Subject: PCB Docket 12-126 -- Don't Give Dynege Permission to Pollute!

PCB 12-126

Jun 5, 2013

Illinois Pollution Control Board
IL

Dear Control Board,

Don't give Illinois coal plants a free pass to pollute. I urge you to reject the request (PCB 12-126) to let five coal plants violate Illinois air pollution limits for the next five years.

I believe that every Illinois citizen has the right to breathe clean air and to have a healthy communities. Dynege, in seeking to purchase five coal plants in Illinois, should be expected to play by the rules and comply with our state's air quality standards. For too long, the communities surrounding these plants have been negatively impacted by coal pollution. In 2006, when the Illinois Multi-Pollutant standard went into effect, people living near these plants expected things to improve. Please don't let Dynege now violate that trust, by giving them permission to pollute our air.

Sincerely,

Donald Rosentreter

Dear Control Board,

Don't give Illinois coal plants a free pass to pollute. I urge you to reject the request (PCB 12-126) to let five coal plants violate Illinois air pollution limits for the next five years.

I believe that every Illinois citizen has the right to breathe clean air and to have a healthy communities. Dynegy, in seeking to purchase five coal plants in Illinois, should be expected to play by the rules and comply with our state's air quality standards. For too long, the communities surrounding these plants have been negatively impacted by coal pollution. In 2006, when the Illinois Multi-Pollutant standard went into effect, people living near these plants expected things to improve. Please don't let Dynegy now violate that trust, by giving them permission to pollute our air.

Subject: PCB Docket 12-126 -- Don't Give Dynegey Permission to Pollute!

Jun 5, 2013

Illinois Pollution Control Board
IL

Dear Control Board,

Don't give Illinois coal plants a free pass to pollute. I urge you to reject the request (PCB 12-126) to let five coal plants violate Illinois air pollution limits for the next five years.

I believe that every Illinois citizen has the right to breathe clean air and to have a healthy communities. Dynegey, in seeking to purchase five coal plants in Illinois, should be expected to play by the rules and comply with our state's air quality standards. For too long, the communities surrounding these plants have been negatively impacted by coal pollution. In 2006, when the Illinois Multi-Pollutant standard went into effect, people living near these plants expected things to improve. Please don't let Dynegey now violate that trust, by giving them permission to pollute our air.

Sincerely,

Maria Aiello

I believe that every Illinois citizen has the right to breathe clean air and to have a healthy communities. Dynegy, in seeking to purchase five coal plants in Illinois, should be expected to play by the rules and comply with our state's air quality standards. For too long, the communities surrounding these plants have been negatively impacted by coal pollution. In 2006, when the Illinois Multi-Pollutant standard went into effect, people living near these plants expected things to improve. Please don't let Dynegy now violate that trust, by giving them permission to pollute our air.

I do not understand why this is even a consideration. Why would they need an exemption to pollute in excess for 5 years? Common Sense should be our compass on this one. Think of the communities and the people of Illinois.

Sincerely,

Chris Clampitt

Illinois Pollution Control Board
IL

Dear Control Board,

Don't give Illinois coal plants a free pass to pollute. I urge you to reject the request (PCB 12-126) to let five coal plants violate Illinois air pollution limits for the next five years.

I believe that every Illinois citizen has the right to breathe clean air and to have a healthy communities. Dynegey, in seeking to purchase five coal plants in Illinois, should be expected to play by the rules and comply with our state's air quality standards. For too long, the communities surrounding these plants have been negatively impacted by coal pollution. In 2006, when the Illinois Multi-Pollutant standard went into effect, people living near these plants expected things to improve. Please don't let Dynegey now violate that trust, by giving them permission to pollute our air.

Coal-powered plants in Illinois should be required to replace their coal plants with concentrated solar and scalable Liquid-Metal Batteries in 2 years, as per this attachment:

FINALLY SOLVED:
LARGE-SCALE ELECTRICITY-STORAGE,
THE FINAL TECHNICAL HURDLE FOR RENEWABLE (Non-Nuclear) ENERGY, SOLVED BY MIT AND LMBC

The way to go is neither Natural Gas, nor Fracking, nor Arctic drilling, nor Mountain Top Removal, nor Coal, nor Oil nor Nuclear Plants, nor Keystone XL, but more bio-diesel; and electric-vehicles, and battery-swapping stations from www.betterplace.com ; and more recharging kiosks from www.aerovironment.com (evsc@avinc.com). And electricity generated by parabolic-mirror solar-thermal collectors from 6 companies: www.zenithsolar.com ; www.solel.com ; www.sopogy.com ; www.suntrough.com ; www.ausra.com ; www.arevasolar.com ; and a 7th: www.sunfurnace.com ; and from cities' of 8 K or more sewage-gas electricity-generation (www.2g-cenergy.com) Furthermore, MIT Prof. Donald Sadoway and his team of students have finally solved the last technical obstacle to widespread and rapid application of renewable (non-nuclear) energy : the electricity storage problem. They do it with large, Liquid-Metal batteries that use abundant and inexpensive metals, thus meeting the current price-point of electricity supply and without government subsidies! Here is the link to his fascinating and convincing lecture (which mentions also his and his students' company: LMBC (Liquid-Metal-Battery Company)):

http://www.ted.com/talks/donald_sadoway_the_missing_link_to_renewable_energy.html?goback=.yahoomail

EMERGENCY CLIMATE RESCUE BILL

Don't propose and don't enact "cap & trade", but do propose and do enact NASA Climatologist James Hansen's proposal for "fee & dividend"; as part of an EMERGENCY CLIMATE RESCUE ACT (ECRA) with the following provisions:

"Fee-and-dividend, in contrast, is a non-tax. The fee of \$115 per ton of atmospheric carbon at the mine, well-head and point of entry would appear to increase the price of fossil fuel energy. But 100 % of that fee is distributed monthly to the public as electronic deposits to the bank account or debit card, or mailed Green Vouchers or a Green-Goods and Services account on State-Administered Food Stamps, to effectively cover all residents, with half shares for children, up to two children per family.

"The dividend keeps families whole while providing an economic stimulus to boot. By the time the fee reaches \$115 per ton of carbon dioxide (equivalent to \$1 per gallon of gasoline) the dividend will be \$2,000-\$3,000 per legal resident per year \$6,000-\$9000 for a family with two or more children.

"People who keep their carbon footprint smaller than average will make money. The fee will rise gradually so people have a chance to choose more efficient vehicles, insulate their homes, and so on. The dividend will help people afford these investments. Jobs will be created as society retools the economy from high-carbon to low." (For all of Hansen's article; see: www.w-e-r-co.com ; click Pro-Live/Pro-Green Tab

Pass a Highway Budget that funds growing, alongside Federal Highways and Interstates, camelina (a thick grass, not humanly edible, that grows well even in marginal soils, in nearly all climates, and is a good rotation crop), that can be processed into excellent bio-diesel (see testimony of Jeff Trucksess, of Green Earth Fuels, LLC, before a Small Business Sub-Committee of the US House of Representatives [www.house.gov/smbiz/hearings/hearing-06-11-08-biofuels/hearing]), or switch-grass, a good alternative to coal, in moister climates, and to do so in public/private joint ventures including the United Mine Workers and the Oil, Chemical and Atomic Workers, Unions. And to (e- encourage Counties and States to do the same along their roadways.

Include a section in the law requiring gasoline-filling stations to install www.aerovironment.com ; etc.. re-charging stalls, at their oil-company supplier's expense, by 2020 ; and battery-swapping stations from www.betterplace.com by 2025, which can be paid for by Green-Energy Victory Bonds; and by proceeds from a 50% surtax to list price per retail gallon for those oil companies that don't pay for the retrofit of their allied stations by the due date, with those tax funds to go into revolving loans at variable equal to-COLA interest rates to those companies that do the retrofitting.

The interlocking boards of directors of Big Oil, Big Coal, Big Auto, Big Banks, and Big Insurance have been doing private central planning of the US and World economies since at least 1939; it is time to do a bit of Indicative Central Planning (in the DeGaulle and Eisenhower Interstate models), to speed the transition to clean, renewable (non-nuclear, non-natural gas) fuels and away from dirty fuels to prevent ever worsening climate catastrophes.

cc: US Senators Durbin and Kirk (e-sent) US Representatives Shimkus, Schock and Davis (e-sent) Illinois Governor Quinn (Sent) Illinois Representative Davidsmeyer (Sent) Illinois Senator McCann (Sent)
President Obama (e-sent)
House Speaker Boehner (e-sent)
House Minority Leader Pelosi (e-sent)
President of the Senate, US VP Biden (e-sent) Senate Majority Leader Reid (e-sent) Senate Minority Leader McConnell (e-sent) AFL-CIO President Trumka (USPS) United Mine Workers President Roberts (USPS) United Steel Workers President Gerard (USPS) USW VP at Large for Oil Chemical Atomic and Allied Workers Phillips (USPS) Rep Waxman (e-sent) Senator Whitehouse (e-sent) (The other persons: pending funds were mailed via USPS)

We have a 60% Employee-owned Co. which hopes to be able to re-train and employ coal and oil workers to have jobs in this kind of Green Energy production and distribution; www.w-e-r-co.com

I propose classical, Lincolnesque legislative log-rolling: For as many Republicans in Congress and the State Legislatures as Vote for this Emergency Climate Rescue Bill, and against Keystone XL, that many Democrats will vote for the Human Life Begins at Conception/Fertilization/Insemination Bill.

Illinois Pollution Control Board
IL

Dear Control Board,

Don't give Illinois coal plants a free pass to pollute. I urge you to reject the request (PCB 12-126) to let five coal plants violate Illinois air pollution limits for the next five years.

I believe that every Illinois citizen has the right to breathe clean air and to have a healthy communities. Dynegy, in seeking to purchase five coal plants in Illinois, should be expected to play by the rules and comply with our state's air quality standards. For too long, the communities surrounding these plants have been negatively impacted by coal pollution. In 2006, when the Illinois Multi-Pollutant standard went into effect, people living near these plants expected things to improve. Please don't let Dynegy now violate that trust, by giving them permission to pollute our air.

Sincerely,

Robert Linzmeier

Dear Control Board,

Don't give Illinois coal plants a free pass to pollute. I urge you to reject the request (PCB 12-126) to let five coal plants violate Illinois air pollution limits for the next five years.

This is a children's rights issue, as well as an environmental justice issue. Illinois in 2006 passed a prevention focused Lead Poisoning Prevention Act that aims to protect children from lead in the environment. We should continue to be a leader in environmental safeguards for our children. I believe that every Illinois citizen has the right to breathe clean air and to have healthy communities. Children, whose brains and nervous systems are still developing should not be harmed by polluted air. Dynegey, in seeking to purchase five coal plants in Illinois, should be expected to play by the rules and comply with our state's air quality standards. For too long, the communities surrounding these plants have been negatively impacted by coal pollution. In 2006, when the Illinois Multi-Pollutant standard went into effect, people living near these plants expected things to improve. Please don't let Dynegey now violate that trust, by giving them permission to pollute our air.

Sincerely,

Mary Burns

Please don't let Dynegy now violate that trust, by giving them permission to pollute our air.

Looking at everything in terms of economics is short-sighted and wrong, but even the economics of this are bad. What will be the cost to the state because of people who suffer from respiratory diseases and cancers because of this air pollution? How is the contribution to carbon-caused climate change going to harm us into the foreseeable future? What we need to be doing is encouraging clean-energy businesses and giving *them* tax breaks.

Sincerely,

Gail Gillispie

Dear Control Board,

Don't give Illinois coal plants a free pass to pollute. I urge you to reject the request (PCB 12-126) to let five coal plants violate Illinois air pollution limits for the next five years.

I believe that every Illinois citizen has the right to breathe clean air and to have a healthy communities. Dynegy, in seeking to purchase five coal plants in Illinois, should be expected to play by the rules and comply with our state's air quality standards. For too long, the communities surrounding these plants have been negatively impacted by coal pollution. In 2006, when the Illinois Multi-Pollutant standard went into effect, people living near these plants expected things to improve. Please don't let Dynegy now violate that trust, by giving them permission to pollute our air.

Sincerely,

Daniel Smith

Dear Control Board,

Don't give Illinois coal plants a free pass to pollute. I urge you to reject the request (PCB 12-126) to let five coal plants violate Illinois air pollution limits for the next five years.

I believe that every Illinois citizen has the right to breathe clean air and to have a healthy communities. Dynegy, in seeking to purchase five coal plants in Illinois, should be expected to play by the rules and comply with our state's air quality standards. For too long, the communities surrounding these plants have been negatively impacted by coal pollution. In 2006, when the Illinois Multi-Pollutant standard went into effect, people living near these plants expected things to improve. Please don't let Dynegy now violate that trust, by giving them permission to pollute our air.

For some people, clean air is literally a matter of life or death; for others, it is a matter of a good health day or another day spent ill.

The lost productivity and wages as a result of ill health outweigh any perceived benefit to any coal burning plant's owner. Please reject all attempts to weaken or dismiss protections from pollution.

Sincerely,

Greg Kedzior
