

## **Board to Consider Proposal to Reduce Transport of Sulfur Dioxide and Nitrogen Emissions**

The Illinois Pollution Control Board accepted for hearing, on June 15, 2006, a proposal to reduce intrastate and interstate transport of sulfur dioxide (SO<sub>2</sub>) and nitrogen oxides (NO<sub>x</sub>) emissions from fossil fuel-fired electric generating units, on an annual basis and on an ozone season basis of each calendar year. The proposed rule docketed as In the Matter of: Proposed New CAIR SO<sub>2</sub>, CAIR NO<sub>x</sub> Annual and Cair NO<sub>x</sub> Ozone Season Trading Programs, 35 Ill. Adm. Code 225, Control of Emissions From Large Combustion Sources, Subparts A, C, D and E, (R06-26) was filed by the Illinois Environmental Protection Agency (IEPA) on May 30, 2006. Specifically, it would add a new Part 225.

The IEPA proposes the adoption of the Clean Air Interstate Rule (CAIR) SO<sub>2</sub> trading program, the CAIR NO<sub>x</sub> Annual trading program and the CAIR NO<sub>x</sub> Ozone Season trading program to reduce SO<sub>2</sub> and NO<sub>x</sub> emissions. The IEPA asserts that the proposal is intended to satisfy Illinois' obligations under the United States Environmental Protection Agency's Rule to Reduce Interstate Transport of Fine Particulate Matter and Ozone; Revisions to Acid Rain Program; Revisions to the NO<sub>x</sub> SIP Call, 70 *Fed. Reg.* 25162 (May 12, 2005). The proposal is also intended to help meet the IEPA's obligation under the Clean Air Act requirements for the control of fine particulate matter and ozone in the Chicago and Metro East/St. Louis non-attainment areas.

Opinions and orders of the Board, hearing transcripts, and other documents in rulemaking records are posted on the Board's Web site and may be downloaded from the Web without charge. Hard copies may be obtained for \$.75 per page from the Clerk's office at 312-814-3629, or by writing to the Clerk's office:
