RE: PCB 2013-024

Mr. Therriault

Midwest Generation's dirty coal plants in Illinois have been dumping dangerous sulfur dioxide emissions into the air and making local residents sick for far too long. In order to reduce dangerous pollution and save lives in Illinois, I urge you to require the company to meet the pollution reductions it previously agreed to by voting no on the requested variance.

Sincerely,

Barbara Shapiro

RE: PCB 2013-024

Mr. Therriault

I do not want my family breathing that stuff, what is the issue? CEOs and board members make record profits and get huge bonuses, but somehow they CAN'T AFFORD to do the right thing? Pardon me if I am not sympathetic, as they accelerate global warming and send the world rushing out of the tail end of our last temperate period! The cool days are over soon, thanks guys. There are far better ways to get our power than coal. Just shut them down if they will not comply. Midwest Generation's dirty coal plants in Illinois have been dumping dangerous sulfur dioxide emissions into the air and making local residents sick for far too long. In order to reduce dangerous pollution and save lives in Illinois, I urge you to require the company to meet the pollution reductions it previously agreed to by voting no on the requested variance.

RE: PCB 2013-024

Mr. Therriault

How dare Midwest Generation try to skate on its promise to clean up the Waukegan power plant? They are a pure profit operation. Any claim that they "can't afford" to make the badly needed improvements on a power plant that is a blight on the Lake Michigan shore are beyond offensive to those of us who live in its shadow. Hold them accountable to the promises they've made. We are still dealing with the aftermath of the liars at Johns-Manville and the mess they left on the lakeshore. No other giant corporation should be allowed to ruin our community further. They should be developing renewable resources for energy production, but they refuse to even try. So if they insist on continuing to burn coal, they must assume the responsibility for its pollution, now. Midwest Generation's dirty coal plants in Illinois have been dumping dangerous sulfur dioxide emissions into the air and making local residents sick for far too long. In order to reduce dangerous pollution and save lives in Illinois, I urge you to require the company to meet the pollution reductions it previously agreed to by voting no on the requested variance.

Sincerely,
