STATE OF ILLINOIS
Pollution Control Board

R12-23
PC#31

John,

We definitely need to up grade our standards for clean water and keep CAFOs away from our Karst areas. Now is the best time to make these changes so strong that even the politicians cannot change them. Clean drinking water is one of the most important things that every human needs to survive. The fact that the Dept. of Ag. thought they did not have to follow the present rules and allowed a mega-dairy to be built in Jo Daviess County, right over Karst should never have been allowed. Please change the rules so that it will not be allowed in the future.

Thank you.
