Illinois Pollution Control Board

Subject: R2012-023

Dear Illinois Pollution Control Board,

I am writing in support of the Illinois Pollution Control Board's proposed rule on factory farms.

Pollution from factory farms, like animal waste and chemicals, threatens the rivers and streams we love and depend on. That's why I fully support the IPCB's proposal to:

- Ban manure spreading practices that threaten our rivers, streams, or drinking water
- Ensure the public's right to know about every factory farm operation across the state, so we know where the pollution is coming from.

Much tougher action will be needed to truly curb factory farm pollution. But these are good first steps, and I hope that you will fully support them.

Thank you for standing up for Illinois's rivers and streams.

Sincerely,  
Aaron Groff

Pollution from factory farms, like animal waste and chemicals, threatens the rivers and streams we love and depend on. That's why I fully support the IPCB's proposal to:

- Ban manure spreading practices that threaten our rivers, streams, or drinking water
- Ensure the public's right to know about every factory farm operation across the state, so we know where the pollution is coming from.

Much tougher action will be needed to truly curb factory farm pollution. But these are good first steps, and I hope that you will fully support them.

Thank you for standing up for Illinois's rivers and streams.

Sincerely,  
Kathy Chan

I am hopeful that in the years to come, Americans will embrace supporting local farms and the products they produce. We need to move away from our dependence on the goods from the factory farms for our health.

Sincerely,  
Nancy Embach

Honestly Governor Quinn, we do not have a choice. Many farms across the USA have found better ways of farming which are not only healthier for human consumption and offer less of negative environmental impact. Please support this law!!
