

Board Adds Definitions to Used Oil Management Standards and to Special Waste Regulations

On October 21, 2010, the Pollution Control Board adopted definitions relating to used oil management in the rulemaking docket designated In the Matter of: Proposed Amendments to the Board's Special Waste Regulations Concerning Used Oil, 35 Ill. Adm. Code 739, 808, 809 (R06-20(B)). The Board adopted one definition in its used oil management standards and three definitions in its special waste regulations.

In the second-notice opinion and order for docket (A), the Board noted that, during the first-notice comment period, the Illinois Environmental Protection Agency (IEPA) and NORA, formerly known as the National Oil Recycling Association, had addressed adding definitions, which had not been included in the first-notice proposal. On December 17, 2009, the Board opened subdocket B in order to provide first notice publication of proposed definitions.

In docket (A) on February 18, 2010, the Board adopted amendments exempting from the manifesting requirement of Parts 808 and 809 both used oil defined by and managed in accordance with Part 739 and specific mixtures of used oil and other materials. With regard to those specific mixtures, the Board adopted amendments to the Part 739 tracking requirements to include information required by a manifest.

At its meeting on October 19, 2010 the Joint Committee on Administrative Rules considered the Board's proposal and issued its certificate of no objection.

The Board directed the Clerk of the Board to file the adopted rule with the Secretary of State for publication in the *Illinois Register*.

Opinions and orders of the Board, hearing transcripts, and other documents in rulemaking records are posted on the Board's Web site and may be downloaded from the Web without charge. Hard copies may be obtained for \$.75 per page from the Clerk's office.
