Subject: [External] Protect Illinois' air: R2018-20, Amendments to 35 Ill. Adm. Code 225.233
Date: Saturday, January 6, 2018 9:48:07 AM

Dear IL Pollution Control Board Assistant Clerk,

The proposal supported by the IEPA and Dynegy to amend the Multi Pollutant Standard (MPS) is unwise because it would give Dynegy the option to increase air pollution (NOx and SO2) at specified Dynegy plants. The proposal covers coal fired plants, including Baldwin, Coffeen, Duck Creek, Edwards, Havana, Hennepin, Joppa, and Newton. The increase in pollution as a result would have significant negative impact on the public health of the communities who live near these plants.

A high number of Dynegy's plants are located in Environmental Justice communities so a potential increase in NOx and SO2 pollution from individual Dynegy plants presents Environmental Justice concerns. Both pose serious health risks, especially for vulnerable community members like infants and small children, the elderly, and asthmatics.

In view of these facts, the IPC Board should reject the regulatory changes proposed by the Illinois Environmental Protection Agency and Dynegy.

Sincerely,

Julie Prandi99
