

facility and, if appropriate, a petition to extend the variance, together with a plan and schedule for compliance.

3. Pursuant to the variance, Allied has made extensive efforts to conduct a comprehensive engineering evaluation of its waste water. It is currently awaiting a last round of data in its study, which and will not be available in time for Allied to complete its engineering evaluation and petition to extend the variance by the required interim date.

4. Allied expects to have all final data available to complete its engineering evaluation report and submit it with any appropriate petition by November 19, 1990, 30 days after the current interim deadline. This date is 90 days prior to the expiration of the variance, and should adequately allow for Illinois EPA and Board review of the engineering evaluation and any petition for extension of the variance.

5. Allied has discussed this motion for modification of the variance with the Illinois EPA, and has been informed by its counsel that it has no objection to the granting of this motion.

WHEREFORE, Allied moves the Board for an order modifying the Variance to allow Allied until November 17, 1989 to file its comprehensive report with IEPA and, if appropriate, a petition to

extend the Variance together with all required supporting information and compliance plans.

Respectfully submitted,

ALLIED-SIGNAL INC.
