Subject: [External] Protect Illinois' air: R2018-20, Amendments to 35 Ill. Adm. Code 225.233

Dear IL Pollution Control Board Assistant Clerk,

*****All coal is dirty. There's no such thing as 'clean coal'.

Illinois Environmental Protection Agency and Dynegey's proposal to amend the Multi Pollutant Standard (MPS) is unnessecary and would give Dynegey the option to increase air pollution (NOx and SO2) at certain individual Dynegey plants. The proposal includes Baldwin, Coffeen, Duck Creek, Edwards, Havana, Hennepin, Joppa, and Newton coal fired power plants. Any increase in pollution would place an undue public health burden on the communities surrounding the plants and the people who live there.

A high number of Dynegey's plants are located in Environmental Justice communities so a potential increase in NOx and SO2 pollution from individual Dynegey plants presents Environmental Justice concerns. Both pose serious health risks, especially for vulnerable community members like infants and small children, the elderly, and asthmatics.

For these reasons, the Illinois Pollution Control Board should reject the regulatory changes that the Illinois Environmental Protection Agency and Dynegey are proposing.

Sincerely,

Janice Ehrenhaft
