RE: PCB 2013-024

Mr. Therriault

Midwest Generation's dirty coal plants in Illinois have been dumping dangerous sulfur dioxide emissions into the air and making local residents sick for far too long. In order to reduce dangerous pollution and save lives in Illinois, I urge you to require the company to meet the pollution reductions it previously agreed to by voting no on the requested variance.

Sincerely,

Jady Carmichael

RE: PCB 2013-024

Mr. Therriault

If Midwest cannot afford to install pollution controls at their coal plants in Will County, Waukegan and Pekin, then too bad, but the answer should be no. Sadly many people cannot afford their Asthma and breathing medications and that should trump their pity party. Midwest Generation's dirty coal plants in Illinois have been dumping dangerous sulfur dioxide emissions into the air and making local residents sick for far too long. In order to reduce dangerous pollution and save lives in Illinois, I urge you to require the company to meet the pollution reductions it previously agreed to by voting no on the requested variance. Please do what is right - despite their "crying poor" and the economics of the issue.
