Subject: R2012-023

Dear Illinois Pollution Control Board,

I am writing in support of the Illinois Pollution Control Board's proposed rule on factory farms.

Pollution from factory farms, like animal waste and chemicals, threatens the rivers and streams we love and depend on. That's why I fully support the IPCB's proposal to:

- Ban manure spreading practices that threaten our rivers, streams, or drinking water
- Ensure the public's right to know about every factory farm operation across the state, so we know where the pollution is coming from.

Much tougher action will be needed to truly curb factory farm pollution. But these are good first steps, and I hope that you will fully support them.

Thank you for standing up for Illinois's rivers and streams.

Sincerely,  
Francis Butler

- Ban manure spreading practices that threaten our rivers, streams, or drinking water
- Ensure the public's right to know about every factory farm operation across the state, so we know where the pollution is coming from.

Much tougher action will be needed to truly curb factory farm pollution. But these are good first steps, and I hope that you will fully support them.

Thank you for standing up for Illinois's rivers and streams.

Sincerely,  
Priya Nelson

Dear Illinois Pollution Control Board,

I am writing in support of the Illinois Pollution Control Board's proposed rule on factory farms.

Pollution from factory farms, like animal waste and chemicals, threatens the rivers and streams we love and depend on. That's why I fully support the IPCB's proposal to:

- Ban manure spreading practices that threaten our rivers, streams, or drinking water
- Ensure the public's right to know about every factory farm operation across the state, so we know where the pollution is coming from.

Much tougher action will be needed to truly curb factory farm pollution. But these are good first steps, and I hope that you will fully support them.

Thank you for standing up for Illinois's rivers and streams.

Sincerely,  
Suzanne Meyer

Thank you for standing up for Illinois's rivers and streams.

Fertilizer runoff is one of our biggest environmental threats. Add in manure, etc and we don't have drinking water anymore.

Ted

Factory farms are not only bad for the environment, they also are bad for the animals they raise and they provide poor quality food for the citizens of Illinois. Illinois needs more small family farms that respect the needs of the animals they raise, respect the environment and produce high quality, nutritious food that supports health for those who consume their meat, vegetables and grains.

Thank you for standing up for Illinois's rivers and streams.

Sincerely,  
Kathy Ruopp

If those factory farms damage or destroy the rivers where will I be able to go fishing...don't help them do it. Protect our waters.

Sincerely,  
Sharonlynn Dragiewicz
