RE: PCB 2013-024

Mr. Therriault

Midwest Generation's dirty coal plants in Illinois have been dumping dangerous sulfur dioxide emissions into the air and making local residents sick for far too long. In order to reduce dangerous pollution and save lives in Illinois, I urge you to require the company to meet the pollution reductions it previously agreed to by voting no on the requested variance.

Sincerely,

Wyman Whipple

RE: PCB 2013-024

Mr. Therriault

Midwest Generation's dirty coal plants in Illinois have been dumping dangerous sulfur dioxide emissions into the air and making local residents sick for far too long. In order to reduce dangerous pollution and save lives in Illinois, I urge you to require the company to meet the pollution reductions it previously agreed to by voting no on the requested variance. Midwest Generation has had ample warning for quite a few years that it would be wise to switch to renewable energy and instead has ignored this for the bottom line. Their profits are quite healthy and what would it cost them in health costs and quality of life for people's health in the impacted areas (and globally as wind currents do not take note of borders), not to mention the costs to our common resources of air, food and water.

Sincerely,

Savannah Hawkins

RE: PCB 2013-024

Mr. Therriault

I am a resident of Urbana, IL. Thank you for your service to the people of Illinois. Today, I would like to say a few words about Midwest Generation's request to delay stricter pollution control for two more years. I believe Midwest Generation's dirty coal plants in Illinois have been dumping dangerous sulfur dioxide emissions into the air and making local residents sick for far too long. In order to reduce pollution and save lives and healthcare cost in Illinois, I strongly urge you to require the company to meet the pollution reductions it previously agreed to by voting *NO* on the requested variance.

Sincerely,

Taka Ono
