**RECOMMENDATION OF THE ILLINOIS
ENVIRONMENTAL PROTECTION AGENCY**

The Illinois Environmental Protection Agency (Illinois EPA) hereby files its Recommendation pursuant to Section 125.204(a) of the regulations of the Illinois Pollution Control Board (the Board), 35 Ill. Adm. Code 125.204(a).

1. On April 11, 2017, the Illinois EPA received a request from Keith Morby Finishing Barns (log number TC-137871, Exhibit A) for an Illinois EPA recommendation regarding the tax certification of water pollution control facilities pursuant to Section 125.204(a) of the Board's regulations, 35 Ill. Adm. Code 125.204(a).
2. The facility's address is: Keith Morby Finishing Barns
2021 30th Avenue
Aledo, IL 61231
3. The proposed water pollution control facilities in this request are located at Section 14, T13N, R3W of the 4th P.M. in Mercer County, at the above street address and consist of the following:

Livestock waste management facilities consisting of: a concrete pit (approximately 391 ft. x 52 ft. x 8 ft. deep) with ten concrete pump outs (approximately 6 ft. x 6 ft. x 8 ft. deep); a PVC perimeter tile drain (4 in. diameter and approximately 500 ft. in length); and slotted floors over the pit.

4. These livestock waste management facilities are used to collect, transport and/or store livestock wastes prior to cropland application, and are further described in Exhibit A.
5. Section 11-10 of the Property Tax Code, 35 ILCS 200/11-10 (2014), and Section 125.200(a)(1) of the Board's regulations, 35 Ill. Adm. Code 125.200(a)(1), define pollution control facilities as:

[A]ny system, method, construction, device or appliance appurtenant thereto or any portion of any building or equipment, that is designed, constructed, installed or operated for the primary purpose of: eliminating, preventing, or reducing air or water pollution, as the terms air pollution and water pollution are defined in the Act; or treating, pretreating, modifying or disposing of any potential solid, liquid or gaseous pollutant which if released without treatment, pretreatment, modification or disposal might be harmful, detrimental or offensive to human, plant or animal life, or to property.
6. If it is found that the claimed facility or relevant portion thereof is a pollution control facility as defined in Section 125.200(a)(1) of the Board's regulations, 35 Ill. Adm. Code 125.200(a)(1), the Board has the authority to enter a finding and issue a certificate to that effect, pursuant to Section 11-20 of the Property Tax Code, 35 ILCS 200/11-20 (2014) and Section 125.216 of the Board's regulations, 35 Ill. Adm. Code 125.216.
7. Pursuant to Section 125.204(a) of the Board's regulations, 35 Ill. Adm. Code 125.204(a), if the Illinois EPA receives a tax certification application it must file a recommendation on the application with the Board.
8. Based on the information in the application and the purpose of the facilities, it is the Illinois EPA's engineering judgment that the described facilities may be considered pollution control facilities, with the primary purpose of eliminating,

preventing, or reducing water pollution, or as otherwise provided in Section 125.200(a)(1) of the Board's regulations, 35 Ill. Adm. Code 125.200(a)(1), and are eligible for tax certification from the Board.

WHEREFORE, the Illinois EPA recommends that the Board issue the requested tax certification.

Aledo, IL 61231
Recommendation of Tax Certification
Log # TC-137871
Property ID # 15-15-13-300-001

The Bureau of Water received a request on April 11, 2017 from Keith Morby Finishing Barns for an Illinois EPA recommendation regarding the tax certification of water pollution control facilities pursuant to 35 Ill. Adm. Code 125.204. We offer the following recommendation.

The water pollution control facilities in this request include the following:

Keith Morby Finishing Barns
2021 30th Avenue
Aledo, IL 61231

Section 14, T13N, R3W of the 4th PM in Mercer County

Livestock waste management facilities consist of a concrete pit (approximately 391 ft. x 52 ft. x 8 ft. deep) with ten (10) concrete pump outs (approximately 6 ft. x 6 ft. x 8 ft. deep), a PVC perimeter tile drain (4 in. diameter and approximately 500 ft. in length), and slotted floors over the pit. These livestock waste management facilities are used to collect, transport, and/or store livestock waste prior to cropland application.

These facilities are further described in the enclosed applications and supporting documents.

Based on the information included in this submittal, it is our engineering judgment that the above proposed facilities may be considered "Pollution Control Facilities" under 35 IAC 125.200(a), with the primary purpose of eliminating, preventing, or reducing water pollution, or as otherwise provided in this section, and therefore eligible for tax certification from the Illinois Pollution Control Board. The Bureau of Water therefore recommends that the Board issue the requested tax certification for these facilities.

If you have any questions regarding the above, please contact Jenny Larsen at 217/782-0610.

Wastes: ☒ Livestock waste is applied to cropland.
☐ Agrichemical rinsate and spillage is recycled through the facility and/or land applied.
☐ Other: _____

Physical Description of Pollution Control Devices:

This facility consists of a concrete manure storage pit (391 ft. x 52 ft. x 8 ft. deep, see Sec. D of application), ten concrete pump out ports (6 ft. x 6 ft. x 8 ft. deep, see statement submitted in 4/25/2017 email), a PVC perimeter tile drain (4" diameter x 500 ft. length, see statement submitted in 4/25/2017 email), and slotted floors over the pit. Schematic flow diagram was submitted by email on 6/16/2017. Keith Morby submitted a statement by email withdrawing the building above the pit and slotted floors from his application on 06/19/2017.

4/25/2017– Spoke over the phone with Keith Morby. I told him to submit a statement indicating which structures he wants to be certified as pollution control structures. See attached email.

The primary purpose for these structures is to contain livestock waste thereby preventing contaminated water runoff. Recommended Action: Permit the above mentioned structures.

Re: Certification Letter
Keith Morby Hog Facility
WHA No. 1014F17

Dear Mr. Kelchen:

Willett, Hofmann & Associates, Inc. has reviewed structural design calculations for precast hog slats and precast beams at the Keith Morby Hog Facility near Aledo, Illinois. The purpose of this letter is to provide certification for precast concrete components as required by the Illinois Department of Agriculture (IDOA).

This design is limited to the precast concrete slats and beams as a component design for this project only. Responsibility for the overall building structural integrity is not included and shall be provided by others.

Based on the information you provided, we understand the beams have a 12'-0" span length. We understand that cross sections are 10" deep with a varying width ranging from 9" at the top to 8" at the bottom. The slats are 4'-0" wide x 10'-0" long x 4" thick. The beams are reinforced with three (3) #6 reinforcing bars placed 1 1/2" clear from the bottom and two (2) #3 reinforcing bars placed 1 1/2" from the top. The slats are reinforced with one (1) 3/8" diameter deformed wire on the bottom and one (1) 5/16" diameter deformed wire on the top in each slat. Clear distances for slat reinforcing are 1 1/4" top and 3/4" bottom.

Our evaluation has been based upon compliance with the American Concrete Institute (ACI) Building Code Requirements for Reinforced Concrete. The slats have been evaluated for loading prescribed in the Livestock Facilities Waste Handbook (MWPS-18), Third Edition, published by the Midwest Plan Service (MWPS). The following is a summary of the design criteria used in this evaluation.

Public Land Survey System (PLSS)

Instructions: This web page will allow you to enter an Illinois address and determine its legal description to the section level-of-detail. The Public Land Survey System (PLSS) is used in legal descriptions and employs a grid system described in terms of numbered townships, ranges, and sections. Please follow the instructions below. **Note:** If the Google Maps application below is not displayed, make sure to enable Javascript on your Internet browser.

1. Enter your address in the box below and click "Search Address." Address location is provided by Google geolocation service.
2. Please check that location is accurate. If not, see step 4.
3. An information window will appear listing the County, Township, Range, and Section for the marker location. Also listed is the Principal Meridian from which that area was surveyed, USGS 7.5-minute Quadrangle name, Civil Township or Precinct name, and Latitude/Longitude coordinates.
4. If you would like to move the marker due to an incorrect geolocation, first close the information window by clicking on the "X" in the top right corner, then drag the marker to a new location. A new information window will appear with the new location information.

Cc: Durango, Roberto
Subject: Keith Morby Finishing Farm Tax Certification

Keith,

It has been brought to my attention that the IEPA filed a recommendation for the tax certification of the water pollution control facilities for Keith Morby Finishing Barn on May 2, 2008 for the following structure located in Section 14, T13N, R3W, of the 4th P.M. in Mercer County:

"Livestock waste management facilities consisting of one concrete manure pit (391 ft. x 52 ft. x 8 ft. deep) with ten concrete pump out pits (each 6 ft. x 6 ft. x 8 ft. deep) and the slotted concrete portion of the floor over the manure pit. The manure pit is surrounded by approximately 500 feet of 4-inch diameter PVC perimeter foundation drainage tubing."

Please clarify why an application was received by the IEPA on April 11th, 2017 for seemingly the exact same structure?

Thanks,

Jenny Larsen, P.E.
