Subject: [External] Public Comment RE: IPCB Case R18-20 Dynegy Multi-Pollutant Standard
Date: Monday, January 15, 2018 4:45:29 PM

Dear Mr. Brown,

I live in Glen Carbon and am opposed to providing Dynegy any more relief concerning their emissions. I understand that if IPCB agrees with Dynegy, Dynegy would emit double the amount of sulphur dioxide that they emitted last year. If the IPCB agrees to allow such relief they are not *controlling pollution*, which is your job. I believe that such a decision would conflict with the policies and goals for renewable energy and energy efficiency contained in the recently adopted Future Energy Jobs Act.

Please add my name and contact information to your list of State residents opposing this request by Dynegy.

Sincerely,

Chris Krusa
