Illinois Pollution Control Board

Subject: R2012-023

Dear Illinois Pollution Control Board,

I am writing in support of the Illinois Pollution Control Board's proposed rule on factory farms.

Pollution from factory farms, like animal waste and chemicals, threatens the rivers and streams we love and depend on. That's why I fully support the IPCB's proposal to:

- Ban manure spreading practices that threaten our rivers, streams, or drinking water
- Ensure the public's right to know about every factory farm operation across the state, so we know where the pollution is coming from.

Much tougher action will be needed to truly curb factory farm pollution. But these are good first steps, and I hope that you will fully support them.

Thank you for standing up for Illinois's rivers and streams.  
We really need to protect them for our well being and for the future.

Sincerely,  
Arlene Tillotson

I would like to see small local farmers encouraged and supported.  
Factory farms are out to make money, not to create sustainable agriculture that is good for people and the environment.

Sincerely,  
Linda Bergwall

In the past 5 years, we have seen such dramatic increases in massive contamination/sickness that has arisen from pollution from these types of companies.

Our waters are our most precious and irreplaceable resources. Without water, we will ALL die! Please protect the citizens of IL.

Thank you for standing up for Illinois's rivers and streams.

Sincerely,  
Mary Huddleston

Illinois Pollution Control Board

Subject: R2012-023

Dear Illinois Pollution Control Board,

I am writing in support of the Illinois Pollution Control Board's proposed rule on factory farms.

Pollution from factory farms, like animal waste and chemicals, threatens the rivers and streams we love and depend on. That's why I fully support the IPCB's proposal to:

- Ban manure spreading practices that threaten our rivers, streams, or drinking water
- Ensure the public's right to know about every factory farm operation across the state, so we know where the pollution is coming from.

Much tougher action will be needed to truly curb factory farm pollution. But these are good first steps, and I hope that you will fully support them.

Thank you for standing up for Illinois's rivers and streams.

Sincerely,  
Joseph Zmuda
