TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Scanned Digital USGS 7.5' Topographic Map (DRG)
Source: United States Geologic Survey
A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 1999 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Services
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

1 EXECUTIVE SUMMARY

Environmental Group Services, Limited (EGSL) of Chicago, Illinois was contracted by *John Daley and Associates* to perform a Ground Penetrating Radar (GPR) Survey of the property known as Arnold Technologies, located at 300 North West Street, Marengo, Illinois (herein referred to as the Subject Property or the Site).

The GPR Survey consisted of utilizing a USRADAR Seeker SPR Subsurface Imaging System equipped with a 500 MHz antenna. All areas of concern were scanned utilizing a 3-foot interval grid pattern in North-South and East-West directions. Maximum penetration depth of the GPR system at the Subject Property was approximately 8-feet below ground surface.

A GPR is typically utilized to detect subsurface objects. The GPR system sends a series of radar pulses into the subsurface and then calibrates and processes the information. Any reflected signals showing different characteristics from its surrounding media will represent an anomaly. The anomalies can then be displayed on-screen in order to determine its relative shape and depth. It should be noted that the subsurface anomalies represent the general shape, size and location of subsurface objects, and is in no way fully signifying a specific object and/or excavation.

The purpose of this GPR Survey was to confirm or deny the presence of multiple underground storage tank (UST) systems reported to be located at the Subject Property. Listed below are the areas of concern scanned and GPR Survey results:

Area of Concern	Reported USTs	GPR Results	Scan Number
1	One, 10,000-gallon fuel oil	Anomaly representative of the excavation of an area the could have contained a 10,000-gallon UST	SVY_8
2	One, 1,500-gallon core oil	Anomaly representative of the excavation of an area the could have contained a 1,500-gallon UST	SVY_9
3	One, 6,000-gallon acetone	Anomaly representative of an underground storage tank	SVY_12
4	Two, 1,000-gallon rolling oil	Anomaly representative of two underground storage tanks lying side-by-side	SVY_7
5	One, 20,000-gallon oil	No significant anomalies detected. It should be noted that this area was located within a fenced-in storage area with machinery and equipment present. EGSL was unable to achieve full maneuverability in order to fully depict any subsurface scans in this area.	N/A
6	One, 6,000-gallon menthol alcohol One, 6,000-gallon chlorophine	Anomaly representative of the excavation of an area the could have contained two, 6,000-gallon USTs lying end-to-end	SVY_13

Area of Concern	Reported USTs	GPR Results	Scan Number
7	One, 3,500-gallon coolant	No significant UST anomalies detected. It should be noted that this area contained a historical building that was demolished. GPR scans in the reported tank area resulted in numerous shallow anomalies of large debris that may be representative of the remains of the former building; as such, any scans for the UST system were inconclusive.	N/A
8	Two fuel oil tanks of unknown size	Anomaly representative of two underground storage tanks lying side-by-side	SVY_11
9	One, 10,000-gallon gasoline	Anomaly representative of the excavation of an area the could have contained a 10,000-gallon UST	SVY_6

See Appendix A for Area of Concern Locations.
See Appendix B for GPR Scans and Photographic Documentation.

2 CONCLUSIONS AND RECOMMENDATIONS

The Ground Penetrating Radar Survey conducted at nine areas of concern revealed the following:

- GPR Scans in Areas 3, 4 and 8 indicated the possible presence of UST systems in each area. As such, EGSL recommends that subsurface sampling be conducted along all four walls and the floor of each tank system in order to determine if any of the USTs have negatively impacted the subsurface soil.

- GPR Scans in Areas 1, 2, 6 and 9 indicated anomalies characteristic of possible excavations in each area. The locations and dimensions of each possible excavation were representative of the reported UST system for each area. EGSL recommends that subsurface sampling be conducted along all four walls and the floor of each excavation in order to determine if any of the reported former USTs have negatively impacted the subsurface soil.

- GPR Scans in Area 5 were inconclusive to the possible presence of a UST system due to surface debris. EGSL was able to perform limited scans in the area; however, none of the scans indicated any anomalies representative of a UST system. One subsurface soil sample was obtained from this area during a previous subsurface investigation conducted by EGSL; analytical results indicated no chemicals of concern above IEPA Tier 1 Remediation Objectives. EGSL believes that this UST system may still be present; as such, it is recommended that the tank be removed in accordance with all federal, state and, local regulation if encountered during any future demolition activities.

- GPR Scans in Area 7 were inconclusive to the possible presence of a UST system due to subsurface debris related to the historical demolition of the former building. EGSL

recommends that a test pit be excavated in the reported area of the UST system in order to confirm or deny its presence.

3 SIGNATURES OF ENVIRONMENTAL PROFESSIONALS

This report pertains to the property known as Arnold Technologies, located at 300 North West Street, Marengo, Illinois. Our professional services have been performed using the degree of care and skill ordinarily exercised under similar circumstances by environmental professionals practicing in this field. The representations made in this report are accurate and true to the best knowledge of the undersigned.

Sincerely,

ENVIRONMENTAL GROUP SERVICES, LIMITED

Vahooman Mirkhaef
President

IEPA Water Pollution Control Permit

ILLINOIS ENVIRONMENTAL PROTECTION AGENCY
WATER POLLUTION CONTROL PERMIT

LOG NUMBERS: 0690-06 KK

PERMIT NO.: 2006-EO-0690

PT/E 4

DATE ISSUED: APR 2 1 2006

FINAL PLANS, SPECIFICATIONS, APPLICATION AND SUPPORTING DOCUMENTS
PREPARED BY: Arnold Engineering Company

SUBJECT: ARNOLD ENGINEERING CORPORATION (MARENGO FACILITY) - Wastewater Treatment and Recycle System - McHenry County

RECEIVED
MAY 1 2006
Div. Water Pollution Control
Field Operations Section - Reg. 2

PERMITTEE TO OWN AND OPERATE

Arnold Engineering Corporation
300 N. West Street
Marengo, Illinois 60152

Permit is hereby granted to the above designated Permittee(s) to construct and/or operate water pollution control facilities described as follows:

Wastewaster treatment and recycle system consisting of a series of four ponds (ponds #1-4) of 3 million gallon total capacity, one extended aeration activated sludge treatment plant tributary to Pond#1, one diked percolation field and all pumps, piping and appurtenances necessary to treat sanitary wastewater, cooling water and process wastewater (an average of 2,200,000 gpd, and a maximum of 2,500,000 gpd). Treated wastewater from the four ponds (Ponds #1-4) will either be recycled back to plant operations or discharged to the percolation field via an industrial ditch.

This Permit renews and replaces Permit Number 2004-EO-0971 which was previously issued for the herein permitted facilities.

This operating permit expires on March 31, 2011.

This Permit is issued subject to the following Special Condition(s). If such Special Condition(s) require(s) additional or revised facilities, satisfactory engineering plan documents must be submitted to this Agency for review and approval for issuance of a Supplemental Permit.

SPECIAL CONDITION 1: This Permit is issued with the expressed understanding that there shall be no surface discharge from these facilities. If such discharge occurs, additional or alternate facilities shall be provided. The construction of such additional or alternate facilities may not be started until a Permit for the construction is issued by this Agency.

SPECIAL CONDITION 2: Issuance of this permit does not release the Permittees from any liability for prior violations of the Act or Rules and Regulations promulgated thereunder.

SPECIAL CONDITION 3: The operation of the treatment facilities must be under the direct and active field supervision of a

THE STANDARD CONDITIONS OF ISSUANCE INDICATED ON THE REVERSE SIDE MUST BE COMPLIED WITH IN FULL. READ ALL CONDITIONS CAREFULLY.

PERMIT NO.: 2006-EO-0690

DATE ISSUED: APR 21 2006

FINAL PLANS, SPECIFICATIONS, APPLICATION AND SUPPORTING DOCUMENTS
PREPARED BY: Arnold Engineering Company

SUBJECT: ARNOLD ENGINEERING CORPORATION (MARENGO FACILITY) - Wastewater Treatment and Recycle System - McHenry County

Chapter 1, Part 312.

SPECIAL CONDITION 4: All sludges generated on site shall be disposed of at a site and in a manner acceptable to the Agency.

SPECIAL CONDITION 5: Monitoring and Reporting Requirements

A. Samples shall be collected of the treated wastewater at a point representative of the dicharge from Pond #4 (final stage) but prior to entry into the ditch tributary to the percolation field. Monthly samples shall also be collected from the monitoring wells identified in the permit application as MW-1, MW-2, MW-3, MW-A4, MW-A5, MW-A6, MW-A7, and MW-A8. All samples shall be analyzed for the following parameters:

Parameter	Sample Type	Frequency	Class I Groundwater Quality Standards
1.1.1 - trichloroethane, mg/l	Grab	Once/Month	0.2 mg/l
Tetrachloroethylene, mg/l	Grab	Once/Month	0.005 mg/l
Trichloroethylene, mg/l	Grab	Once/Month	0.005 mg/l
Total Dissolved Solids, mg/l	Grab	Once/Month	1,200 mg/l
Nickel, mg/l	Grab	Once/Month	0.1 mg/l
pH	Grab	Once/Month	6.5 - 9.0 SU

B. Flow rate from Pond #4 to the ditch tributary to the percolation field shall be recorded, in million gallons per day, as a daily maximum and monthly average.

C. Monitoring shall be conducted according to test procedures approved in 40 CFR 136 or other Agency approved methods. The monitoring results and flow data shall be tabulated and submitted to the Agency on a semi-annual basis (May and November of each year) to the following addresses:

Illinois Environmental Proection Agency

Des Plaines, Illinois 60016

READ ALL CONDITIONS CAREFULLY:
STANDARD CONDITIONS

The Illinois Environmental Protection Act (Illinois Revised Statutes Chapter 111-12. Section 1039) grants the Environmental Protection Agency authority to impose conditions on permits which it issues.

1. Unless the construction for which this permit is issued has been completed, this permit will expire (1) two years after the date of issuance for permits to construct sewers or wastewater sources or (2) three years after the date of issuance for permits to construct treatment works or pretreatment works.

2. The construction or development of facilities covered by this permit shall be done in compliance with applicable provisions of Federal laws and regulations, the Illinois Environmental Protection Act, and Rules and Regulations adopted by the Illinois Pollution Control Board.

3. There shall be no deviations from the approved plans and specifications unless a written request for modification of the project, along with plans and specifications as required, shall have been submitted to the Agency and a supplemental written permit issued.

4. The permittee shall allow any agent duly authorized by the Agency upon the presentations of credentials:

   a. to enter at reasonable times, the permittee's premises where actual or potential effluent, emission or noise sources are located or where any activity is to be conducted pursuant to this permit;

   b. to have access to and copy at reasonable times any records required to be kept under the terms and conditions of this permit;

   c. to inspect at reasonable times, including during any hours of operation of equipment constructed or operated under this permit, such equipment or monitoring methodology or equipment required to be kept, used, operated, calibrated and maintained under this permit;

   d. to obtain and remove at reasonable times samples of any discharge or emission of pollutants;

   e. to enter at reasonable times and utilize any photographic, recording, testing, monitoring or other equipment for the purpose of preserving, testing, monitoring, or recording any activity, discharge, or emission authorized by this permit.

5. The issuance of this permit:

   a. shall not be considered as in any manner affecting the title of the premises upon which the permitted facilities are to be located;

   b. does not release the permittee from any liability for damage to person or property caused by or resulting from the construction, maintenance, or operation of the proposed facilities;

   c. does not release the permittee from compliance with other applicable statutes and regulations of the United States, of the State of Illinois, or with applicable local laws, ordinances and regulations;

   d. does not take into consideration or attest to the structural stability of any units or parts of the project;

   e. in no manner implies or suggests that the Agency (or its officers, agents or employees) assumes any liability, directly or indirectly, for any loss due to damage, installation, maintenance, or operation of the proposed equipment or facility.

6. Unless a joint construction/operation permit has been issued, a permit for operating shall be obtained from the agency before the facility or equipment covered by this permit is placed into operation.

7. These standard conditions shall prevail unless modified by special conditions.

8. The Agency may file a complaint with the Board for suspension or revocation of a permit:

   a. upon discovery that the permit application contained misrepresentations, misinformation or false statement or that all relevant facts were not disclosed; or

   b. upon finding that any standard or special conditions have been violated; or

   c. upon any violation of the Environmental Protection Act or any Rules or Regulation effective thereunder as a result of the construction or development authorized by this permit.

PROJECT:

Arnold Magnetic Technologies Corporation requests to renew of Water Pollution Control Operating no. 2004-EO-0971. The existing system neither discharge to POTW nor associated with a municipal sewer. An on-site well provides the potable and process water.

The recycled water system contains a series of 4 ponds of 3 million gallons and 1.5 mgd of cooling water through a separate distribution system. A 850 feet deep private well supplies sanitary water, make-up cooling water, and process water and approximately 126,000gpd flows into the recycle water system. Arnold Magnetic technologies indicated that "no changes have been made to the subject system since the existing operating permit was issued in 2004".

Subject: The Arnold Engineering Corporation
Data: 0690-06
Reviewed By: Shu-Mei Tsai

Date: Monday, April 17, 2006

UPDATE:

In the previous permit, IEPA requested Arnold Engineering Corporation to collect the samples of treated wastewater monthly, and that includes 1,1,1-Trichloroethane, Tetrachloroethylene, Trichloroethylen, Total Dissolved Solids, Nickel, and pH. In November 14, 2005, IEPA received the semi-annual report of groundwater monitoring. The samples came from the Well #1, Well #2, Well #3, Outfall Pond 4, and the flow rates of Pond #5. *Received the fax of the data sheet, the reading of sampling data is below the standard.*

Talk to the applicant Stephen Brisson on Monday, April 17, 2006 (1:00pm). I asked him about the Special Condition 6 because I didn't find any data for MWA4, MWA5, MWA6, MWA7, and MWA8. It also didn't include the pH reading. I also checked the Special Condition 9 with him, and I can't find the Pond 6 in the site map, which came with the application. Mr. Brisson told me they would send the next report in May 2006. However, I told him I don't have any data of MWA4-MWA8. He could not answer me the questions. He told me he would ask Don Smith (URS Corporation) to answer my questions.

Don Smith (URS Corporation) called me on Monday, April 17, 2006 (1:50pm). He said he would fax the data of MWA4, MWA5, MWA6, MWA7, and MWA8 including pH reading next day (Tuesday, April 18, 2006). He also indicated the Pond 6 and the building next to the Pond 6, which were not exiting anymore after IEPA issued the previous permit (July, 2004). Therefore, URS could not have any sampling data from Pond 6. Arnold set up an off-site MW-09 at the previous location of Pond 6 for sampling (the West of approximately 300 feet from Pond 1). Arnold faxed some sampling data and the results were U, which were the analyses not detected (April 18, 2006)

Stephen Brisson fax 11 pages information (on Tuesday, April 18, 2006) to indicate that Arnold receive that validated results and all results were below the method detection limits (5 ug/l) of three private well down gradient (north and northwest) of the facility. *(The Special Conditions 5 and 9 in the previous permit will not included in the new permit)* In the letter, it also indicated that Arnold Engineering has checked the records and 1, 1,1 – Tirchoroethane has not been used at the facility for many years. Arnold also was not observing any increase in concentration of any other contaminants in any of the other wells on and off site. *(The Special Condition 8 in the previous permit will not be included in the new permit).* In the letter, Mr. Brisson also indicated that Arnold completed a Waste Use Survey. *(The Special Condition 7 will not be included in the new permit).*

ACTION:

The Agency will issue a permit with appropriate special conditions.

Application for Permit or Construction Approval
WPC-PS-1

1. Owner Name: Arnold Magnetic Technologies Corporation

   Name of Project: Operating Permit Renewal for Existing Sanitary/Industrial Water Recycling System

   Township: Marengo County: McHenry

2. Brief Description of Project:

   Renewal of operating permit for existing sanitary and industrial water recycling system. Original permit application submitted in 1975 and system has been in operation since that date. Process diagram and description is attached.

3. Documents Being Submitted: If the Project involves any of the items listed below, submit the corresponding schedule, and check the appropriate boxes.

	Schedule		Schedule
Private Sewer Connection/Extension	A/B ☐	Spray Irrigation	H ☐
Sewer Extension Construct Only	C ☐	Septic Tanks	I ☐
Sewage Treatment Works	D ☑	Industrial Treatment/Pretreatment	J ☑
Excess Flow Treatment	E ☐	Waste Characteristics	N ☑
Lift Station/Force Main	F ☐	Erosion Control	P ☐
Fast Track Service Connection	FTP ☐	Trust Disclosure	T ☐
Sludge Disposal	G ☑		

   Plans: Title Arnold Engineering Water Recycle System No. of Pages: 1

   Specifications: Title N/A No. of Books/Pages: _____

   Other Documents: N/A
   (Please Specify)

3.1 Illinois Historic Preservation Agency approval letter: Yes ☐ No ☑

4. Land Trust: Is the project identified in item number 1 herein, for which a permit is requested, to be constructed on land which is the subject of a trust? Yes ☐ No ☑

   If yes, Schedule T (Trust Disclosure) must be completed and item number 7.1.1 must be signed by a beneficiary, trustee or trust officer.

5. This is an Application for (Check Appropriate Line):

   ☐ A. Joint Construction and Operating Permit
   ☐ B. Authorization to Construct (See Instructions) NPDES Permit No. IL00_____
   ☐ C. Construct Only Permit (Does Not Include Operations)
   ☑ D. Operate Only Permit (Does Not Include Construction)

6. Certifications and Approval:

6.1 Certificate by Design Engineer (When required: refer to instructions)
I hereby certify that I am familiar with the information contained in this application, including the attached schedules indicated above, and that to the best of my knowledge and belief such information is true, complete and accurate. The plans and specifications (specifications other than Standard Specifications or local specifications on file with this Agency) as described above were prepared by me or under my direction.

SCHEDULE D TREATMENT WORKS

1. NAME AND LOCATION:

1.1 Name of project The Arnold Engineering Co.

1.2 Plant location

1.2.1 Is the treatment work site within the corporate limits of a municipality? YES ☐ NO ☒

1.2.2 NW (Quarter Section) 35 (Section) 44N (Township) 5E (Range) 3rd (P.M.)

1.2.3 Latitude 42 ° 15 ' 14 "North
Longitude 88 ° 37 ' 14 "West

1.2.4 Name of USGS Quadrangle Map (7.5 or 15 Minutes) Harvard IL-WI 15 Minute

1.2.5 State distance to nearest residence 300 feet

2. APPROXIMATE TIME SCHEDULE: Start of Construction _____ ; Date of Completion _____; Date operation begins _____

2.1 100% Design Load to be reached by year _____

3. MAPS AND DRAWINGS: Attach schematic flow diagram and submit plans and specifications.

4. RECEIVING STREAM: Name None ;
tributary to _____ ; tributary to _____

5. Is the treatment works subject to flooding? YES ☐ NO ☒ . If yes, what is the maximum flood elevation record (in reference to the treatment works datum) and what provisions have been made to eliminate the flooding hazard?

_____

6. DESIGN LOADINGS:

6.1 Design Population Equivalent (one population equivalent is 100 gallons of sewage per day, containing 0.17 pounds of BOD_5 and 0.20 pounds of suspended solids) 300 persons P.E.

6.2 Design Average Flow Rate 0.030 MGD Design Maximum Flow Rate 0.030 MGD.

6.3 Pounds of BOD Per Day 60 lbs/day Pounds of Suspended Solids Per Day unknown lbs/day.

6.4 Minimum 7-day, 10-year low flow N/A CFS N/A MGD.
Minimum 7-day, 10-year low flow obtained from _____

6.5 Proposed Dilution Ratio N/A : _____

7. DESIGN INFLUENT AND EFFLUENT:

7.1 Can the existing effluent quality be maintained during construction? YES ☐ NO ☐ If no, please explain
N/A

8. EXISTING LOADING TO TREATMENT WORKS:

8.1 Average Flow 0.001043 MGD (During the last 12 months) 0.000622 MGD (During 3 lowest flow months of the last 12 months)

8.1.1 Maximum Flow (use highest calendar month-monthly average) .003467 MGD

8.1.2 Dry Weather Flow (lowest calendar month) .0006 MGD

8.1.3 Equipment used in determining above flows Leopold Stevens 61-R Flow Meter

8.2 Average influent BOD Concentrations 231.9 mg/l

8.3 Average influent SS Concentrations 160.4 mg/l

8.4 List all Permit Numbers previously issued for this facility if available: 1994-EO-1340-2, 1999-EO-4027, 2004-EO-0971.

9. COMMUNITIES SERVED:

9.1 Is the Proposed facility in conformity with the planning requirements of Section 303e of the FWQA of 1972 for the area?

YES ☐ NO ☐

9.2 Communities presently being served by this treatment works

N/A

9.3 Communities to be served by this treatment works under this project

N/A

10. Domestic population of area served N/A Year of Census _____

11. Has a preliminary engineering report or facilities plan for this project been submitted to this Agency for approval?

YES ☒ NO ☐ Date Submitted 09/30/64

12. WASTE CHARACTERISTIC: Schedule N must be submitted.

13. SLUDGE DISPOSAL: Schedule G must be submitted.

14. EXCESS FLOW TREATMENT: Schedule E must be provided if applicable.

15. SYSTEMS RELIABILITY: Briefly describe provisions for operation during power failures, flooding, peak loads, equipment failures, maintenances shutdowns, and other emergencies

Each pump has an alarm to notify Maintenance if a failure occurs. There are redundant pumps so that, if a failure occurs, alternate pumps activate to handle the flow.

16. Can primary treatment and disinfection be provided at all times? YES ☒ NO ☐ . What will be effect of primary treatment and disinfection alone on the receiving stream? No receiving stream

17. DETECTABLE LEVELS OF CYANIDE: Does the treatment works in question receive detectable level of cyanide. YES ☐ NO ☒ If yes, submit Schedule L.

18. TREATMENT WORKS OPERATOR: List names of certified operators and certification class.

Heinz Boecker - Class 7

19. POTABLE WATER SUPPLY:

19.1 Does the project include the construction of any potable water supply wells? YES ☐ NO ☒

19.2 Will any connections be made to an existing potable water supply? YES ☐ NO ☒

SCHEDULE G SLUDGE DISPOSAL & UTILIZATION

1. Name of Project The Arnold Engineering Co.
2. General Information
   2.1 Source(s) Amcodyne Extended Aeration Activated Sludge Treatment Plant
   2.2 Production Volume per year 2,000 gal. Dry Tons per year 0.2
   2.3 Sludge to be disposed of is: Liquid x Dry Tons
   2.4 Sludge is: Aerobically digested [x], Anaerobically digested [ ], Heat Anaerobically digested [ ], Raw [ ], Chemically Stabilized [ ], Composted [ ], Wastewater Lagoon [ ], WTP Lime [ ], WTP Alum [ ], WTP Iron [ ], Other [ ].
   If other, describe _____. Mixture [ ], If mixture, describe _____
   2.5 Is the sludge defined as hazardous by State or Federal Law? YES [ ] NO [x]. If yes, basis.
   2.6 Is sludge to be stored on the STP site? YES [ ] NO [x] If yes, type of storage, lagoon [ ], storage tank [ ], Other [ ]. If other, describe _____ capacity of storage, _____ cu. ft.
   2.7 Sludge Hauling
      2.7.1 Name(s), address(es) and Illinois Transporters I.D. Numbers
      Beaver Oil Co.; 6037 Lenzi; Hodgkins, IL 60525; IL Transporter # 0014 (last used in approximately 2001, no sludge has been transported off-site since that date due to decreased system usage).
      2.7.2 For industrial generators, has Illinois Generator ID Number and Authorization Number been issued? YES [x] NO [ ] If no, contact the Division of Land Pollution Control.
      Illinois Generator ID Number 1110650003
      Authorization Number F5242-03
3. Methods of Sludge Disposal and/or Utilization
   3.1 Land Application
      3.1.1 Indicate the number of dry tons of sludge per year to be disposed by each of the following methods:
      Agricultural land [ ], Commercial Fertilizer Production [ ], Dedicated Land Disposal [ ], Disturbed Land Reclamation [ ], Silviculture [ ], Horticultural Lands [ ], Public Distribution [ ], Other [x].
      If other, specify Beaver Oil indicates that the sludge was treated and recycled;there was no disposal.
      3.1.2 Sludge Disposal Site Location. Provide a map (USGS Quadrangle map or plat map) showing location.
      Name of USGS Quadrangle Map (7.5 or 15 minute) or plat map N/A
      3.1.3 Provide soil survey map and soil description for disposal site. Identify name of soil survey and map sheet number for each soil survey map provided.

3.1.4 Is sludge to be stored at disposal site? YES ☐ NO ☐ . If yes, describe and state the storage volume N/A cubic feet.

3.1.5 Provide a copy of sludge user information sheet and completed, signed copies for any known users.

3.1.6 In a narrative description provide operating practices and design features to prevent ground and/or surface water pollution, potable water supply wellhead protection and other buffer distances, calculations supporting storage capacity, total acres available, soil characteristics, operational contingencies, etc.

N/A

3.1.7 Submit calculations of sludge application rate for agronomic rate, organic loading and metal loading rate.

3.2 Landfilling ☐ on-site ☐ off-site

3.2.1 Sanitary Landfill ☐ Special Waste Landfill ☐ Hazardous Waste Landfill ☐ Other ☐

If other, specify N/A

3.2.2 Name and Location of Landfill(s)

N/A

3.2.3 IEPA Permit Number(s) N/A ; ;

3.3 Incineration

3.3.1 Name and Location N/A

3.3.2 IEPA Permit Number(s) N/A ; ;

3.3.3 Ultimate Disposal of Incinerator residue

N/A

4. Sludge Characteristics

Submit complete analyses of sludge characteristics in mg/kg dry wt. basis unless otherwise indicated. The analyses shall be performed unless the sludge is disposed of by incineration or at an off-site landfill. Analyses performed shall include but not be limited to parameters below:

Parameter	Parameter
% TS	Sulfur
% VS	Aluminum (total)
COD mg/l	Arsenic (total)
pH	Barium (total)
BOD_5 mg/l	Cadmium (total)
Acidity meq of CaCO3 at pH	Cobalt (total)
Alkalinity meq of CaCO3 at pH	Chromium, hex (total)
Oil and Grease mg/l	Chromium (total)
Phenols mg/l	Copper (total)
Cyanide	Iron (total)
Sulfate (total) mg/l	Mercury (total)
Sulfide (total) mg/l	Manganese (total)
Sodium	Molybdenum (total)
EC mmhos/cm	Nickel (total)

     - 1.2.3 Name of USGS Quadrangle Map (7.5 or 15 minute) Harvard IL -WI 15 Minute
2. NARRATIVE DESCRIPTION AND SCHEMATIC WASTE FLOW DIAGRAM: (see instructions)

   Original application submitted in 1975. Updates were submitted in 1984, 1989, and 1993. With the exception of flow rates, operation of the system has remained essentially the same since 1993. Updated description attached.

   - 2.1 PRINCIPAL PRODUCTS:

     Industrial and commercial magnets and magnetic materials.

   - 2.2 PRINCIPAL RAW MATERIALS:

     Aluminum, nickel, cobalt, iron, steel, acids, oils

3. DESCRIPTION OF TREATMENT FACILITIES:
   - 3.1 Submit a flow diagram through all treatment units showing size, volumes, detention times, organic loadings, surface settling rate, weir overflow rate, and other pertinent design data. Include hydraulic profiles and description of monitoring systems.
   - 3.2 Waste Treatment Works is: Batch ☐ , Continuous ☑ , No. of Batches/day _____ , No. of Shifts/day _____
   - 3.3 Submit plans and specifications for proposed construction.
   - 3.4 Discharge is: Existing ☑ ; Will begin on _____
4. DIRECT DISCHARGE IS TO: Receiving Stream ☐ Municipal Sanitary Sewer ☐ Municipal storm or municipal combined sewer ☐

   If receiving stream or storm sewer are indicated complete the following:

   Name of receiving stream N/A ; tributary to N/A ;

   tributary to N/A ; tributary to N/A ;
5. Is the treatment works subject to flooding? Yes ☐ No ☐ If so, what is the maximum flood elevation of record (in reference to the treatment works datum) and what provisions have been made to eliminate the flooding hazard?

   Area is not subject to flooding.

6. APPROXIMATE TIME SCHEDULE: Estimated construction schedule:

   Start of Construction _____ ; Date of Completion _____

   Operation Schedule _____ ; Date Operation Begins _____

   100% design load to be reached by year _____
7. DESIGN LOADINGS
   - 7.1 Design population equivalent (one population equivalent is 100 gallons of wastewater per day, containing 0.17 pounds of BOD_5 and 0.20 pounds of suspended solids:

     BOD N/A ; Suspended Solids N/A ; Flow N/A
   - 7.2 Design Average Flow Rate N/A MGD.

7.3 Design Maximum Flow Rate N/A MGD.

7.4 Design Minimum Flow Rate N/A MGD.

7.5 Minimum 7-day, 10-year low flow N/A cfs N/A MGD.

Minimum 7-day, 10-year flow obtained from N/A

7.6 Dilution Ratio N/A : .

8. FLOW TO TREATMENT WORKS (if existing):

8.1 Flow (last 12 months)

8.1.1 Average Flow 1.3 MGD

8.1.2 Maximum Flow 1.5 MGD

8.2 Equipment used in determining above flows

9. Has a preliminary engineering report for this project been submitted to this Agency for Approval?

Yes ☒ No ☐ . If so, when was it submitted and approved. Date Submitted 9/30/1964

Certification # 19640-FA-546

Dated October 9, 1964

10. List Permits previously issued for the facility:

1994-EO-1340-2, 1999-EO-4027, 2004-EO-0971

11. Describe provisions for operation during contingencies such as power failures, flooding, peak loads, equipment failure, maintenance shut downs and other emergencies.

Backup pumps are present to provide assistance in case of main pump failure.

12. Complete and submit Schedule G if sludge disposal will be required by this facility.

13. WASTE CHARACTERISTICS: Schedule N must be submitted.

14. TREATMENT WORKS OPERATOR CERTIFICATION: List names and certification numbers of certified operators:

Heinz Boecker - Class 7 Operator

Attention: Al Kalaczinski

Re: **Violation Notice, L-2008-01057**
LPC #1110650003 – McHenry County
Marengo/Arnold Magnetic Technologies
Compliance File

Dear Mr. Kalaczinski:

This constitutes a Violation Notice pursuant to Section 31(a)(1) of the [Illinois] Environmental Protection Act, 415 ILCS 5/31(a)(1), and is based on a record review completed on February 26, 2008 by representatives of the Illinois Environmental Protection Agency (Illinois EPA).

The Illinois EPA hereby provides notice of violations of environmental statutes, regulations, or permits as set forth in Attachment A to this letter. Attachment A includes an explanation of the activities that the Illinois EPA believes may resolve the specified violations, including an estimate of a reasonable time period to complete the necessary activities. However, due to the nature and seriousness of the violations cited, please be advised that resolution of the violations may require the involvement of a prosecutorial authority for purposes that may include, among others, the imposition of statutory penalties.

A written response which may include a request for a meeting with representatives of the Illinois EPA, must be submitted via certified mail to the Illinois EPA within 45 days of receipt of this letter. The response must address each violation specified in Attachment A and include for each an explanation of the activities that will be implemented and the time schedule for the completion of that activity. The written response will constitute a proposed Compliance Commitment Agreement (CCA) pursuant to Section 31 of the Act. The Illinois EPA will review the proposed CCA and will accept or reject it within 30 days of receipt.

ROCKFORD – 4302 North Main Street, Rockford, IL 61103 – (815) 987-7760 • DES PLAINES – 9511 W. Harrison St., Des Plaines, IL 60016 – (847) 294-4000
ELGIN – 595 South State, Elgin, IL 60123 – (847) 608-3131 • PEORIA – 5415 N. University St., Peoria, IL 61614 – (309) 693-5463
BUREAU OF LAND – PEORIA – 7620 N. University St., Peoria, IL 61614 – (309) 693-5462 • CHAMPAIGN – 2125 South First Street, Champaign, IL 61820 – (217) 278-5800
SPRINGFIELD – 4500 S. Sixth Street Rd., Springfield, IL 62706 – (217) 786-6892 • COLLINSVILLE – 2009 Mall Street, Collinsville, IL 62234 – (618) 346-5120
MARION – 2309 W. Main St., Suite 116, Marion, IL 62959 – (618) 993-7200

If a timely written response to this Violation Notice is not provided, it shall be considered to be a waiver of the opportunity to respond and to meet provided by Section 31(a) of the Act, and the Illinois EPA may proceed with a referral to the prosecutorial authority.

Written communications should be directed to:

ATTACHMENT A

1. Pursuant to Section 12(a) of the {Illinois} Environmental Protection Act (415 ILCS 5/12(a)), no person shall cause, threaten or allow the discharge of any contaminants into the environment in any State so as to cause or tend to cause water pollution in Illinois, either alone or in combination with matter from other sources, or so as to violate regulations or standards adopted by the Pollution Control under this Act.

   A violation of Section 12(a) of the {Illinois} Environmental Protection Act (415 ILCS 5/12(a)) is alleged for the following reason: **The discharge of contaminants was caused and allowed in a way that caused water pollution. Chlorinated solvent contamination above the Class 1 groundwater objectives is present in on site groundwater. The groundwater contamination has been present for approximately 20 years. Shallow groundwater flow under the site is to the north-northwest, towards the nearby Kishwaukee River. Residential/nonresidential private water wells are located to the north-northwest, directly down gradient of the site. The private wells are within ½ mile of the site and its unknown at this time if the private wells have been impacted by the chlorinated solvent groundwater contamination.**

   1,1,1-Trichloroethane (1,1,1-TCA) was detected as high as 4,900 ppb, in 1999, in on site groundwater monitoring well MW-3. More recently in 2007, 1,1,1-TCA was detected as high as 501 ppb in on site groundwater monitoring well MW-A7. Tetrachloroethene (PCE) was detected as high as 18.8 ppb, in 2007, in onsite groundwater monitoring well MW-3. PCE contamination in MW-3 has steadily increased over the past approximately 6 years. Other on site groundwater monitoring wells have chlorinated solvent detections as well, but MW-3 and MW-A7 have shown the highest concentrations of 1,1,1-TCA and PCE.

2. Pursuant to Section 12(d) of the {Illinois} Environmental Protection Act (415 ILCS 5/12(d)), no person shall deposit any contaminants upon the land in such place and manner so as to create a water pollution hazard.

   A violation of Section 12(d) of the {Illinois} Environmental Protection Act (415 ILCS 5/12(d)) is alleged for the following reason: **Contaminants were deposited upon the land in such a place and manner that created a water pollution hazard. Chlorinated solvent contamination above the Class 1 groundwater objectives is present in on site groundwater. The groundwater contamination has been present for approximately 20 years. Shallow groundwater flow under the site is to the north-northwest, towards the nearby Kishwaukee River. Residential/nonresidential private water wells are located to the north-northwest, directly down gradient of the site. The private wells are within ½ mile of the site and its unknown at this time if the private wells have been impacted by the chlorinated solvent groundwater contamination.**

   1,1,1-TCA was detected as high as 4,900 ppb, in 1999, in on site groundwater monitoring well MW-3. More recently in 2007, 1,1,1-TCA was detected as high as 501 ppb in on site groundwater monitoring well MW-A7. PCE was detected as high as 18.8 ppb, in 2007, in on site groundwater monitoring well MW-3. PCE contamination in MW-3 has steadily increased over the past approximately 6 years. Other on site groundwater monitoring wells have chlorinated solvent detections as well, but MW-3 and MW-A7 have shown the highest concentrations of 1,1,1-TCA and PCE.

SUGGESTED RESOLUTIONS

1. Immediately determine the source(s) of 1,1,1-TCA, PCE and other related contaminants that are present in groundwater under the subject site by conducting an Investigation.

2. Immediately determine the extent of 1,1,1-TCA, PCE and other related contaminants in soil and groundwater, both on site and off site, by conducting an Investigation.

3. Collect representative groundwater samples from all down gradient residential/nonresidential private water wells (approximately 16) located within approximately ½ mile of the site, see the attached map. The private water well samples shall be collected from an unfiltered and unsoftened spigot, after an appropriate water system purge is conducted. The samples shall be analyzed for Volatile Organic Compounds at an Illinois EPA approved laboratory. Illinois EPA would like to oversee the sampling event.

4. Remediate, if necessary, to meet all applicable remediation objectives for soil and groundwater.

* Immediately manage the groundwater to mitigate impairment caused by the release of volatile organic compounds.

* All copies of receipts/manifests, and analytical reports must be submitted to the Illinois EPA that document the proper disposal of any waste (i.e. impacted soil, contaminated groundwater). The receipts/manifests must be submitted within 10 days after the off-site shipment.

* Within 45 days from the receipt of this letter, enroll in the Site Remediation Program.

* A Site Investigation Work Plan shall be submitted within 30 days of the Illinois EPA approval of the Site Remediation application.

* The Site Investigation shall be implemented within 30 days of the Illinois EPA approval of the Site Investigation Work Plan.

* The Site Investigation Report shall be submitted within 180 days of approval of the Site Investigation Work Plan.

* The Remediation Objectives Report shall be submitted within 30 days of approval of the Site Investigation Report.

* The Remedial Action Plan shall be submitted within 30 days of Illinois EPA approval of the Remedial Objectives Report.

* The remedial action shall be implemented within 30 days of Illinois EPA approval of the Remediation Action Plan.

* **The Remedial Action Completion Report shall be submitted within 365 days of Illinois EPA approval of the Remedial Action Plan.**

The written response to this Violation Notice must include information in rebuttal, explanation, or justification of each alleged violation and must be submitted to the Illinois EPA by certified mail, within 45 days of receipt of this Violation Notice. The written response must also include a proposed Compliance Commitment Agreement that commits to specific remedial actions, includes specified times for achieving each commitment, and may include a statement that compliance has been achieved.

Re: Violation Notice Number, L-2008-01123

Dear Mr. Rivera:

This letter shall serve as a written response to Violation Notice Number L-2008-01057 on behalf of 300 West LLC, owner of the property at 300 N. West Street, Marengo.

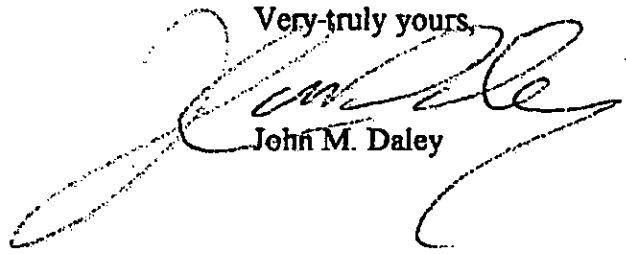
1. The source of 1,1,1-TCA and PCE detected in the groundwater monitoring wells along the northwestern portion of the subject property was reportedly related to historical operations conducted in that area. A historical subject building ("Building #6") was located at the northwestern corner of the subject property and was reportedly demolished approximately 10-20 years ago. Historical industrial operations conducted within Building #6 reportedly utilized chlorinated solvents in production processes. The historical utilization of chlorinated solvents in this area is believed to be the source of elevated levels of 1,1,1-TCA and PCE in the groundwater.

2. 300 West LLC has engaged Environmental Group Services Limited ("EGSL"), and EGSL currently is working with Mr. Thomas Rivera of the IEPA regarding off-site groundwater sampling. Addresses were obtained from all of the northern, western, and northwestern properties that are possibly utilizing groundwater wells for potable purposes. Mr. Rivera sent letters to all of the neighboring addresses requesting access to the properties in order to sample the groundwater wells for each of the sites. At this time, Mr. Rivera and EGSL are awaiting for responses from the neighboring properties. Upon receipt of any and all responses, neighboring wells will be sampled, and all groundwater samples will be submitted to an accredited laboratory of analysis of VOCs. It is anticipated that the on-site sampling will be complete in approximately one month.

3. The subject property has been enrolled into the IEPA's Site Remediation Program (SRP). Tim Zook has been assigned as the project manager for the site. Upon submittal of the Remedial Action Completion Report (RACR), a Comprehensive NFR for residential properties will be requested for the entire subject property. The RACR is anticipated to be complete by December 2008.

Do not hesitate to call me (312.420.6046) with any questions.

Very truly yours,



John M. Daley

Re: **Compliance Proposal dated June 17, 2008**
Violation Notice L-2008-01123 and L-2008-01057
BOL # 1110650003 – McHenry County
Marengo/Arnold Magnetic Technologies
Compliance File

Dear Mr. Daley:

On June 17, 2008 the Illinois Environmental Protection Agency ("Illinois EPA") received your transmittal concerning Arnold Magnetic Technologies in response to the Febraury 28, 2008 and April 15, 2008 Violation Notice. This transmittal proposed certain steps and initiatives, whose purpose was to bring Arnold Magnetic Technologies into compliance with State law and regulations remedying the violations alleged in the Violation Notice, **L-2008-01123 and L-2008-01057**. Unfortunately, the Illinois EPA cannot consider this transmittal as a Compliance Commitment Agreement ("CCA") under the Illinois Environmental Protection Act, Section 31(a)(2) [415 ILCS 5/31(a)(2) (1996)], because the transmittal was received after the 45-day deadline.

Nonetheless, the Illinois EPA evaluated your proposal and we are pleased to inform you that the timely implementation of the proposal will allow the resolution of this matter short of formal enforcement at this time. However, this matter remains open to formal enforcement if necessary. The failure to achieve compliance as proposed will result in the reconsideration of this matter including referral to the Office of the Attorney General, the State's Attorney of McHenry County, or the United States Environmental Protection Agency for formal enforcement and the imposition of penalties.

Further, if any of the alleged violations remain the subject of disagreement between the Illinois EPA and Arnold Magnetic Technologies, this matter may be considered for referral to the Office of the Attorney General, the State's Attorney of McHenry County, or the United States Environmental Protection Agency for formal enforcement action and the imposition of penalties.

Written communications should be directed to:

Question	T / F/ NA	Comment
Radioactivity either was not measured or, if measured, is at or below background		
The cooler's custody seal, if present, is intact.		
The cooler or samples do not appear to have been compromised or tampered with.		
Samples were received on ice.		
Cooler Temperature is acceptable.		
Cooler Temperature is recorded.		
COC is present.		
COC is filled out in ink and legible.		
COC is filled out with all pertinent information.		
There are no discrepancies between the sample IDs on the containers and the COC.		
Samples are received within Holding Time.		
Sample containers have legible labels.		
Containers are not broken or leaking.		
Sample collection date/times are provided.		
Appropriate sample containers are used.		
Sample bottles are completely filled.		
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs		
VOA sample vials do not have headspace or bubble is <6mm (1/4") in diameter.		
If necessary, staff have been informed of any short hold time or quick TAT needs		
Multiphasic samples are not present.		
Samples do not require splitting or compositing.

2008 On-Site Groundwater Monitoring Well Results

ARNOLD®
MAGNETIC TECHNOLOGIES
The Arnold Engineering Company

November 14, 2008

Illinois Environmental Protection Agency
Division of Water Pollution Control
Compliance Assurance Section
1021 North Grand Avenue East
P.O. Box 19276
Springfield, IL 62794-9276

Subject: The Arnold Engineering Company
Marengo, Illinois
Permit No. 2006-EO-0690

To Whom It May Concern:

Enclosed is the semiannual report of groundwater monitoring activities at the The Arnold Engineering Company (Arnold) facility, located at 300 N. West Street in Marengo, Illinois. Also included is the record of wastewater flow entering Pond #5 at the facility. This report documents the period from May 1, 2008 through October 31, 2008.

Arnold continues to utilize Prairie Analytical Systems (Prairie), a NELAC-certified laboratory, of Springfield, Illinois, to perform its monthly groundwater sampling events. Prairie was contracted by Arnold in August 2005. If there are any questions, please contact me at (815) 568-2316.

Please note that Permit No. 2006-EO-0690 applies to The Arnold Engineering Co., 300 N. West St., Marengo, IL., 60152.

Sincerely,

Alan Kalaczinski

ARNOLD MAGNETIC TECHNOLOGIES

May 15, 2008

Illinois Environmental Protection Agency
Division of Water Pollution Control
Compliance Assurance Section
1021 North Grand Avenue East
P.O. Box 19276
Springfield, IL 62794-9276

Subject: Arnold Magnetic Technologies
Marengo, Illinois
Permit No. 2006-EO-0690

To Whom It May Concern:

Enclosed is the semiannual report of groundwater monitoring activities at the Arnold Magnetics Technologies (Arnold) facility, located at 300 N. West Street in Marengo, Illinois. Also included is the record of wastewater flow entering Pond #5 at the facility. This report documents the period from November 1, 2007 through April 30, 2008.

Arnold continues to utilize Prairie Analytical Systems (Prairie), a NELAC-certified laboratory, of Springfield, Illinois, to perform its monthly groundwater sampling events. Prairie was contracted by Arnold in August 2005. Please note that groundwater samples from monitoring wells MW-A6 and MW-A7 could not be collected for the month of February after several attempts, due to inclement weather conditions. If there are any questions, please contact me at (815) 568-2316.

Sincerely,

Alan Kalaczinski
Facilities Manager

TABLE OF CONTENTS

LIST OF APPENDICES

1 EXECUTIVE SUMMARY

Environmental Group Services, Ltd. (EGSL) completed a Phase II Subsurface Investigation at the property located at 300 West Street, Marengo, Illinois, hereinafter referred to as the "Subject Property". This investigation was performed in accordance with the regulations set forth in 35 IAC 740 (Site Remediation Program, (SRP)) and 35 IAC 742 (Tiered Approach to Corrective Action Objectives (TACO)), Tier 1, for Industrial/Commercial and Residential properties.

2 PHASE II SUBSURFACE SOIL INVESTIGATION ACTIVITIES

A Phase II Subsurface Investigation was conducted in order to assess the potential for the presence of chemicals of concern (COC) in the subsurface soil present at the site. The investigation was conducted in accordance with Part 740 (SRP) and the COC were chosen from the Target Compound List (TCL) indicator contaminants identified in Appendix A of Part 740.

2.1 Field Sampling Procedures

EGSL utilized a Geoprobe® 6610DT to advance a 5-foot soil sampler in order to retrieve continuous soil samples throughout the Subject Property (see Appendix A for boring locations). All soil samplers were lined with acetate tubes.

All soil samples were split into two parts: one to be placed into a sealed plastic bag for headspace analysis of volatile organic vapors and the other to be placed in laboratory supplied containers for potential analysis. The bagged samples were tested in the field with Photo-Ionization Detector (PID). The PID was used to screen each soil sample from each boring location for relative concentration of VOCs and does not provide separation of the contaminants into individual constituents. The utilization of this field-screening device provided immediate on-site data for use in the assessment of the site.

A total of 40 soil borings were advanced throughout the Subject Property. Forty-nine soil samples were submitted for analysis in order to analytically determine the presence and concentration of COC in the areas of concern (nine of the boring locations had two soil samples submitted). The sample locations, sampling date, depth, and the type of analysis requested of the samples are listed below:

Boring Number	Date Obtained	Depth of Sample Submitted for Analysis (feet)	TCL	VOCs	SVOCs	RCRA Metals (+pH)
GP-1	5/10/2010	6-8	X			
GP-2	5/10/2010	4-6		X		
GP-3	5/10/2010	4-6		X		
GP-4	5/10/2010	3-5		X	X	X

Boring Number	Date Obtained	Depth of Sample Submitted for Analysis (feet)	TCL	VOCs	SVOCs	RCRA Metals (+pH)
GP-5	5/10/2010	1-3		X	X	X
GP-6	5/10/2010	5-7		X

GP-38	5/11/2010	1-3	X			
GP-38	5/11/2010	5-7		X	X	X
GP-39	5/11/2010	2-4	X			
GP-40	5/11/2010	1-3		X	X	X
GP-40	5/11/2010	6-8		X		

The soil samples targeted for laboratory analysis of VOCs were packed into new 40-milliliter glass vials, pre-preserved in sodium bisulfate and methanol in accordance with EPA Method 5035. The soil samples collected for the remaining analysis were packed into one non-preserved 8-ounce wide-mouth jar with a Teflon-lined cap. STAT supplied all glass vials and jars. All soil

samples were stored on ice during soil sample collection activities and while being transported to STAT. Standard Chain-of-Custody procedures were followed to track the sample.

Cross-contamination during soil sampling was minimized by using an Alconox detergent wash and tap water rinse to decontaminate the sampling tools between each probe. Also, other sampling equipment and measurement tools were hand washed with an Alconox detergent wash and rinsed three times with distilled water between soil sample intervals. The tools were then placed on clean, decontaminated surfaces. Disposable latex gloves were worn during the collection of soil sampling events and were changed between each sample.

Additionally, a total of 16 groundwater monitoring wells were installed at the Subject Property. On May 3-5, 2010, *Earth Solutions, Inc.* installed two nests of four wells (eight total wells) in the northwestern portion of the Subject Property. On May 10-12, 2010, EGSL installed an additional eight wells throughout the Subject Property. The depth of the wells and screen intervals are as follows:

Well Number	Date Installed	Company	Well Depth (feet below ground surface)	Screen Interval (feet below ground surface)
MW-1	5/3/2010	Earth Solutions	50	40-50
MW-2	5/3/2010	Earth Solutions	40	30-40
MW-3	5/3/2010	Earth Solutions	30	20-30
MW-4	5/4/2010	Earth Solutions	20	10-20
MW-5	5/4/2010	Earth Solutions	50	40-50
MW-6	5/4/2010	Earth Solutions	40	30-40
MW-7	5/5/2010	Earth Solutions	30	20-30
MW-8	5/5/2010	Earth Solutions	20	10-20
MW-9	5/10/2010	EGSL	20	10-20
MW-10	5/10/2010	EGSL	20	10-20
MW-11	5/10/2010	EGSL	20	10-20
MW-12	5/10/2010	EGSL	20	10-20
MW-13	5/10/2010	EGSL	20	10-20
MW-14	5/10/2010	EGSL	20	10-20
MW-15	5/10/2010	EGSL	20	10-20
MW-16	5/10/2010	EGSL	20	10-20

All groundwater samples were submitted for Target Compound List indicator contaminants.

3 PHASE II SUBSURFACE SOIL INVESTIGATION RESULTS

The following section presents the physical and chemical results of the Phase II investigation, which include a description of the site subsurface and regional geology and the chemical findings in the soil samples submitted to the laboratory.

3.1 Physical Findings

The subsurface geology of the boring locations generally consisted of sand or sandy silt throughout the majority of the Subject Property (See Appendix B for complete boring logs).

3.2 Chemical Results

The analytical test results of the soil and groundwater samples were compared to the Soil Remediation Objectives (SROs) derived from the Illinois Environmental Protection Agency (IEPA) "adopted" IAC 742, Tiered Approach to Corrective Action Objectives (TACO), Tier I for Industrial/Commercial and Residential properties and for Soil Component of the Groundwater Ingestion Route (SCGIR) Class I Groundwater. Analytical results indicate that the following chemicals of concern were detected above IEPA Tier 1 Remediation Objectives (see Appendix C for complete analytical data):

Soil

Chemical	Sample Number (Depth)	Concentration Detected (mg/Kg)	Remediation Objective (mg/Kg)	Exposure Route

		Residential Route Specific Values for Soil		Construction Worker Route Specific Values for Soil		Soil Component of Groundwater Ingestion Exposure Route Values		
CAS No.	Analyte	Ingestion	Inhalation	Ingestion	Inhalation	Class I	Class II	
7429-90-5	Aluminum							
7440-70-2	Calcium					---	---	
7440-47-3	Chromium					0.1	1.0	
7440-48-4	Cobalt					1.0	1.0	
7439-89-6	Iron					5.0	5.0	
7439-95-4	Magnesium					---	---	
7439-96-5	Manganese					0.15	10.0	
7440-22-4	Silver					0.05	---	< 0.004
7440-23-5	Sodium					---	---	

All units are mg/L unless otherwise noted.

Based on 35 IAC Part 742, Appendix B Table A.

Bolded/Shaded values have detected results exceeding the lowest Tier I remediation objective. Bolded/Italicized values have detected results exceeding Construction Worker Objectives from 35 IAC Part 742, Appendix B Table B.

Client Sample ID : GP-25 (2-4)
Date Collected : 05/10/2010 18:30
pH = 7.16

	Residential Route Specific Values for Soil		pH Specific Soil Component of Groundwater Ingestion Route Values		
	Ingestion	Inhalation	Class I	Class II	
INORG Analyte	pH Range 6.9 to 7.24				
Arsenic	13.0/11.3	750	29	120	2.8
Barium	5,500	690,000	1,700	1,700	110
Cadmium	78	1,800	11	110	< 0.55
Chromium	230	270	36	No Data	17
Lead	400	---	107	1,420	9.4
Mercury	23	10 / 0.1*	3.3	16	< 0.029
Selenium	390	---	4.5	4.5	< 1.1
Silver	390	---	13		< 1.1

The actual laboratory determined pH values are listed and used for reference purposes.
NDA - No Data Available for this pH range.
All units are mg/Kg unless otherwise noted.
Based on 35 IAC Part 742, Appendix B Table A.
Class I / II objectives based on 35 IAC Part 742, Appendix B Tables C & D.
Bolded/Shaded values exceed the lowest pH specific remediation objective.
Chromium Class I / II objectives based on hexavalent chromium.
* - Construction Worker Inhalation Objective from Appendix B, Table B.

TACO Tier I Soil Remediation Objectives - Supplemental Report (Soil Saturation Limits)

Client: Environmental Group Services, Ltd.
Project: Marengo 5-10
Laboratory: STAT ANALYSIS

Laboratory ID :			10050296-018	10050296-019	10050296-020	10050296-021	10050296-022	10050296-023	10050296-024	10050296-025
Client Sample ID :			GP-15 (6-8)	GP-16 (2-4)	GP-17 (4-6)	GP-18 (5-7)	GP-19 (2-4)	GP-20 (8.5-9.5)	GP-21 (8-10)	GP-22 (2-4)
Date Collected :			05/10/2010 15:00	05/10/2010 15:20	05/10/2010 15:40	05/10/2010 16:00	05/10/2010 16:20	05/10/2010 16:35	05/10/2010 16:50	05/10/2010 17:10
