NARRATIVE INSPECTION REPORT

On September 18, 2014, I (Shaun Newell) inspected the above referenced site. The inspection was conducted to determine whether the facility has complied with all applicable used/waste tire regulations. IEPA records verify the used ag equipment sales/service facility is located at 807 S. Daysville Road in Oregon, Illinois 61061. Business co-owner/operator(s), Russell & Deborah Janssen reside in Oregon, Illinois. Used/waste tires are generated on site via tire repair and used equipment sales/service. According to Mr. Janssen during past inspections, no retail tire sales occur on site. IEPA records show that a Registration form was received at Springfield (Headquarters) on March 7, 2013 and the fee was processed on March 13, 2013.

The facility was previously inspected on April 2, 2014 and apparent used/waste tire violations were noted. Sections 21(k), 55(d)(1), 55(e), 55(k)(1), 55.6(b) of the [Illinois] Environmental Protection Act and Sections 848.202(b)(4) and 848.202(b)(5) of 35 Illinois Adm. Code. Used/waste tires (large ag) were found off rim and collecting stagnant water. The facility had not registered the site as a tire storage site for 2014. On April 18, 2014, the IEPA drafted a Used Tire ACWN (UTACWN) documenting the apparent used/waste tire violations. As of September 17, 2014 no written response to the UTACWN was received by the Rockford Regional Office. A follow-up inspection was recommended by BOL.

Upon arriving on site at 10:45 A.M. the weather was sunny with temperatures near 61 degrees. I interviewed owner/operator, Russell Janssen during the inspection. Mr. Janssen was told the IEPA has not received a Notification/Registration form/fee for 2014. No waste tires had been disposed over an unspecified time. According to Mr. Janssen, there is no change in status but he intends to take care of the tires.

I observed approximately 15 large used/waste ag tires outside collecting stagnant water. The majority of the used/waste ag tires off rim were accumulated east of the shop. Photograph 1410405050~091814-001 faces east showing the used/waste tires. Mr. Janssen and another employee were busy moving the used/waste tires during the inspection. A few additional ag tires off rim were found north of the shop. Stagnant water was found inside the used/waste tires off rim. Photograph 1410405050~091814-002 faces west showing the used/waste tires outside off rim.

Northeast of the shop I observed a large pile of solid waste. The pile was approximately 60 cubic yards in size and contained brush, demolition debris, plastic, wooden pallets (broken), etc. It would appear the pile was staged to be open burned in the future. Photograph 1410405050~091814-003 faces north showing the pile of solid waste.

Prior to leaving, I advised Mr. Janssen to drain the used/waste tires, and dispose of the waste tires using an Illinois registered tire transporter. I informed Mr. Janssen that he needed to dispose of the solid waste pile rather than burn it. I also reminded him to register as a tire storage site in 2014.

I left the site at 11:10 A.M. All previously cited used/waste tire violations remain unresolved. Additional apparent solid waste violations were noted during the inspection including Sections 21(a), 21(d)(2), 21(e), 21(p)(1), 21(p)(7) of the {Illinois} Environmental Protection Act.
