep our waters clean. Polluters must have permits.

**WANT CLEAN WATER? CLEAN UP THE RULES!**

**NEW RULES SHOULD:**

- > Require more CAFOs to obtain Clean Water Act permits.
- > Ensure that meat processors that own the animals on CAFOs share the responsibility for manure management.
- > Make CAFO operations adopt waste management practices that keep pollutants out of the water.
- > Ensure that waste moved from a CAFO is tracked and regulated.
