RE: PCB 2013-024

Mr. Therriault

Midwest Generation's dirty coal plants in Illinois have been dumping dangerous sulfur dioxide emissions into the air and making local residents sick for far too long. In order to reduce dangerous pollution and save lives in Illinois, I urge you to require the company to meet the pollution reductions it previously agreed to by voting no on the requested variance.

Sincerely,

Rick Hogan

RE: PCB 2013-024

Mr. Therriault

I am an Illinois resident who is very distressed about the actions of Midwest Generation and its coal power plants. Why should this company continue to be allowed to dump dangerous sulfur dioxide emissions into the air when the technology exists to make the plants cleaner and safer? Particularly in an era when wind power and solar power are becoming better and better alternatives, this variance should not be granted. Dirty coal fumes make local residents sick and continue a reliance on inefficient forms of energy. Corporations must do better. In order to reduce dangerous pollution and save lives in my state, I urge you to require the company to meet the pollution reductions it previously agreed to by voting no on the requested variance.

RE: PCB 2013-024

Mr. Therriault

It's time and long overdue for the Pollution Control Board to take action and require Midwest Generation to honor the 2007 agreement made by it's parent company by the Pollution Control Board International to install pollution controls at there coal fired plants in Will County. It's already had five years to begin implementing the agreed upon pollution controls and has made no effort to comply with it's promise to take action. M G continues defy and make a mockery of the PCB with impunity. It's obvious they fear no repercussions by the Pollution Control Board treating it as an impotent entity to be scorned and ignored. It's time for the PCB to take a firm stand and reject MB's request for an extension. The citizens of Illinois are expecting nothing less when it comes to the public health.

RE: PCB 2013-024

Mr. Therriault

Midwest Generation's dirty coal plants in Illinois have been dumping dangerous sulfur dioxide emissions into the air and making local residents sick for far too long. In order to reduce dangerous pollution and save lives in Illinois, I urge you to require the company to meet the pollution reductions it previously agreed to by voting no on the requested variance.

Sincerely,

Peter Stepaniuk
