Illinois Pollution Control Board

Subject: R2012-023

Dear Illinois Pollution Control Board,

I am writing in support of the Illinois Pollution Control Board's proposed rule on factory farms.

Pollution from factory farms, like animal waste and chemicals, threatens the rivers and streams we love and depend on. That's why I fully support the IPCB's proposal to:

- Ban manure spreading practices that threaten our rivers, streams, or drinking water
- Ensure the public's right to know about every factory farm operation across the state, so we know where the pollution is coming from.

Much tougher action will be needed to truly curb factory farm pollution. But these are good first steps, and I hope that you will fully support them.

Thank you for standing up for Illinois's rivers and streams.

Sincerely,
Pam Hetz

Thank you for standing up for Illinois's rivers and streams. I have never lived by a Corporate Farm, but driving past gives a clue as to what they produce, poop and pollution. We need to keep this things out of our rives, steams and lakes. CAFO's must be stringently regulated to keep our waterways as clean as possible.

Sincerely,
Bob Jorgensen

We have got to stop the assault on our fresh water sources, our rivers and water ways, and our air. CAFO's spew toxins into our lives at every level. Strong regulations are needed to reign in factory farms. Do not allow the farm bureau and lobbyists to hack away at the proposed rules on factory farms.

Sincerely,
Lois Kaion

Illinois Pollution Control Board

Subject: R2012-023

Dear Illinois Pollution Control Board,

I am writing in support of the Illinois Pollution Control Board's proposed rule on factory farms.

Pollution from factory farms, like animal waste and chemicals, threatens the rivers and streams we love and depend on. That's why I fully support the IPCB's proposal to:

- Ban manure spreading practices that threaten our rivers, streams, or drinking water
- Ensure the public's right to know about every factory farm operation across the state, so we know where the pollution is coming from.

Much tougher action will be needed to truly curb factory farm pollution. But these are good first steps, and I hope that you will fully support them.

Thank you for standing up for Illinois's rivers and streams.

Sincerely,
Ingrid Matthaei

- Ensure the public's right to know about every factory farm operation across the state, so we know where the pollution is coming from.

Much tougher action will be needed to truly curb factory farm pollution. But these are good first steps, and I hope that you will fully support them.

Additionally, I suggest that you take notice of the results of lapses in regulations in West Virginia. Our waterways are too important to neglect, and failing to regulate factory farms in a meaningful way is dangerous to Illinois, and all communities downriver.

Current effects of Illinois' agricultural pollution can currently be seen as far south as the Gulf of Mexico.

If you are committed to preserving our way of life, you will seriously consider supporting the IPCB's proposal.

Sincerely,
Daniel Westcott
